Cybex Aton G Infant Car Seat User Manual

Model: 522005655

INTRODUCTION

This manual provides essential information for the safe and proper use, installation, and maintenance of your Cybex Aton G Infant Car Seat. Please read all instructions carefully before using the product and keep this manual for future reference. The Cybex Aton G is designed to provide superior safety and comfort for your child, featuring Linear Side-Impact Protection, an 11-position adjustable headrest, in-shell ventilation, and an easy-in buckle. It is one of the lightest infant car seats available, weighing approximately 9 lbs.

SAFETY INFORMATION

Always prioritize your child's safety. Adhere to all local and national safety regulations regarding car seat installation and use. Never leave your child unattended in the car seat.

- Ensure the car seat is correctly installed using either the vehicle's LATCH system or seat belt, as per the detailed instructions provided in the full product manual.
- Always secure your child with the 5-point harness system, ensuring straps are snug and the chest clip is at armpit level.
- The car seat is designed for rear-facing orientation only.
- Do not use the car seat if it has been involved in a crash, even if there is no visible damage.
- Regularly check for any recalls or safety notices related to your car seat model.

SETUP AND INSTALLATION

The Cybex Aton G Infant Car Seat comes with a SAFELOCK base for secure and easy installation. This car seat is designed for rear-facing use only.

Installing the SAFELOCK Base

The SAFELOCK base can be installed using the vehicle's LATCH system. Ensure the base is level and securely fastened, with minimal movement.

Figure 1: Cybex Aton G Infant Car Seat with its SAFELOCK base. The base provides a stable platform for the car seat in the vehicle.

Attaching the Car Seat to the Base

Once the base is securely installed, align the car seat with the base and push down firmly until you hear an audible "click," indicating it is locked into place. Always check the connection by pulling up on the car seat.

Newborn Insert

The car seat includes a removable newborn insert designed to provide proper support and positioning for infants up to a certain weight (refer to the full manual for specific weight limits). Install the insert before placing a newborn in the seat. Remove it when your child outgrows it to ensure proper harness fit.

OPERATING INSTRUCTIONS

Adjusting the Headrest and Harness

The Cybex Aton G features an 11-position adjustable headrest with a no-rethread harness. To adjust, squeeze the

headrest adjustment handle (usually located at the back or top of the headrest) and slide the headrest up or down to the desired position. Ensure the harness straps are at or slightly below your child's shoulders for rear-facing use.

Figure 2: The 11-position adjustable headrest and integrated no-rethread harness system, allowing for easy adjustment as your child grows.

Using the Easy-in Buckle

The easy-in buckle is designed for stress-free loading and unloading of your child. To buckle, insert each buckle tongue into the buckle until it clicks. To unbuckle, press the red release button on the buckle.

Operating the UPF50+ Sun Canopy

The car seat is equipped with an XXL UPF50+ sun canopy to provide shade and protection from the sun. To extend the canopy, pull it forward. To retract, push it back. The canopy can be adjusted to various positions.

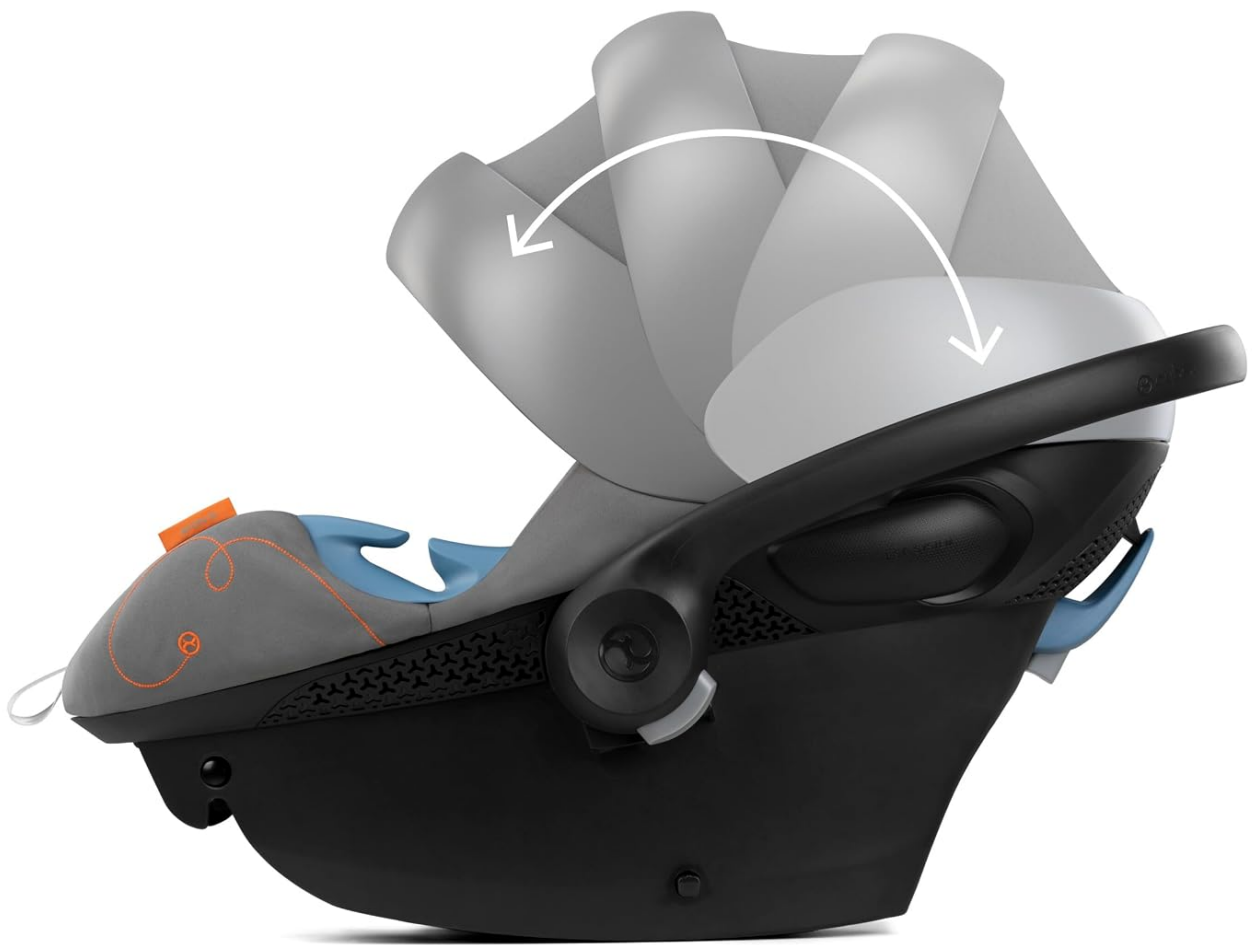

Figure 3: The large UPF50+ sun canopy extended, providing ample shade and UV protection for the child.

Linear Side-Impact Protection (LSP)

The integrated Linear Side-Impact Protection system is built into the shell of the car seat to effectively reduce collision forces in a side-impact crash. Ensure the LSP system is properly deployed if your model requires manual activation (refer to the full manual for specific instructions).

In-Shell Air Ventilation

The car seat features in-shell air ventilation to promote natural airflow, helping to keep your child comfortable and cool during travel.

Maintenance and Care

Regular cleaning and maintenance will ensure the longevity and safety of your car seat.

- **Fabric Cleaning:** The car seat fabric is made of polyester. Refer to the care label on the fabric for specific washing instructions. Typically, fabrics can be machine washed on a delicate cycle with cold water and mild detergent. Do not use bleach. Air dry only.
- **Harness System:** Wipe the harness straps with a damp cloth. Do not machine wash or submerge the harness straps, as this can weaken the webbing.
- **Plastic and Metal Parts:** Clean plastic and metal parts with a mild soap and water solution. Avoid abrasive cleaners.
- **Storage:** When not in use, store the car seat in a cool, dry place away from direct sunlight.

Troubleshooting

This section addresses common issues you might encounter with your Cybex Aton G Infant Car Seat.

Problem	Possible Cause	Solution
Car seat not clicking into base securely.	Incorrect alignment or obstruction.	Ensure the car seat is properly aligned with the base connectors. Check for any debris or fabric obstructing the connection points. Apply firm, even pressure until an audible click is heard.
Harness straps are difficult to tighten or loosen.	Harness may be twisted or buckle is not fully engaged.	Untwist any twisted harness straps. Ensure the buckle tongues are fully inserted into the buckle. Press the harness release button (if applicable) before attempting to loosen.
Headrest adjustment is stiff.	Mechanism may be obstructed or not fully released.	Ensure the adjustment handle is fully squeezed. Check for any fabric or debris interfering with the sliding mechanism.

If you encounter issues not listed here, or if solutions do not resolve the problem, please contact Cybex customer support or refer to the comprehensive product manual.
