SMSRECEIVE IF01

SMSRECEIVE Air Tracker Tag IF01 User Manual

Model: IF01

Introduction

The SMSRECEIVE Air Tracker Tag IF01 is a smart Bluetooth tracker designed to help you locate your personal items using the Apple Find My network. This device is compatible exclusively with iOS, iPadOS, and macOS devices. It offers features such as nearby finding, distant location tracking, left-behind reminders, and a lost mode to help recover misplaced items.

Image: Overview of SMSRECEIVE Air Tracker Tag features, highlighting its integration with Apple Find My, global tracking capabilities, user-replaceable battery, no additional app requirement, IP67 water resistance, and audible alert function.

Setup Instructions

Follow these steps to set up your SMSRECEIVE Air Tracker Tag with your Apple device:

1. **1. Turn on Bluetooth and Find My:** Ensure Bluetooth is enabled on your iOS device and that the Find My app is active.

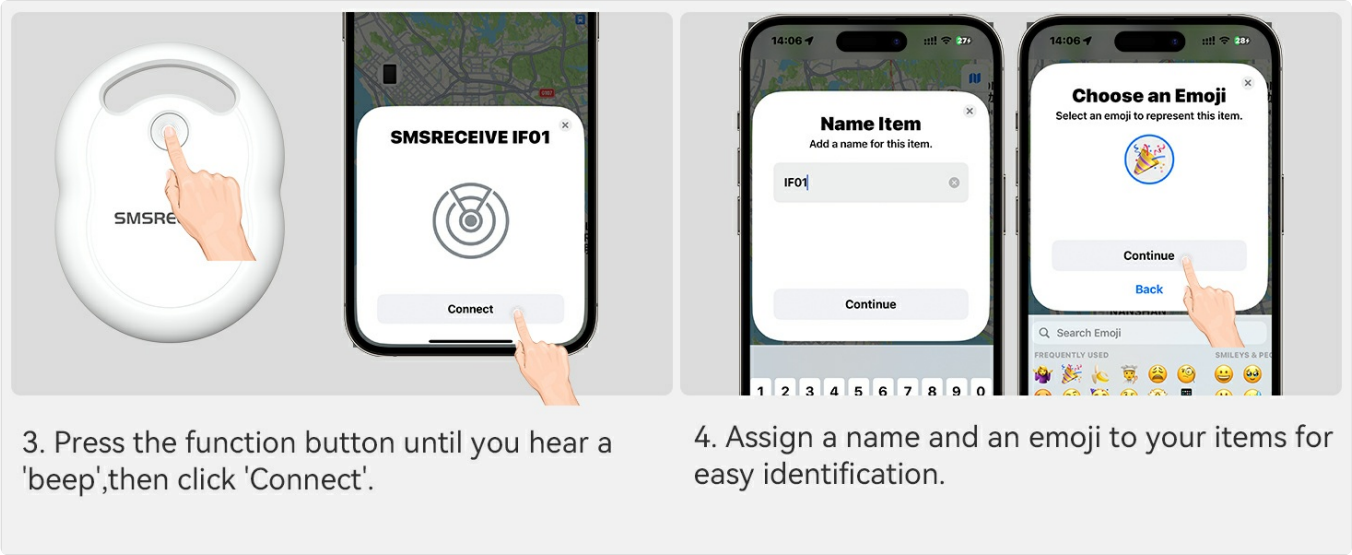

Image: Step 1 - Activating Bluetooth and the Find My feature on an iOS device.

2. **2. Add New Item in Find My:** Open the Find My app, navigate to the 'Items' tab, tap 'Add Item', then select 'Other Supported Item'.

Image: Step 2 - Navigating the Find My app to add a new, unsupported item.

3. **3. Connect the Tracker:** Press the function button on your SMSRECEIVE Air Tracker Tag until you hear a 'beep'. Then, on your device, click 'Connect' in the Find My app.

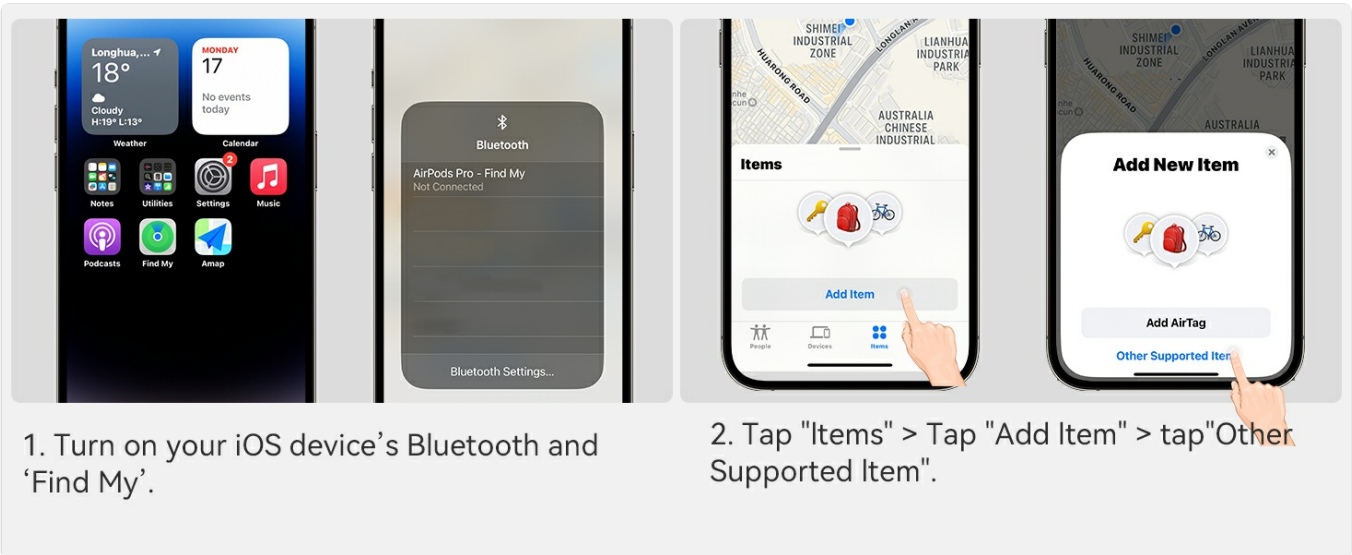

Image: Step 3 - Initiating connection by pressing the tracker's button and confirming in the app.

4. **4. Name and Customize:** Assign a name and an emoji to your tracker for easy identification within the Find My app.

Image: Step 4 - Personalizing the tracker's name and icon within the Find My application.

Operating Instructions

Finding Items Nearby

When your Air Tracker Tag is within Bluetooth range, you can use the Find My app to make it play a sound. Tap the 'Play Sound' button in the app, and the device will emit a 'di di di' sound, guiding you to its location. You can also ask Siri to find it for you.

Image: Using the Find My app to activate an audible alert on the tracker for nearby item location.

Finding Items Far Away

If your Air Tracker Tag is outside of Bluetooth range, the Find My app will display its most recent known location on a map. This utilizes Apple's vast network of devices to anonymously relay location data, helping you track your item globally.

Image: Locating the tracker's last recorded position on a map when it is out of Bluetooth range.

Left Behind Reminders

The Air Tracker Tag can notify you if you leave an item behind. If the tracker disconnects from your Apple device's Bluetooth connection, you will receive an instant notification on your device, prompting you to retrieve your item.

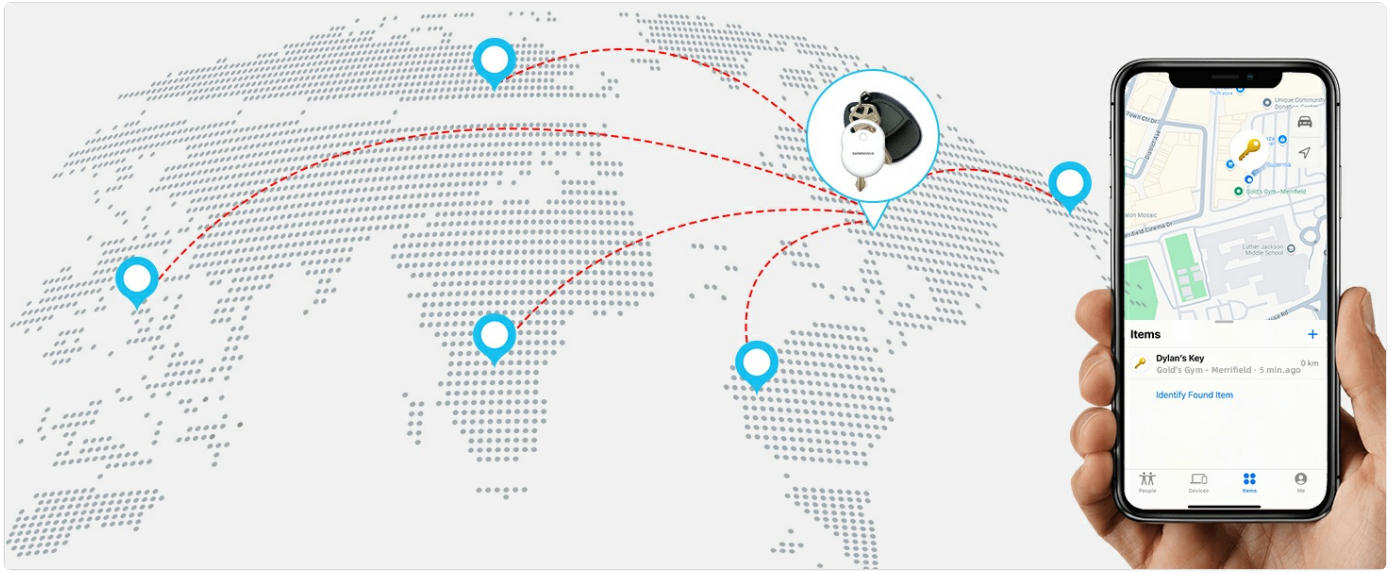

Image: An example of a 'Left Behind' notification appearing on an iPhone screen.

Lost Mode

If an item with your tracker is lost, you can enable 'Lost Mode' in the Find My app. This allows you to leave your contact information (email or phone number) on the tracker. If someone finds your item, they can use their Find My app to view your contact details and help return it. Once linked to your Apple ID, the tracker cannot be paired by anyone else.

Share This Item

You can share the location of your Air Tracker Tag with up to 5 other people through the Find My app. This allows multiple users to track the item on a map. Note that tracking notifications will be muted for shared users when the item is nearby. This feature requires iOS 17 or later.

Image: The 'Share This Item' interface within the Find My app, demonstrating how to share tracker access.

Maintenance

Battery Replacement

The SMSRECEIVE Air Tracker Tag uses a replaceable CR2030 coin cell battery. To replace the battery, carefully open the tracker casing, remove the old battery, and insert a new CR2030 battery with the positive (+) side facing up. Close the casing securely.

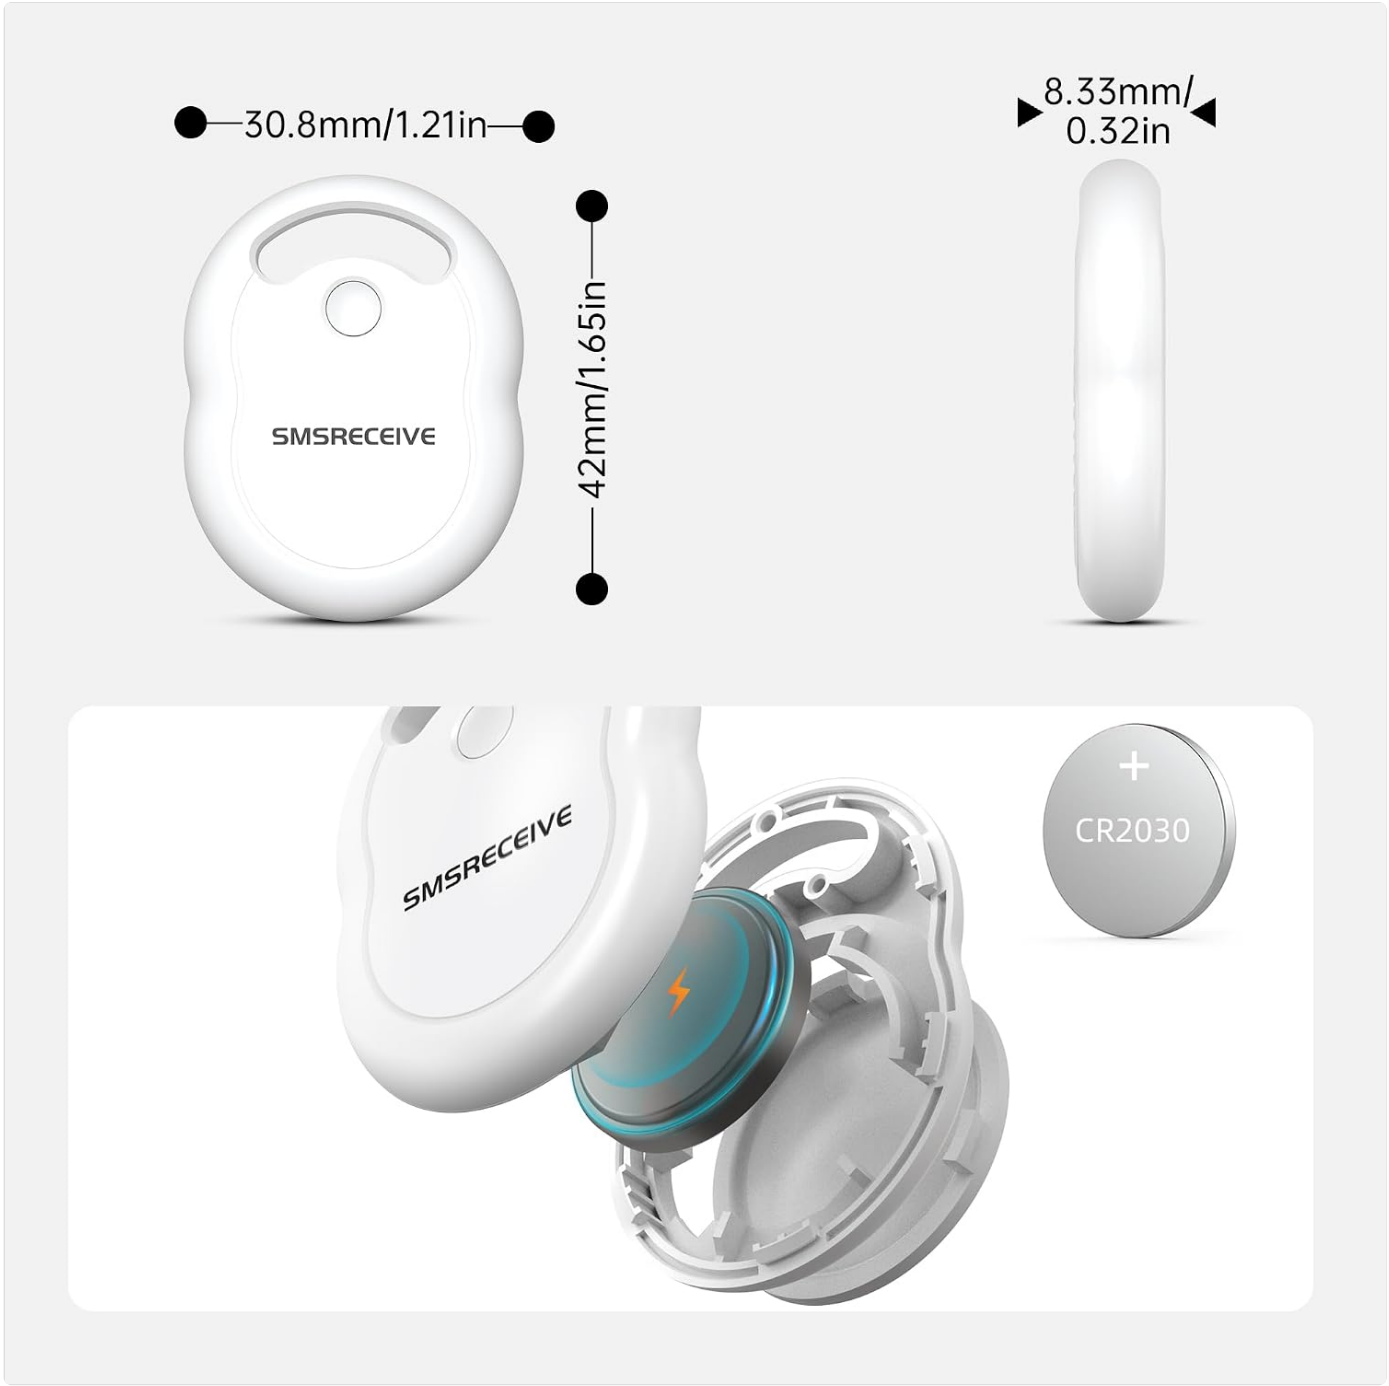

Image: Visual guide for replacing the CR2030 battery and product dimensions.

Cleaning and Care

The tracker is IP67 water resistant, meaning it can withstand submersion in up to 1 meter of water for 30 minutes. However, it is not recommended for prolonged submersion. To clean the device, wipe it with a soft, damp cloth. Avoid using harsh chemicals or abrasive materials.

Troubleshooting

- **Device not connecting to Find My:**
  - Ensure Bluetooth is enabled on your iOS device.
  - Verify that the Find My app has permission to use Bluetooth and location services.
  - Check if the tracker's battery needs replacement.
  - Try restarting your iOS device and the tracker.

- **Sound not playing when trying to find nearby:**
  - Confirm the tracker is within Bluetooth range of your device.
  - Check the battery level of the tracker.
  - Ensure your iOS device's volume is not muted or too low.
- **Location not updating or inaccurate:**
  - Ensure your iOS device has an active internet connection (Wi-Fi or cellular data).
  - The accuracy of location updates depends on the density of Apple devices in the vicinity. In remote areas, updates may be less frequent.
  - Check if the tracker's battery is low.

Specifications

Model Number	SMSRECEIVE IF01
Brand	SMSRECEIVE
Product Dimensions	0.1 x 0.1 x 0.1 cm
