## MARTIN 000C Jr E StreetMaster

# Martin 000C Jr E StreetMaster Acoustic-Electric Guitar Instruction Manual

Model: 000C Jr E StreetMaster

Brand: MARTIN

## INTRODUCTION

The Martin 000C Jr E StreetMaster is a versatile acoustic-electric guitar designed for musicians seeking a compact, travel-friendly instrument without compromising on tone or playability. This manual provides essential information for setting up, operating, maintaining, and troubleshooting your guitar to ensure years of enjoyable music-making.

## Key Features:

- **000 Junior Body Size:** Offers balanced tone and comfortable feel in a compact, travel-friendly design with a cutaway for easy access to higher frets.
- **Solid Sapele Back & Sides:** Delivers warm, balanced tone with strong midrange and bright, airy trebles. Features a distressed satin finish.
- **Solid Sapele Top:** Provides a warm, complex tone with rich harmonics and focused midrange, enhanced by scalloped spruce X-bracing. Also features a distressed satin finish.
- **Performing Artist Neck:** Modern, slimmer shape for fast playing and smooth chord changes, with a 1 3/4" nut width and 24.9" scale length.
- **Junior Series:** Combines compact body with full scale length for comfortable feel and rich tone, crafted with all-solid tonewoods and built-in Martin E1 electronics.

## SETUP

---

### Unpacking and Initial Inspection

Carefully remove your guitar from its softshell case. Inspect the instrument for any signs of damage that may have occurred during shipping. Ensure all components are present and intact.

### Tuning Your Guitar

Your Martin 000C Jr E StreetMaster should be tuned to standard EADGB<sub>e</sub> tuning. Use a reliable electronic tuner for accuracy. Gently turn the tuning pegs to adjust the string tension until each string reaches its correct pitch.

Figure 2: Detail of the headstock and tuning pegs.

## Stringing Your Guitar

When replacing strings, use light gauge phosphor bronze strings for optimal tone and playability. Thread each string through its corresponding bridge pin hole, ensuring the ball end is securely seated. Wind the string around the tuning post, making sure to leave enough slack for a few wraps. Tune to pitch.

## OPERATING

---

## Playing the Acoustic Guitar

The 000 Junior body size and Performing Artist neck profile are designed for comfortable playing, whether you prefer fingerstyle or flatpicking. Experiment with different strumming patterns and picking techniques to explore the guitar's dynamic range and balanced tone.

Figure 3: Soundhole and bridge detail, highlighting the solid sapele top.

## Using the Martin E1 Electronics

Your guitar is equipped with Martin E1 electronics for amplified performance. Locate the controls on the upper bout of the guitar. These typically include volume, tone, and a built-in tuner. Connect a 1/4" mono jack cable from the guitar's output jack (located at the bottom strap button) to an amplifier or sound system.

- **Volume Control:** Adjusts the overall output level of the amplified sound.
- **Tone Control:** Shapes the tonal characteristics, allowing you to dial in brighter or warmer sounds.
- **Built-in Tuner:** Activate the tuner to quickly and accurately tune your guitar. The display will guide you to the correct pitch.

# LET'S GET TO *know* EACH OTHER

**MY MATCH:**  
*Someone who appreciates a well-worn vibe and values character over perfection.*

*Premium Faux Abalone Inlays & Gently Beveled Fingerboard Edges*

*Full 24.9" Scale Length*

*Martin E1 Electronics with Onboard Tuner*

## MAINTENANCE

### Cleaning Your Guitar

Regularly wipe down your guitar with a soft, lint-free cloth after each use to remove sweat and oils. For a deeper clean, use a guitar-specific polish or cleaner on the body and a fretboard conditioner on the fretboard. Avoid harsh chemicals that can damage the finish.

## Humidity Control

Acoustic guitars are sensitive to humidity changes. Maintain a relative humidity level between 45-55% to prevent warping, cracking, or other damage to the wood. Use a guitar humidifier in dry environments and a dehumidifier in overly humid conditions.

## String Replacement

Replace strings regularly, typically every 1-3 months depending on playing frequency, to maintain optimal tone and playability. Old strings can sound dull and be harder to keep in tune.

## TROUBLESHOOTING

- **Buzzing Strings:** Check string height (action) and neck relief. Minor adjustments can often resolve buzzing. If unsure, consult a qualified guitar technician.
- **Poor Intonation:** If notes played at the 12th fret are out of tune with open strings, the intonation may need adjustment. This typically requires professional setup.
- **No Sound from Electronics:** Ensure the 1/4" cable is fully inserted into both the guitar and amplifier. Check the battery in the Martin E1 system. Verify amplifier settings and volume levels.
- **Tuning Instability:** New strings may take time to stretch and settle. Ensure strings are properly wound on tuning posts. Extreme temperature or humidity changes can also affect tuning.

## SPECIFICATIONS

Feature	Detail
Item Weight	7 pounds
Package Dimensions	45 x 25 x 10 inches
ASIN	B0F4L2ZHTC
Item Model Number	11Y25000CJRESTREETMASTER
Back Material	Sapele
Body Material	Sapele
Color Name	Dark Mahogany Distressed
Connector Type	1/4" Mono Jack
Fretboard Material	FSC Certified Richlite
Guitar Pickup Configuration	Martin E1
Scale Length	24.9 Inches
String Material	Phosphor Bronze
Top Material	Sapele Wood

Neck Material Type	Select Hardwood
Number of Strings	6
Guitar Bridge System	Fixed
Material Type	Sapele, Select Hardwood
Size	000C Jr 14 Fret
Hand Orientation	Right
