JUEMEL H859

JUEMEL 15FT/18FT Winter Round Pool Cover Instruction Manual

Model: H859

INTRODUCTION

This manual provides detailed instructions for the proper installation, operation, and maintenance of your JUEMEL Winter Round Pool Cover. Designed for 15FT and 18FT above-ground pools, this cover offers robust protection against debris, harsh weather, and helps maintain water quality.

SAFETY INFORMATION

- **Pool Safety:** Always supervise children and pets around the pool.
- Ensure the cover is properly secured and maintained to prevent accidents.
- Follow installation instructions carefully to avoid potential hazards.
- Do not walk on the pool cover.

PRODUCT FEATURES

- **Innovative Tightening Device:** Ensures the cover remains stable and reliable, fitting snugly around the pool edge to prevent debris entry.
- **Durable and Tear-Resistant Material:** Made of high-quality 420D woven polyester fabric, treated with special waterproof material to block rainwater and withstand strong winds and snow.
- **Color Stability:** Meets US standard level 4 for color stability, ensuring the color remains bright even after prolonged sun exposure without releasing harmful substances into the pool water.
- **All-Season Durability:** Provides year-round protection against leaves, dirt, rainstorms, snowstorms, and insects.
- **Quick-Release Buckles:** For easy installation and storage.

PACKAGE CONTENTS

- 1 x JUEMEL Winter Round Pool Cover (15FT or 18FT)
- Ratchet Strap Tightener
- Installation Instructions Manual

SETUP AND INSTALLATION

Follow these steps for proper installation of your pool cover:

Step 1: Prepare the Pool Area

Ensure the pool area is clear of sharp objects or debris that could damage the cover. Partially fill the pool if it's not already full, as some installation methods benefit from water weight.

Step 2: Unfold and Position the Cover

Carefully unfold the pool cover and place it over the entire pool, ensuring it is centered and evenly distributed. Let it rest on the water surface.

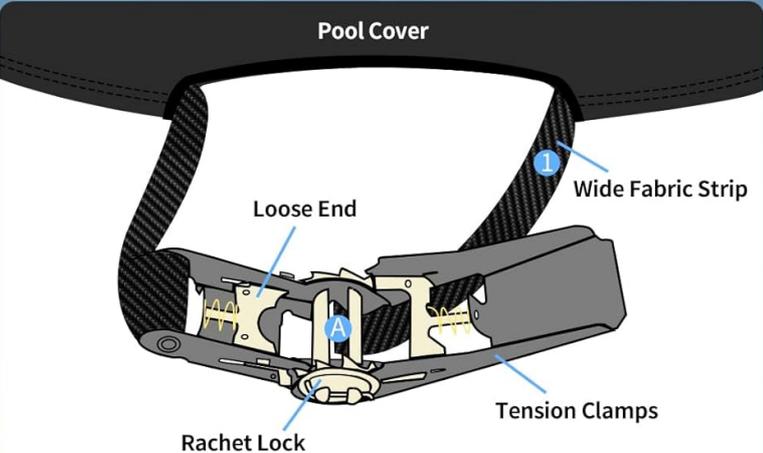

INSTALLATION INSTRUCTIONS

Place the cover over the entire pool and let it rest on the water. Distribute the cover evenly.

Thread a wide strip of fabric through and clamp it in place with tension clips.

The first end ① of the Wide Fabric Strip goes over and through opening A. To ensure your pool cover is securehfixed, Manual Press Tension Clamp until the Wide Fabric Strip is appropriately tightened.

Provides Enhanced Security over Fixed Integrated Eyelets in Compliance

The first end of the Wide Fabric Strip goes over and through opening A. To ensure your pool cover is secure, manually press the Tension Clamp until the Wide Fabric Strip is appropriately tightened.

Step 3: Secure the Cover with Ratchet Straps

Locate the ratchet strap tightener and the wide fabric strips on the cover. Thread the wide fabric strip through the tension clips of the ratchet lock. Ensure the strap is securely fastened and tighten it until the

cover fits snugly around the edge of the pool. Repeat this process for all tightening points around the pool.

Video: This video shows the process of installing a pool cover, emphasizing the use of Velcro straps to secure the cover to the pool frame. It also demonstrates how the cover fits over existing pool accessories and remains secure even in windy conditions.

Step 4: Adjusting for a Snug Fit

The cover features an adjustable drawstring. Pull the drawstring to further tighten the cover around the pool, ensuring a snug and secure fit that prevents wind from lifting it.

i Warm Tips

Round Pool
Please purchase the appropriate size.

Rigid Edge Pool
Please measure the diameter, we recommend buying one size larger.

Inflatable Pools
We recommend purchasing the smaller size inflatable pool.

Minimum water level
The pool cover achieves the optimum mode of use: the water level in the pool is not lower than the water level at the spout.

No water in the pool
To use the pool cover when there is no water in the pool, it is recommended to place a round table or similar in the centre of the pool.

This is a test result when there is no water in the pool, but it is not recommended to use the cover when there is no water in the pool for a long period of time, as prolonged use reduces the service life of the cover and the pool.

Image: Warm Tips: Shows how the cover adapts to Round Pools, Rigid Edge Pools, and Inflatable Pools. It also advises on minimum water level for optimal use and recommends placing a round table or similar object in the center if there is no water in the pool to prevent prolonged use from reducing service life.

Special Warm Reminder: Retain an appropriate amount of water on the pool cover during windy weather.

This thoughtful design uses the weight of the water to increase the stability of the cover, effectively resisting strong winds and preventing the cover from being blown away accidentally.

OPERATING INSTRUCTIONS

Your JUEMEL pool cover is designed for year-round protection and ease of use:

- **Winter Protection:** The thick, tear-resistant material and scientific flow channels keep surfaces taut and dry, preventing snowmelt from warping the cover or causing grime buildup.
- **Solar Heating:** The black material helps absorb sunlight, contributing to heating the pool water.
- **Debris Prevention:** Forms a solid barrier that prevents leaves, debris, and small animals from entering the pool.
- **Water Drainage:** The cover is designed to allow water to drain off, preventing excessive pooling. For covers with a self-draining feature, ensure it is properly installed.

MAINTENANCE

- **Cleaning:** Regularly remove leaves and debris from the top of the cover to prevent accumulation and potential damage. Use a soft brush and water to clean the cover if necessary.
- **Storage:** When not in use, clean the cover thoroughly, ensure it is completely dry, and fold it neatly. Store in a cool, dry place away from direct sunlight and pests.
- **Inspection:** Periodically inspect the cover for any signs of wear, tear, or damage to the straps and grommets. Repair any minor damage promptly to extend the cover's lifespan.

TROUBLESHOOTING

- **Cover not staying secure:** Ensure all ratchet straps are tightened properly and the drawstring is pulled snug. If using a larger cover on a smaller pool, ensure the excess material is evenly distributed and secured. Consider adding water bags on top of the cover for extra weight in very windy conditions.
- **Water pooling on top:** Verify that the cover is evenly distributed and taut. If your cover has a self-draining feature, ensure it is clear of debris and functioning correctly.

- **Tears or holes:** Small tears can often be repaired with a waterproof patch kit. For significant damage, replacement may be necessary.
