Setup and Installation

- 1. Prepare Vehicle:** Ensure your Traxxas vehicle chassis is clean and free of debris. Remove any existing body clips or mounting hardware.
- 2. Position Body:** Carefully align the FUNCO Orange Assembled Body over the vehicle chassis. Ensure that all mounting posts and features on the chassis align with the corresponding holes and contours on the body.
- 3. Secure Body:** Once aligned, use the appropriate body clips (not included, typically supplied with the vehicle) to secure the body to the chassis posts. Ensure all clips are firmly in place to prevent the body from detaching during operation.
- 4. Final Check:** Gently shake the vehicle to confirm the body is securely attached and does not wobble excessively.

Operating Considerations

The body serves as a protective shell for your vehicle's internal components and contributes to its aerodynamic performance and appearance. While operating your vehicle:

- Avoid direct impacts to the body whenever possible to prevent damage.
- Periodically check body clips for security, especially after impacts or rough terrain use.
- Be aware that extreme temperatures can affect the body's material properties.

Maintenance

Proper maintenance will extend the life and appearance of your Traxxas body:

- **Cleaning:** After use, wipe the body with a soft, damp cloth to remove dirt and debris. For stubborn grime, a mild soap solution can be used. Avoid harsh chemicals or abrasive cleaners, as these can damage the paint or material.
- **Inspection:** Regularly inspect the body for cracks, tears, or other damage. Pay close attention to

mounting points and stress areas.

- **Storage:** Store the body in a cool, dry place away from direct sunlight when not in use. Avoid placing heavy objects on top of the body to prevent deformation.

Troubleshooting

Common issues and their solutions:

- **Body Not Fitting:** Ensure the body is correctly oriented and that no obstructions are preventing it from seating properly on the chassis. Verify it is the correct body for your specific Traxxas vehicle model.
- **Body Clips Loose/Lost:** Replace lost body clips immediately with genuine Traxxas parts or compatible alternatives to ensure secure attachment.
- **Minor Cracks/Damage:** Small cracks can sometimes be repaired using specialized RC body repair tape or adhesives. For significant damage, replacement of the body is recommended.
