LUXPRO XP920

LUXPRO XP920 Rechargeable Tactical Flashlight User Manual

Model: XP920 | Brand: LUXPRO

INTRODUCTION

The LUXPRO XP920 Rechargeable Tactical Flashlight is engineered for reliability and powerful illumination in various conditions. Designed with advanced LED technology, it delivers up to 1000 lumens of ultra-bright light, making it suitable for home use, vehicle emergencies, camping, hiking, and other outdoor activities. Its compact size, rugged durability, and versatile lighting modes ensure dependable performance when it matters most.

Figure 1: The LUXPRO XP920 Tactical Flashlight alongside its rechargeable battery, illustrating its compact design and charging capability.

SETUP

The XP920 flashlight is powered by a rechargeable AA battery, which is included. Before first use, or if the battery is depleted, it must be charged.

Battery Charging:

1. Unscrew the tail cap of the flashlight to access the battery compartment.
2. Remove the included rechargeable AA battery.
3. Locate the USB-C charging port directly on the battery.
4. Connect a standard USB-C cable (not included) to the battery's charging port and plug the other end into a compatible USB power source (e.g., wall adapter, computer USB port).

5. The battery's indicator light will show charging status (e.g., red for charging, green for fully charged).
6. Once fully charged, disconnect the cable and reinsert the battery into the flashlight with the positive (+) end facing towards the head of the flashlight.
7. Securely screw the tail cap back on.

RECHARGABLE Battery

OPERATING INSTRUCTIONS

The XP920 features a soft press tactical switch and a mode selection dial for intuitive control.

Power On/Off and Momentary On:

- To turn the flashlight ON, fully press the tactical switch located at the tail end until it clicks.
- To turn the flashlight OFF, fully press the tactical switch again until it clicks.
- For momentary illumination, lightly press and hold the tactical switch without clicking. Release to turn off.

Mode Selection:

The XP920 offers multiple lighting modes. These modes are selected using the rotating dial near the head of the flashlight.

- **High Mode:** Provides maximum brightness (1000 lumens) for extensive illumination.
- **Low Mode:** Offers reduced brightness (20 lumens) for extended runtime (up to 66 hours) and close-range tasks.
- **Strobe Mode:** A flashing light for signaling or disorienting.

Rotate the dial to cycle through the available modes. The flashlight will remain in the selected mode until the dial is adjusted.

MODE SELECTION DIAL

Quickly switch between modes with a simple turn of the dial. Instantly select the mode you need, improving efficiency and streamlining the process to achieve your desired results.

Figure 3: Detail of the flashlight's head, highlighting the intuitive mode selection dial for quick adjustments.

Carrying and Accessibility:

The integrated heavy-duty clip allows for convenient attachment to belts, pockets, or gear, ensuring the flashlight is always within reach.

Figure 4: The patented TackGrip surface provides a secure and comfortable hold, even in challenging conditions.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your LUXPRO XP920 flashlight.

- **Cleaning:** Wipe the flashlight body with a soft, damp cloth. Avoid abrasive cleaners or solvents.
- **Battery Care:** Recharge the battery regularly, even if not in frequent use, to maintain its health. Store the flashlight with a partially charged battery if storing for extended periods.
- **O-Rings:** Periodically inspect the O-rings (seals) for any signs of wear or damage. Apply a thin layer of silicone grease to keep them lubricated and maintain the waterproof seal.
- **Storage:** Store the flashlight in a cool, dry place away from direct sunlight and extreme temperatures.

Durability Features:

The XP920 is built with robust materials to withstand demanding environments.

- **Aircraft-Grade Aluminum:** The body is constructed from durable aircraft-grade aluminum, offering outstanding impact resistance.
- **IPX6 Water Resistance:** Rated IPX6, this flashlight is protected against powerful water jets, making it suitable for use in rainstorms or wet conditions.

Figure 5: The flashlight's robust aircraft-grade aluminum construction ensures durability and resilience.

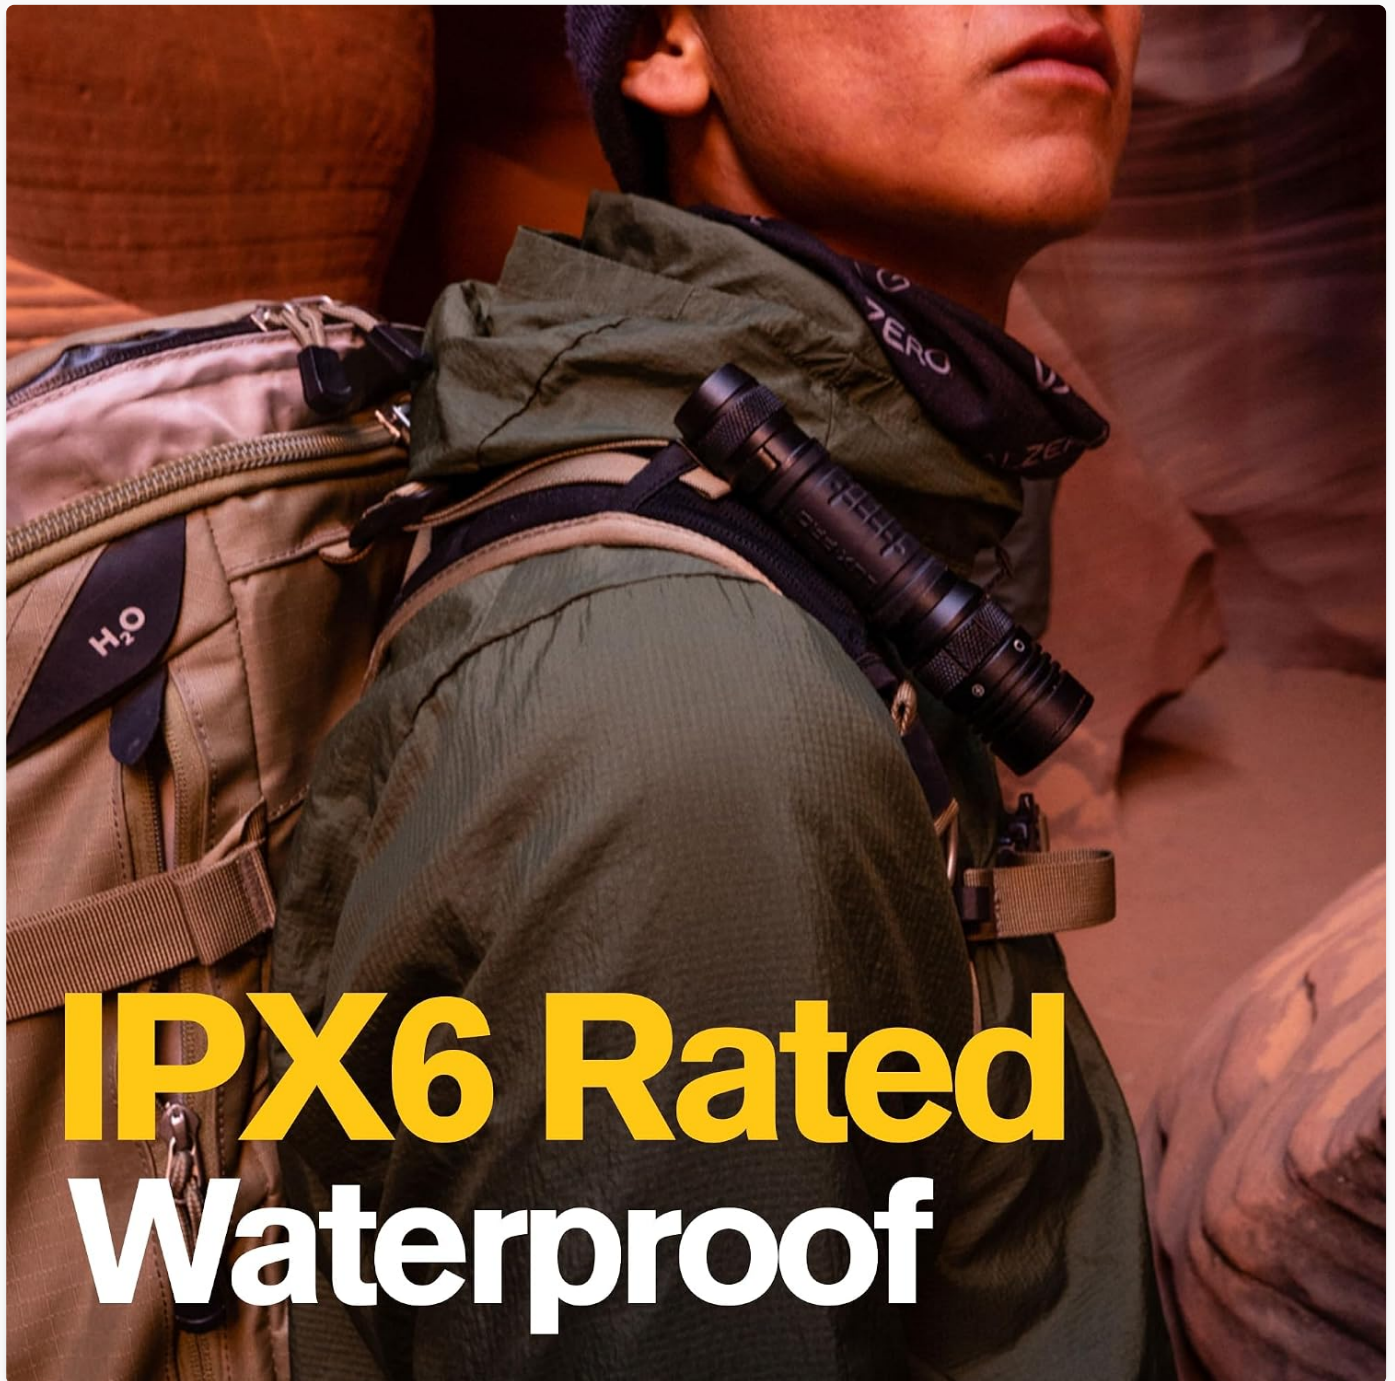

Figure 6: The IPX6 water resistance rating confirms the flashlight's ability to withstand significant water exposure.

TROUBLESHOOTING

If you encounter issues with your XP920 flashlight, try the following steps:

- **Flashlight Not Turning On:**

- Ensure the battery is fully charged.
- Check if the battery is inserted correctly with the positive (+) end facing the head.
- Verify that the tail cap is screwed on tightly, as a loose connection can prevent operation.

- **Dim Light or Short Runtime:**

- Recharge the battery fully.
- The battery may be nearing the end of its lifespan and might need replacement.

- **Mode Selection Issues:**

- Ensure the mode selection dial is clean and free of debris.
- Rotate the dial firmly to ensure it clicks into place for each mode.

For persistent issues not resolved by these steps, please contact LUXPRO customer support.

SPECIFICATIONS

Feature	Detail
Brand	LUXPRO
Model Number	XP920
Brightness	Up to 1000 Lumens (High Mode)
Light Source Type	LED
Beam Distance	Up to 263 Meters
Runtime	3 hours (High Mode), 66 hours (Low Mode)
Power Source	Battery Powered (Rechargeable Lithium Ion AA)
Material	Aircraft-Grade Aluminum, Plastic
Water Resistance	IPX6 Waterproof Rating
Dimensions (D x W x H)	1.18" x 1.18" x 5.5"
Item Weight	5.8 ounces (0.36 Pounds)
