### **INTRODUCTION**

---

Thank you for choosing Beautyrest Luxury Goose Feathers Soft Pillows. This manual provides essential information for the proper setup, use, and care of your new pillows to ensure optimal comfort and longevity. These King-sized pillows (20" x 36") are designed to provide supportive and fluffy comfort for various sleeping positions.

## SETUP AND INITIAL PREPARATION

---

Your Beautyrest pillows arrive vacuum-packed to reduce shipping volume. Follow these steps to prepare them for first use:

1. **Unpack:** Carefully remove the pillows from their vacuum-sealed packaging.
2. **Pat and Fluff:** Gently pat and fluff each pillow by hand. This helps to redistribute the feather and down fill and introduce air into the pillow.
3. **Air Out:** Allow the pillows to air out in a well-ventilated area for a few hours. This helps them regain their full loft and dissipate any natural scent from the feathers.

## USAGE GUIDELINES

---

These pillows are designed for use as bed pillows, offering plush support for your head and neck. They are suitable for various sleeping positions, including side and back sleepers.

- **Pillowcases:** Always use a pillowcase to protect your pillow from dirt, oils, and moisture.
- **Positioning:** Adjust the pillow to comfortably support the natural curve of your neck and head, aligning your spine.

# Comfortable and Skin-friendly, suitable for any sleeping position.

## MAINTENANCE AND CARE

---

Proper care will extend the life and comfort of your Beautyrest pillows.

- **Daily Fluffing:** Gently fluff your pillows daily to maintain their loft and even out the fill.
- **Cleaning:** For best results and extended use, **dry cleaning is recommended**. Refer to the care label on the pillow for specific instructions.
- **Protection:** The 500 thread count cotton cover features an added inner layer of polyester and a double-layer percale design to keep feathers securely inside and prevent poking.

## TROUBLESHOOTING

Here are solutions to common concerns you might encounter:

Issue	Solution
Pillow appears flat after unpacking.	Pillows are vacuum-packed. Gently pat and fluff the pillows by hand and allow them to air out for several hours to restore full loft.
Feathers are poking through the cover.	The pillows feature a double-layer percale design with an inner polyester layer specifically to prevent feathers from poking through. If this occurs, ensure the pillowcase is properly fitted and consider using an additional pillow protector.

Issue	Solution
Pillow has a slight odor.	This is normal for natural feather and down products. Air out the pillows in a well-ventilated area for 24-48 hours. The odor should dissipate.
