

ATOTOMOVE CB4B

ATOTOMOVE Wireless Magic AI Box CarPlay with OBD2 Scanner

MODEL: CB4B (4+32G)

Introduction

The ATOTOMOVE Wireless Magic AI Box CB4B is designed to upgrade your car's wired CarPlay or Android Auto system to a wireless experience, while also integrating an Android OS for enhanced in-car entertainment and utility. This device offers seamless connectivity, access to streaming applications, and advanced diagnostic capabilities for your vehicle.

Setup

The CB4B is designed for plug-and-play installation. Ensure your original car stereo supports wired CarPlay/Android Auto via USB (USB-A or USB-C). If your USB port does not provide sufficient power, utilize the included Y-cable to draw extra power.

1. Connect the CB4B device to your car's USB port using the appropriate cable (USB-C to USB-C or USB-C to USB-A).
2. Observe the indicator lights on the box: the inner green light confirms proper power connection.
3. The outer green or blue light flashing slowly indicates that the CarPlay (green) or Android Auto (blue) channel is connecting.
4. If the connection fails, press and hold the switch button for 2-5 seconds to toggle between CarPlay and Android Auto modes. The outer light will flash rapidly during the channel change.
5. Once connected, your car's display will show the CB4B interface.

Video: Demonstration of connecting the CB6 CarPlay AI Box (similar to CB4B) to a car's USB port and accessing its Android system. This video shows the physical connection process.

Operating Instructions

Wireless CarPlay/Android Auto

Once connected, the CB4B automatically enables wireless CarPlay and wireless Android Auto, allowing seamless access to navigation, music, calls, and messages without physical cable connections to your phone.

Android OS Functionality

The CB4B operates on an Android OS with 4GB RAM and 32GB storage. You can expand storage up to 128GB using a TF card (not included). Download featured applications from FindApps (APK downloader). Note that additional apps beyond those featured cannot be installed.

Experience In-Car IoT

<p>Bluetooth OBD II</p>  <p>AC-4450 On-Board OBD II Diagnostic Scanner (included)</p>	<p>Car Ambiance Control</p>  <p>CI-FLT01 Interior Footwell Lights (not included)</p>	 <p>More devices to explore...</p>

Dual WiFi & OTA Updates

Maintain a stable internet connection for both CarPlay/Android Auto and other apps simultaneously. The device supports over-the-air (OTA) firmware updates to keep your system current.

Features

Bluetooth OBD II Scanner

An AC-4450 Bluetooth OBD II Car Diagnostic Scanner is included. Pair it effortlessly to view On-Board Diagnostics (OBD II) information directly on your car's screen.

Troubleshooting

Connection Issue Check

- Ensure your original car stereo supports wired CarPlay/Android Auto (CP/AA).
- Check the indicator lights on the box: inner green light means power is connected. Outer green (CarPlay) or blue (Android Auto) light flashing slowly indicates the CP/AA channel is connecting.
- If the connection fails, try switching between CP and AA modes by pressing and holding the switch button for 2-5 seconds. The outer light will flash rapidly to show the channel change.

Specifications

- **Product Dimensions:** 5.91 x 3.94 x 1.57 inches
- **Item Weight:** 9.6 ounces
- **ASIN:** B0F52CD468
- **Item Model Number:** CB4B-BK-S01
- **Compatible Devices:** Smartphone
- **Connector Type:** Micro USB
- **Color:** Black
- **Manufacturer:** ATOTOMOVE

What's in the Box

- CB4B-BK-S01 Wireless Carplay Android Auto Smart Ai Box with OBD2 Scanner
