Bellemave LH-GX000705AAK-1

Bellemave Tree House Bunk Bed with Trundle

Model: LH-GX000705AAK-1 | **Brand:** Bellemave

1. INTRODUCTION AND OVERVIEW

This manual provides detailed instructions for the assembly, operation, and maintenance of your Bellemave Tree House Bunk Bed with Trundle. Designed with a playful house shape, this bunk bed offers a unique and functional sleeping solution for children's bedrooms. It features a twin-over-twin configuration with an additional pull-out trundle bed, maximizing space and versatility. Constructed from durable pinewood and MDF, the bed includes slat kits, eliminating the need for a box spring.

2. SAFETY INFORMATION

Your safety is paramount. Please read and adhere to all safety guidelines before assembly and use.

- Always follow the assembly instructions carefully to ensure the bed frame's stability and safety.
- Do not attempt to assemble or disassemble the bed frame without proper tools and assistance. It is recommended to have at least two adults for assembly.
- Ensure all connections (screws, bolts, fasteners) are securely tightened before allowing anyone to use the bed. Periodically check and retighten connections.
- The top bunk is not suitable for children under six years of age.
- Ensure the mattress used on the top bunk does not exceed the maximum recommended thickness to maintain adequate guardrail height.
- Do not attach or hang items on any part of the bunk bed that are not designed for use with the bed, e.g., hooks, ropes, or belts.
- Always use the ladder for access to the upper bunk. Do not jump on the bed.
- Adhere to the recommended weight limits for each sleeping surface.

3. FEATURES

The Bellemave Tree House Bunk Bed incorporates several design and structural features for functionality and safety:

- **House-shaped Design:** Features a pitched roof and side windows, offering a unique aesthetic and potential for decorative elements or light storage.
- **Ultra-Safe Loft Bed System:** Equipped with full-length guardrails on the upper bunk, an anti-slip inclined ladder, and a sturdy pine frame reinforced with metal hardware to ensure a secure sleeping environment.
- **Military-Grade Sturdy Construction:** Built from high-quality solid pine wood and MDF, providing long-term durability. Pine is moisture-resistant and insect-proof, while MDF enhances overall stability.
- **Smart 3-in-1 Space Saving Design:** A triple-layer bed configuration (twin over twin with trundle) optimizes floor space, ideal for multiple children or accommodating guests. The vertical layout frees up room for other furniture.
- **Hidden Trundle:** The under-bed trundle offers an additional sleeping area or can be used for convenient storage of bedding or toys.
- **Hassle-Free Assembly:** All parts are pre-drilled and numbered, and the package includes necessary installation tools and a detailed guide with images and tutorials for straightforward setup.

4. SETUP AND ASSEMBLY INSTRUCTIONS

The Bellemave Tree House Bunk Bed is designed for straightforward assembly. Please follow these general steps and refer to the separate, detailed assembly guide included in your package for specific diagrams and part identification.

1. **Unpack and Verify:** Carefully unpack all components. Lay them out and compare them against the parts list provided in your assembly guide to ensure all pieces are present and undamaged.
2. **Identify Hardware:** Separate and identify all hardware (screws, bolts, nuts, etc.) using the provided guide.
3. **Follow Step-by-Step Guide:** Adhere strictly to the step-by-step instructions and diagrams in the detailed assembly guide. Each step is designed to build the bed frame securely.
4. **Secure Connections:** Ensure all screws and fasteners are tightened securely at each stage of assembly. Do not overtighten, as this can damage the wood.
5. **Final Stability Check:** Once fully assembled, confirm the stability of the entire structure. Gently shake the bed to ensure there is no excessive wobbling.

Important: It is highly recommended to assemble the bed on a soft, clean surface to prevent scratches. Keep children and pets away from the assembly area until the bed is fully constructed.

5. OPERATING INSTRUCTIONS

This section details the operation of the integrated trundle bed.

1. **To Extend the Trundle:** Gently grasp the handle or front panel of the trundle unit. Pull the unit smoothly out from under the main bed frame until it is fully extended and the wheels are locked (if applicable).
2. **To Retract the Trundle:** Ensure any mattress or bedding is properly positioned or removed from the trundle. Gently push the trundle unit back under the main bed frame until it is fully concealed and flush with the bed.

SIZE:INCH

6. MAINTENANCE

Proper maintenance will ensure the longevity and appearance of your bunk bed.

- **Cleaning:** Wipe surfaces with a soft, damp cloth. Avoid harsh chemicals, abrasive cleaners, or polishes that may damage the finish.
- **Tightening:** Periodically (e.g., every 3-6 months) check all bolts, screws, and fasteners. Tighten them as needed to maintain structural integrity and prevent wobbling.
- **Protection:** Avoid exposing the bed to direct sunlight or extreme temperature changes, which can cause wood to warp, crack, or fade. Use furniture pads if placing the bed on delicate flooring.
- **Weight Limits:** Always adhere to the manufacturer's recommended weight limits for both the upper and lower bunks, as well as the trundle.

7. TROUBLESHOOTING

This section addresses common issues you might encounter.

- **Issue: Bed feels wobbly after assembly.**

Solution: Recheck all connections. Ensure all screws and bolts are fully tightened. Verify that the bed is on a level surface. If the floor is uneven, use shims to stabilize.

- **Issue: Trundle does not slide smoothly.**

Solution: Check for any obstructions under the bed. Ensure the trundle wheels are clean and free of debris. Lubricate the wheel mechanisms with a silicone-based spray if necessary.

- **Issue: Squeaking noises.**

Solution: Identify the source of the squeak. Tighten any loose bolts or screws in that area. Applying a small amount of wax or lubricant to wood-on-wood joints can also help.

8. SPECIFICATIONS

Detailed specifications for the Bellemave Tree House Bunk Bed with Trundle.

Image: Dimensional drawing of the bunk bed.

Attribute	Detail
Size	Twin Over Twin
Product Dimensions (L x W x H)	79.6" x 81.58" x 91.8"
