K&F CONCEPT KF08.074JP

K&F CONCEPT 2-in-1 Compressed Air Duster & Vacuum Cleaner

Model: KF08.074JP - Instruction Manual

1. Introduction

The K&F CONCEPT KF08.074JP is a versatile 2-in-1 device designed for efficient cleaning. It functions as both a powerful compressed air duster and a vacuum cleaner, suitable for various applications including electronics, vehicles, and household items. This device features a high-speed brushless motor, multiple speed settings, dual LED lighting, and a long-lasting battery for extended use.

2. What's in the Box

Verify that all items are present in the package:

- Main Body of Air Blower
- Magnetic Nozzle (x1)
- Type-C USB Charging Cable
- Multi-Language Instruction Manual
- Spare Filter Element (x1)
- Multifunctional Brushes (x6)
- Flat Brush Nozzle (x1)
- Dust Collection Cup (x1)

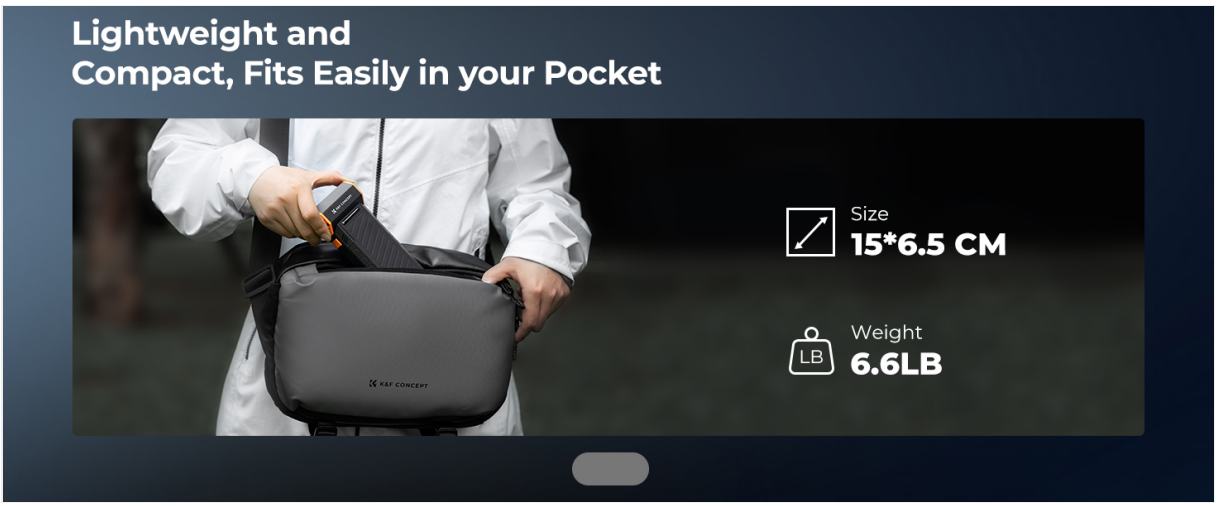

Image: All components included in the product package.

3. Setup

3.1 Attaching Nozzles

The device features a magnetic attachment design for quick and secure nozzle installation.

1. For blowing functionality, align the magnetic nozzle with the front outlet of the main body and allow it to snap into place.
2. For vacuum functionality, remove the blowing nozzle. Attach the dust collection cup to the rear air intake of the main body. Secure the desired brush mouthpiece to the dust collection cup.

3.2 Charging the Device

Before first use, fully charge the device. Connect the provided Type-C USB charging cable to the charging port on the device and to a compatible USB power source (e.g., wall adapter, car charger, PC USB port, mobile power bank).

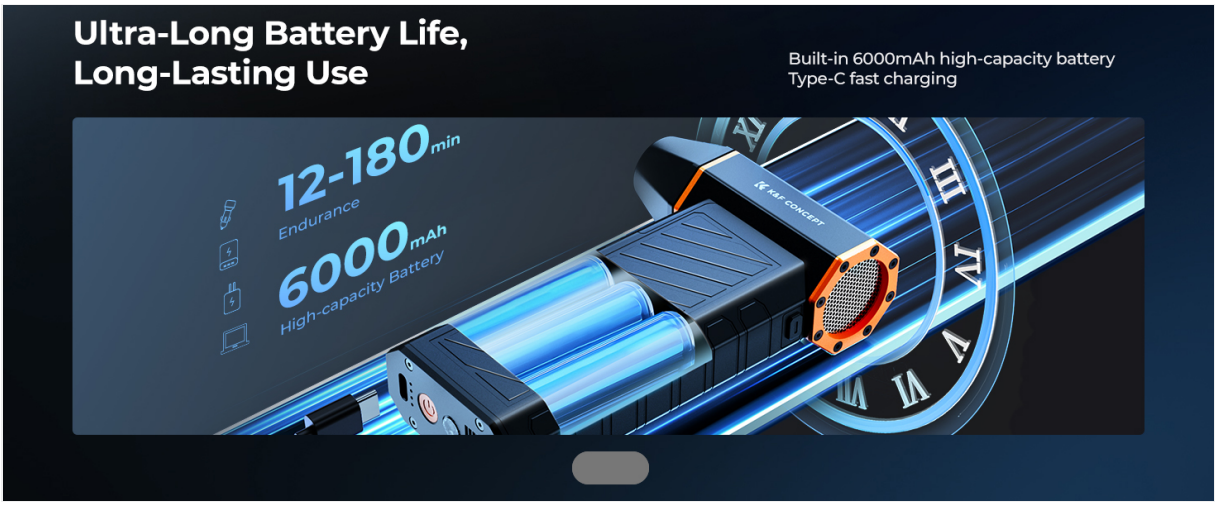

Image: Various USB-C fast charging methods for the device.

4. Operating Instructions

4.1 Power On/Off

To power on the device, press and hold the bottom switch for 3 seconds. The LED indicators will light up. To power off, press and hold the bottom switch again.

4.2 Blower Mode

With the magnetic nozzle attached, click the front switch to activate the air blowing function. The device features a brushless motor with a maximum rotational speed of 300,000 RPM, providing a top wind speed of 150m/s and a wind force of up to 250G.

Image: The air duster highlighting its 300,000 RPM motor and three-speed regulation.

4.3 Vacuum Mode

To use as a vacuum cleaner, ensure the blowing nozzle is removed and the dust collection cup with a brush mouthpiece is attached to the rear air intake. Press the front switch to activate suction. This mode is effective for collecting dust and debris.

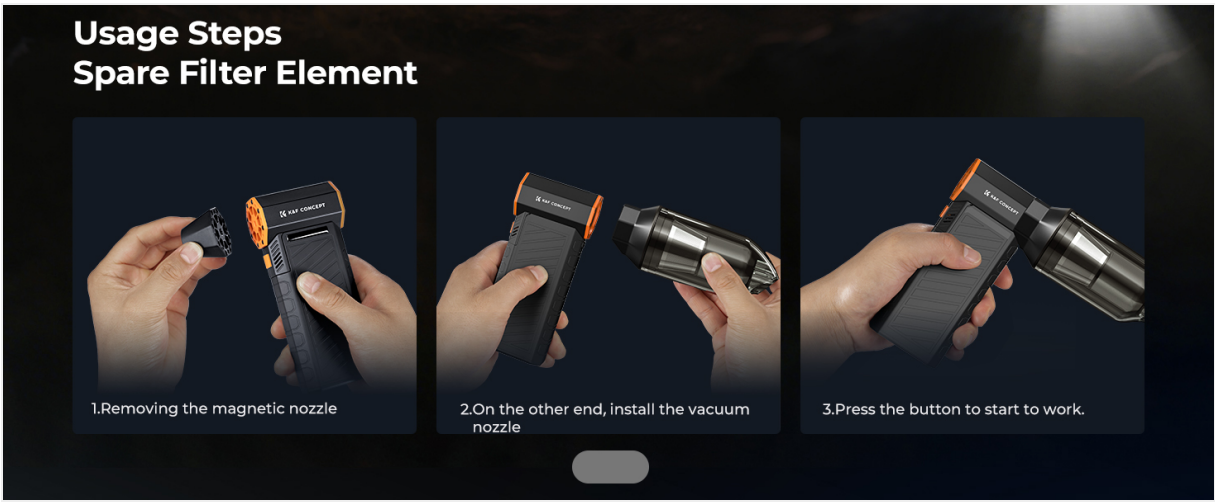

Image: Step-by-step guide for using the device in both blower and vacuum modes.

4.4 Speed Control

The device offers 3 adjustable gear speeds. Press the front switch repeatedly to cycle through Low, Medium, and High speeds. The LED indicators will change color to reflect the current speed setting (e.g., red for low, green for medium, blue for high).

Image: Visual representation of the three-speed modulation and their applications.

4.5 LED Lighting

The device is equipped with dual LED lights:

- **Coaxial Front Light:** Illuminates debris and paths in dark environments.
- **Base LED:** Functions as a night light and an SOS signal for emergencies.

To activate the continuous illumination mode, briefly press the bottom switch. To activate the SOS strobe mode, press the bottom switch twice. Do not look directly into the lights.

4.6 Using Accessories

The device comes with 6 multifunctional cleaning brushes and other nozzles to suit various cleaning scenarios, including:

- Car air vent cleaning
- Sofa cleaning
- Air conditioner cleaning
- Window crack cleaning
- Camera cleaning
- Keyboard cleaning

5. Maintenance

5.1 Cleaning the Dust Collection Cup and Filter

Regularly empty the dust collection cup and clean the filter element to maintain optimal suction performance. The filter element can be removed and washed with water. Ensure it is completely dry before reinserting.

5.2 Battery Care

The device is powered by a 6000mAh high-capacity battery. For optimal battery life, avoid fully discharging

the device frequently. Recharge using the provided Type-C cable. The intelligent thermal protection feature automatically shuts off high-speed mode after 10 minutes of continuous use to prevent motor overheating.

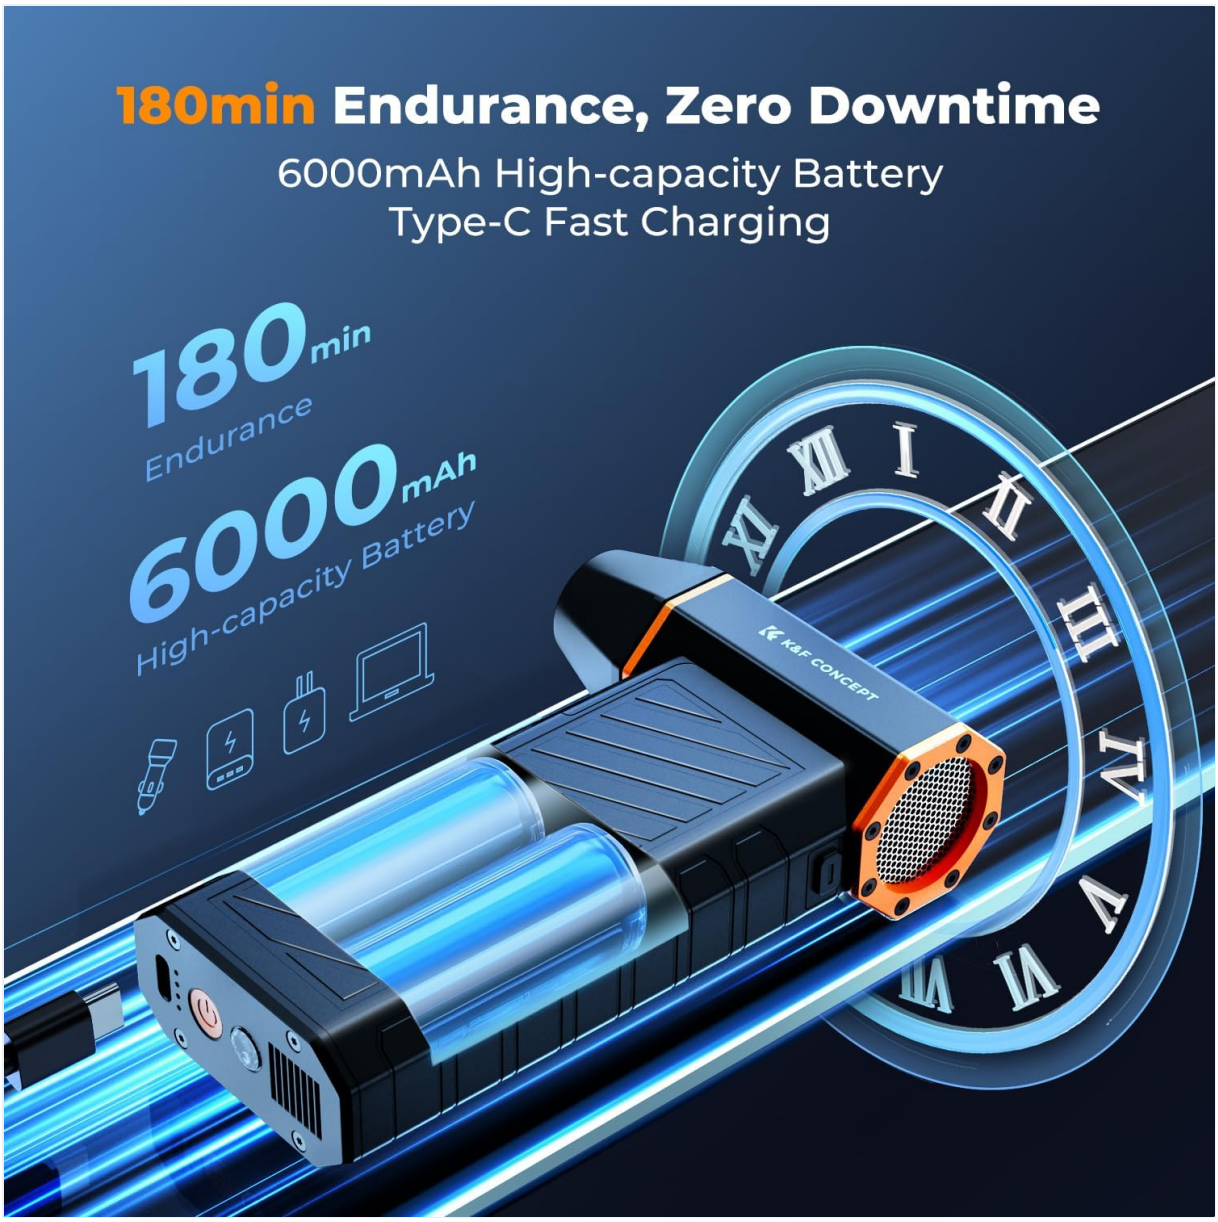

Image: The device's 6000mAh battery providing up to 180 minutes of endurance.

6. Troubleshooting

- **Device not turning on:** Ensure the device is charged. Press and hold the bottom switch for 3 seconds to power on.
- **Weak airflow/suction:** Check if the dust collection cup is full or if the filter element is clogged. Clean as described in the Maintenance section. Ensure nozzles are securely attached.
- **LED lights not working:** Check if the device is powered on. Briefly press the bottom switch to cycle through light modes.
- **Device shuts off unexpectedly:** The device has intelligent thermal protection. If used continuously on high speed for over 10 minutes, it may shut off to prevent overheating. Allow it to cool down before resuming use.

7. Specifications

Model Number	KF08.074JP
Motor Type	Three-phase Brushless Motor
Maximum Rotational Speed	300,000 RPM
Top Wind Speed	150 m/s
Wind Force	Up to 250G
Speed Gears	3 (Low, Medium, High)
Battery Capacity	6000mAh Lithium Ion
Runtime	Up to 180 minutes
Charging Port	USB Type-C
Product Dimensions	12 x 10 x 2 cm
Item Weight	0.15 Kilograms
Manufacturer	Shenzhen Zhuoer Photograph

8. Safety Information

- Do not point the air duster directly at eyes, skin, or sensitive body parts.
- Keep the device away from water and moisture.
- Store in a cool, dry place, out of reach of children.
- Do not attempt to disassemble or modify the device.
- Use only the provided charging cable and compatible power sources.
- Avoid blocking the air intake or outlet during operation.

9. Warranty and Support

This product does not include a warranty as per the provided product information. For any product inquiries or support, please refer to the contact information provided by your retailer or the K&F CONCEPT official website.
