This manual provides detailed instructions on how to set up, operate, and maintain your watch to ensure optimal performance and longevity. Please read it carefully before using your watch.

PRODUCT OVERVIEW

Familiarize yourself with the main components and buttons of your WeCool Fairwhale watch:

FUNCTION DESCRIPTION

Figure 2: Watch Components and Button Functions

- **LIGHT Button:** Activates the LED backlight.
- **MODE Button:** Cycles through different modes (Time, Alarm, Stopwatch).
- **RESET Button:** Used for resetting stopwatch or adjusting settings.
- **START Button:** Used for starting stopwatch or adjusting settings.
- **ADJUST Button:** Used for entering setting mode and confirming selections.

SETUP AND INITIAL CONFIGURATION

Setting Digital Time and Date

1. In normal time display mode, press the **MODE** button three times to enter the time setting mode. The seconds will flash.
2. Press the **RESET** button to cycle through the settings: Seconds → Hour → Minute → Month → Date → Day of Week.
3. Use the **START** button to adjust the flashing value. Hold to increase rapidly.

4. Once all settings are correct, press the **MODE** button to exit the setting mode.

Setting Analog Time

The analog hands are set independently. Pull out the crown (small knob on the right side of the watch) and rotate it to adjust the analog time. Push the crown back in when finished.

OPERATING INSTRUCTIONS

Using the LED Backlight

Press the **LIGHT** button (top left) to illuminate the digital display. The backlight will stay on for a few seconds, allowing you to read the time in low-light conditions.
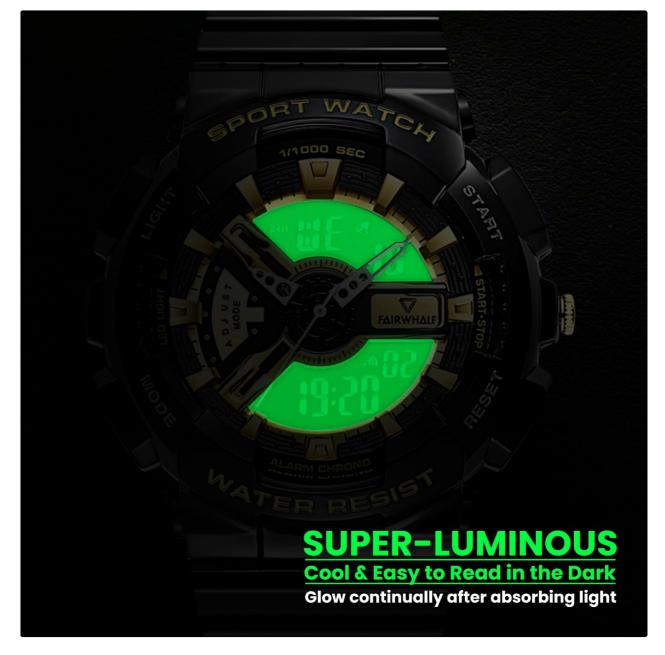

Figure 4: Super-Luminous Display in the Dark

Using the Stopwatch

1. From normal time display, press the **MODE** button once to enter Stopwatch mode. The display will show "00:00:00".
2. Press the **START** button to begin timing.
3. Press the **START** button again to pause timing.
4. Press the **RESET** button to reset the stopwatch to "00:00:00".
5. Press the **MODE** button to return to normal time display.

Setting and Using the Alarm

1. From normal time display, press the **MODE** button twice to enter Alarm setting mode. The hour digits will flash.
2. Press the **RESET** button to select between hour and minute settings.
3. Use the **START** button to adjust the flashing value.
4. Once the desired alarm time is set, press the **MODE** button to exit.
5. To turn the alarm ON/OFF, in Alarm mode, press the **START** button. An alarm icon will appear/disappear on the display.

Care and Maintenance

- **Cleaning:** Wipe the watch regularly with a soft, dry cloth to remove dirt and sweat. For stubborn dirt, use a slightly damp cloth and then dry thoroughly.

- **Water Resistance:** This watch is water-resistant up to 50 meters (5 ATM). It is suitable for cold water, rain, and swimming. **DO NOT** press any buttons underwater. Avoid exposure to steam and hot water, as this can damage the waterproof seal.

- **Temperature:** Avoid exposing the watch to extreme temperatures (hot or cold) for prolonged periods.

- **Chemicals:** Keep the watch away from solvents, detergents, perfumes, and other chemicals that may damage the band or case.

- **Battery Replacement:** When the display becomes dim or functions become erratic, it may be time to replace the battery. It is recommended to have the battery replaced by a qualified watch technician to ensure the water resistance is maintained.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Digital display is blank or dim.	Low battery.	Replace the battery.
Analog hands are not moving or incorrect.	Crown is pulled out; battery issue.	Push the crown back in. If still not working, replace battery.
Buttons are unresponsive.	Watch may be in a locked mode or battery is low.	Try pressing all buttons firmly. If issue persists, replace battery.
Water inside the watch.	Buttons pressed underwater; exposure to hot water/steam; damaged seal.	Immediately take to a professional watch repair service. Avoid further water exposure.
