SETUP

Initial Setup

1. Unpack all components and remove any packaging materials.
2. Wash the detachable jug, whisk, and lid with warm soapy water, then rinse thoroughly and dry. The jug is dishwasher safe.
3. Ensure the main unit (base) is placed on a dry, level, and stable surface.

4. Insert the magnetic whisk into the bottom of the jug.
5. Place the jug onto the main unit.
6. Plug the power cord into a standard electrical outlet.

OPERATING INSTRUCTIONS

The Raflow Milk Frother offers 5 distinct functions for various milk preparations.

Step-by-Step Operation

1. **Prepare Milk:** Pour milk into the detachable jug. Observe the MIN (150ml) and MAX (250ml for frothing,

350ml for heating) capacity markings to prevent overflow or burning.

- Select Function:** Press the power button on the main unit to cycle through the available modes:
 - **Warm Dense Foam:** Ideal for cappuccinos.
 - **Warm Airy Foam:** Perfect for lattes.
 - **Cold Foam:** For iced coffees and cold beverages.
 - **Warm Milk:** For heating milk without frothing.
 - **Hot Chocolate/Matcha:** Warms milk for these beverages.
- Start Frothing/Heating:** Once the desired mode is selected, the appliance will begin operation. The process typically takes 2-3 minutes.
- Automatic Shut-off:** The frother will automatically turn off once the milk reaches the optimal temperature and consistency.

5. **Pour and Enjoy:** Carefully remove the jug from the base using the handle and pour the frothed or warmed milk into your beverage.

Important Tips for Best Results

- Use fresh, cold whole milk (fat content $\geq 3\%$) for the creamiest foam.
- Do not reheat cooled milk.
- The milk should ONLY go through ONE frothing or heating cycle. Do not repeat frothing or heating more than once.

- Clean the milk frother after each use.

MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and longevity of your appliance.

Detachable Jug, Whisk, and Lid

1. Remove the whisk from the bottom of the jug.
2. The jug, whisk, and lid are dishwasher safe. Alternatively, wash them by hand with warm soapy water.
3. For hand washing, use a soft sponge to prevent damaging the non-stick coating. Avoid wire scrubbers.
4. Rinse thoroughly and wipe dry with a soft cloth.

TROUBLESHOOTING

Common Issues and Solutions

- **Frother does not turn on:** Ensure the power cord is securely plugged into a working outlet and the jug is correctly placed on the base.
- **Milk is not frothing or heating:** Check that the whisk is properly installed in the jug. Ensure milk levels are between the MIN and MAX frothing lines. Use fresh, cold milk with adequate fat content.
- **Milk overflows:** Do not exceed the MAX frothing line (250ml) when preparing frothed milk.
- **Milk tastes burnt:** Ensure milk levels are above the MIN line. The automatic shut-off feature should prevent burning, but always monitor the process.
