iHome Plug-in LED Night Lights (Model 2IHLT100) - Instruction Manual

Your guide to effortless, energy-efficient lighting.

1. PRODUCT OVERVIEW

The iHome Plug-in LED Night Lights provide convenient and energy-efficient illumination for various areas of your home. This 4-pack includes two white and two red lights, each equipped with a smart dusk-to-dawn sensor for automatic operation. Designed to emit a soft 3000K warm glow, these lights create a calming environment without the need for switches, batteries, or complex wiring.

- **Smart Dusk-to-Dawn Sensor:** Automatically turns on at night and off at dawn, providing light only when needed.
- **Sleep-Friendly 3000K Warm Glow:** Emits a soft, warm light conducive to a restful sleep environment.
- **Plug-and-Play Convenience:** Simple operation; just plug into any standard outlet.
- **Energy-Efficient Design:** Utilizes minimal electricity, contributing to energy savings.
- **Versatile 4-Pack:** Ideal for hallways, kitchens, pantries, bathrooms, kids' rooms, and stairways.

2. SETUP

Setting up your iHome LED Night Lights is quick and easy. No assembly or special tools are required.

1. **Unpack:** Carefully remove the night lights from their packaging.
2. **Select Location:** Choose a standard electrical outlet in an area where you desire ambient lighting during low-light conditions. Ensure the sensor on the top of the night light is not obstructed.
3. **Plug In:** Insert the night light directly into the electrical outlet. Ensure it is securely plugged in.

INSTANT, OUT OF BOX LIGHTING NO SETUP REQUIRED

Simply plug in and enjoy instant, hassle-free lighting
with no cords, wires, or charging needed.

GENTLE GLOW FOR BEDROOMS, BATHROOMS, AND MORE

Whether it's for a late-night snack or a cozy glow in the nursery, this night light fits any room in your home.

3. OPERATING INSTRUCTIONS

The iHome LED Night Lights are designed for automatic, hands-free operation.

- **Automatic Activation:** The integrated dusk-to-dawn sensor detects ambient light levels. When the surrounding area becomes dark (e.g., at dusk or in a dimly lit room), the night light will automatically turn on.
- **Automatic Deactivation:** As ambient light increases (e.g., at dawn or when room lights are turned on), the sensor will detect the change, and the night light will automatically turn off.
- **Consistent Glow:** Each night light provides a consistent 3000K warm white or red glow, as per the specific light. This model does not feature adjustable brightness or color-changing options.

INTUITIVE, HANDS FREE LIGHTING— NO SWITCHES, NO FUSS

Equipped with a smart light sensor that automatically activates at night and turns off at dawn.

SMART, FLEXIBLE LIGHTING WHEREVER YOU NEED IT

Includes two red and two white lights—great for
bedrooms, hallways, and more.

REST EASIER WITH GENTLE, SLEEP-SAFE LIGHTING

Red lights help support melatonin production
without disrupting sleep cycles.

4. MAINTENANCE

To ensure optimal performance and longevity of your iHome LED Night Lights, follow these simple maintenance guidelines:

- **Cleaning:** Disconnect the night light from the power outlet before cleaning. Use a soft, dry cloth to wipe the surface. Do not use liquid cleaners or abrasive materials, as these may damage the unit.
- **Sensor Care:** Keep the light sensor (located on the top of the unit) free from dust and obstructions to ensure accurate dusk-to-dawn operation.
- **Storage:** If storing the night lights for an extended period, keep them in a cool, dry place away from direct sunlight.

5. TROUBLESHOOTING

If you encounter any issues with your iHome LED Night Lights, please refer to the following common troubleshooting steps:

- **Light does not turn on in the dark:**

- Ensure the night light is securely plugged into a working electrical outlet.
- Check that the light sensor on top of the unit is not covered or obstructed by furniture, curtains, or other objects.
- Verify that the ambient light level is sufficiently low for the sensor to activate. Test in a completely dark room if necessary.

- **Light remains on during daylight:**

- Ensure the light sensor is not in a perpetually dim area or covered by shadows.
- Confirm that there is adequate ambient light for the sensor to detect daylight.

- **Flickering or inconsistent light:**

- Try plugging the night light into a different outlet to rule out an issue with the electrical supply.
- Ensure the unit is clean and free from dust or debris.

6. SPECIFICATIONS

Brand	iHome
Model Number	2IHLT100
Product Dimensions	6"D x 5"W x 6"H
Lamp Type	Night Light
Shade Color	White and Red (as per pack)
Shade Material	Plastic
Special Feature	Plug In, Dusk-to-Dawn Sensor
Material	Plastic
