EAGLE PEAK 8'x 8' Gray/White PE

EAGLE PEAK Replacement Greenhouse Cover User Manual

Model: 8'x 8' Gray/White PE

1. OVERVIEW

This manual provides essential information for the proper installation, use, and maintenance of your EAGLE PEAK Replacement Cover for 8x8 Portable Pop-up Greenhouse. This cover is specifically designed to fit EAGLE PEAK 8x8 greenhouse frames (frame not included). It features high-quality reinforced PE material, offering UV protection, water resistance, and durability for optimal plant growth conditions.

Key features include a front roll-up zippered entry door and three large roll-up mesh windows for ventilation, ensuring improved air circulation and temperature control within your greenhouse.

2. SETUP AND INSTALLATION

This replacement cover is designed for easy installation on compatible EAGLE PEAK 8x8 greenhouse frames. Ensure your frame is fully assembled and stable before proceeding.

2.1 Preparation

- Unpack the replacement cover and carefully unroll it.
- Inspect the cover for any damage or defects before installation.
- Ensure the greenhouse frame is clean and free of sharp edges that could damage the cover.

2.2 Installation Steps

1. Carefully drape the cover over the assembled EAGLE PEAK 8x8 greenhouse frame, ensuring proper alignment of the peak and corners.

2. Align the polyester reinforced corners with the frame's corner poles.
3. Secure the cover to the frame using any integrated ties or fasteners provided with your original greenhouse frame. Ensure a snug fit to prevent wind damage.
4. Zip up the front entry door to ensure it closes properly.
5. Roll down and secure the three large mesh windows.
6. For added stability, bury the extended wall (skirt) around the base of the greenhouse or place heavy objects like rocks on it to create a ground seal.

Figure 2.2: Detail of the extended wall (skirt) designed for ground sealing or weighting.

3. OPERATING INSTRUCTIONS

The replacement cover is designed for ease of use, focusing on plant accessibility and environmental control.

3.1 Entry and Exit

- To enter or exit the greenhouse, use the front roll-up zippered door. Unzip completely and roll up the door panel, securing it with the integrated ties at the top.
- Always zip the door closed when not in use to maintain internal temperature and protect plants from external elements.

Figure 3.1: The roll-up zippered door provides convenient access to the greenhouse interior.

3.2 Ventilation Control

- The cover features three large roll-up mesh windows for ventilation. To open, unfasten the securing straps and roll up the window panel, securing it at the top.
- Adjust the number of open windows based on external temperature and desired internal air circulation.
- Proper ventilation helps prevent overheating, reduces humidity, and promotes healthier plant growth.

4. MAINTENANCE

Regular maintenance will extend the lifespan of your replacement greenhouse cover and ensure optimal performance.

- **Cleaning:** Clean the cover periodically with mild soap and water. Avoid harsh chemicals or abrasive cleaners that could damage the PE material or UV coating. Rinse thoroughly with clean water.
- **Inspection:** Regularly inspect the cover for any tears, punctures, or signs of wear, especially after strong winds or storms. Promptly repair any small damages to prevent them from worsening.
- **Snow Removal:** In areas with heavy snowfall, gently remove accumulated snow from the roof of the greenhouse to prevent excessive weight from damaging the frame or cover.
- **Storage:** If disassembling the greenhouse for seasonal storage, ensure the cover is clean and completely dry before folding and storing it in a cool, dry place away from direct sunlight and pests.

Figure 4.1: The PE cover material is designed for UV protection, water resistance, and moisture preservation, requiring minimal but consistent care.

5. TROUBLESHOOTING

This section addresses common issues you might encounter with your greenhouse cover.

Problem	Possible Cause	Solution
Cover does not fit frame properly.	Incorrect cover size; frame not fully assembled or misaligned.	Verify the cover size matches your EAGLE PEAK 8x8 greenhouse frame. Ensure the frame is correctly assembled and all poles are securely connected.
Water pooling on roof.	Insufficient tension; frame sagging.	Ensure the cover is pulled taut and securely fastened to the frame. Check frame integrity for any sagging or damage.
Poor ventilation/high humidity inside.	Windows or door not opened sufficiently.	Open the roll-up mesh windows and/or the zippered door to increase airflow. Adjust based on external temperature and humidity.
Cover flapping in wind.	Inadequate securing; insufficient ground seal.	Ensure all ties and fasteners are securely attached to the frame. Bury the extended wall (skirt) or place heavy objects on it to create a better ground seal. Consider using additional guy ropes if necessary.

6. SPECIFICATIONS

Detailed specifications for the EAGLE PEAK Replacement Greenhouse Cover.

Model: 8'x 8' Gray/White PE

Material: Reinforced PE (Polyethylene)

Features: UV-protective, Waterproof, Durable

Entry: Front Roll-Up Zippered Door

Ventilation: 3 Large Roll-Up Mesh Windows

Compatibility: Designed ONLY for EAGLE PEAK 8x8 greenhouse frames (Frame Not Included)

Package Dimensions: 39.76 x 9.45 x 6.69 inches

Item Weight: 13.23 pounds
