- **Lens:** High-quality optical glass for 1080P HD video.
- **IR LEDs:** Six built-in infrared LEDs for night vision (invisible to the human eye).
- **USB Port:** For charging and data transfer.
- **SD Card Slot:** For inserting a MicroSD card (required for recording).
- **Power Button:** To turn the camera on/off.
- **Mode Button:** To switch between different operating modes (e.g., video, motion detection).
- **Indicator Light:** Displays current status (e.g., charging, recording, motion detection).

5. SETUP

5.1 Charging the Camera

Before first use, fully charge the camera. Connect the camera to a USB power source (e.g., computer, wall adapter) using the provided USB cable. The indicator light will typically show a specific color (e.g., red) during charging and change or turn off when fully charged.

5.2 Inserting an SD Card

A MicroSD card (not included) is required to save recordings. Gently insert the MicroSD card into the SD card slot with the gold contacts facing down (or as indicated by a diagram on the camera, if available) until it clicks into place. To remove, press the card again until it springs out.

5.3 Powering On/Off

- **To Power On:** Press and hold the Power button for a few seconds until the indicator light illuminates.
- **To Power Off:** Press and hold the Power button for a few seconds until the indicator light turns off.

6. OPERATING MODES

6.1 Video Recording (1080P/720P)

After powering on, the camera typically defaults to a standby mode. Press the Mode button to cycle through available recording resolutions (e.g., 1080P, 720P). Once the desired resolution is selected (indicated by the indicator light), press the Power button briefly to start recording. Press the Power button again to stop recording and save the file.

6.2 Motion Detection

In standby mode, press the Mode button until the indicator light signifies motion detection mode. In this mode, the camera will automatically begin recording when motion is detected and stop when motion ceases, saving the footage to the SD card.

6.3 Night Vision

The camera is equipped with 6 IR LED lights for night vision. These lights activate automatically in low-light conditions, allowing the camera to capture clear images and videos even in darkness. The IR lights are invisible to the human eye and do not flicker.

Image 6.2: Visual representation of the camera's night vision capability, capturing details in low-light environments without visible illumination.

6.4 Loop Recording

The camera supports loop recording. When the SD card is full, the oldest files will be automatically overwritten by new recordings. This ensures continuous recording without manual intervention.

7. DATA TRANSFER AND PLAYBACK

To view recorded files, connect the camera to a computer using the USB cable. The camera will appear as a removable disk. You can then access the video files (typically in AVI format) and transfer them to your computer for playback. Alternatively, you can remove the MicroSD card and insert it into a card reader connected to your computer.

8. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera lens and body. Do not use liquid cleaners.
- **Storage:** Store the camera in a cool, dry place when not in use.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge it regularly.

9. TROUBLESHOOTING

- **Camera not turning on:**
 - Ensure the battery is fully charged.
 - Press and hold the Power button for a longer duration (5-7 seconds).
- **Cannot record:**
 - Verify that an SD card is properly inserted.
 - Check if the SD card is full; if so, transfer files or format the card (this will erase all data).
 - Ensure the SD card is formatted to FAT32.
- **Poor video quality:**
 - Clean the camera lens.
 - Ensure adequate lighting for non-night vision recording.
 - Confirm the camera is set to 1080P recording mode.
- **Camera not detected by computer:**
 - Try a different USB port or cable.
 - Ensure the camera is powered on when connected.
 - Try removing the SD card and using a dedicated card reader.
