

## FEELNEEDY 4073B

# FEELNEEDY Automatic Litter Box Waste Bags (60 Count) - Model 4073B Instruction Manual

## INTRODUCTION

This manual provides instructions for the proper use and maintenance of FEELNEEDY Automatic Litter Box Waste Bags, Model 4073B. These bags are designed for use with FEELNEEDY self-cleaning litter boxes and other compatible automatic waste receptacles.

## PRODUCT FEATURES

- **Quantity:** Each package contains 60 waste bags, supplied in 3 rolls of 20 bags each.
- **Compatibility:** Specifically designed for FEELNEEDY self-cleaning litter boxes (e.g., S20-A/4073B models) and suitable for universal automatic waste bins.
- **Dimensions:** Each bag measures 55cm x 28cm, offering a large capacity for waste collection.
- **Drawstring Design:** Features an integrated drawstring for easy sealing and disposal, aiding in odor containment.
- **Durability:** Constructed from high-density polyethylene, these bags are thick, resistant to tearing, and leak-proof.

## SETUP AND INSTALLATION

Follow these steps to properly install a new waste bag in your automatic litter box:

1. **Prepare the Litter Box:** Ensure your automatic litter box's waste compartment is empty and clean.
2. **Unroll a Bag:** Take one roll of bags and carefully tear off a single bag along the perforation.
3. **Open the Bag:** Unfold the bag and open its mouth.
4. **Insert into Compartment:** Place the open bag into the waste compartment of your automatic litter box. Ensure the edges of the bag are securely fitted around the rim of the compartment to prevent waste from falling outside the bag.
5. **Secure the Bag:** If your litter box has a specific mechanism for securing the bag (e.g., clips or a frame), ensure the bag is properly attached. The drawstring should be accessible for later sealing.

## OPERATING INSTRUCTIONS (WASTE DISPOSAL)

When the waste bag is full or requires changing:

1. **Access Waste Compartment:** Open the waste compartment of your automatic litter box.
2. **Pull Drawstrings:** Locate the drawstrings on the bag. Pull them firmly to close the bag securely.
3. **Remove Bag:** Carefully lift the sealed bag out of the compartment.
4. **Dispose:** Dispose of the sealed bag in an appropriate outdoor waste receptacle. The drawstring design helps contain odors during transport.

## 10-14 jours sans pelle

## MAINTENANCE

- **Regular Replacement:** Replace the waste bag regularly, typically every 10-14 days, or as needed based on the number of cats and their usage.
- **Inspect for Damage:** Before installation, inspect each bag for any tears or defects to ensure leak-proof performance.
- **Storage:** Store unused rolls of bags in a cool, dry place away from direct sunlight and out of reach of pets.

## TROUBLESHOOTING

---

- **Bag Tears During Installation:** Ensure the bag is not snagged on any sharp edges within the litter box compartment. Handle bags carefully during placement.
- **Bag Does Not Fit Properly:** Verify that you are using the correct size bags for your specific automatic litter box model. These bags are designed for FEELNEEDY S20-A/4073B models.
- **Odor Leakage:** Ensure the drawstring is pulled tightly and securely sealed before disposal. Replace bags frequently to prevent odor buildup.
