Proper care and maintenance will extend the life and appearance of your VASAGLE KAILYN 8-Drawer Chest.

- **Spills:** Promptly clean up any spills to prevent staining or damage to the material.
- **Environmental Conditions:** Avoid placing the chest in direct sunlight or near heat sources, as this can cause discoloration or warping. Maintain a stable room temperature and humidity.
- **Regular Checks:** Periodically check all screws and fasteners to ensure they remain tight. Re-tighten if necessary to maintain structural integrity.

6. Troubleshooting

If you encounter any issues with your chest, refer to the following common troubleshooting tips:

- **Drawers not sliding smoothly:** Check if the drawer slides are correctly aligned and free from obstructions. Ensure all screws on the slides and drawer boxes are tightened. Sometimes, a small amount of silicone lubricant can improve sliding.
- **Chest feels unstable:** Verify that the anti-tipping kit is securely installed and properly anchored to the wall. Ensure the chest is placed on a level surface. If the floor is uneven, use furniture pads or shims to stabilize the unit.
- **Parts missing or damaged:** If you find any parts missing or damaged upon unpacking, do not proceed with assembly. Contact customer support immediately for assistance.

7. Safety Information

Your safety is paramount. Please adhere to the following guidelines:

- **Anti-Tipping Kit:** Always install the provided anti-tipping kit to prevent serious injury from tipping furniture. Follow the assembly instructions carefully for proper installation.
- **Weight Distribution:** Distribute items evenly across the drawers and on the top surface. Avoid placing heavy items on the top edge of open drawers, as this can cause the unit to become unstable.
- **Children and Pets:** Do not allow children to climb on or play with the chest. Keep drawers closed when not in use.
- **Placement:** Place the chest on a flat, stable, and level surface.
- **Moving the Unit:** When moving the chest, empty all drawers first. If possible, lift the unit rather than dragging it to prevent damage to the legs or frame.
