Maintenance

- **Cleaning:** Wipe the surface with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as they may damage the finish.
- **Dusting:** Regularly dust the table with a dry, soft cloth to prevent buildup.
- **Inspection:** Periodically check all screws and mounting hardware to ensure they remain tight and secure. Retighten if necessary.
- **Avoid Moisture:** Do not expose the table to excessive moisture or direct sunlight for prolonged periods, as this can cause warping or fading.

Troubleshooting

- **Table is not level:** Ensure the wall marks were made using a level. Adjust the mounting screws slightly or re-drill if necessary to achieve a perfectly level installation.
- **Table feels wobbly:** Check all mounting screws and bracket attachment screws. Ensure they are fully tightened. Verify that the wall anchors are securely installed and appropriate for your wall type.
- **Difficulty with screw insertion:** Ensure pilot holes are drilled to the correct size for the expansion

screws. Do not force screws, as this can damage the material or hardware.
