

for iRobot ROOMBA Plus 405 Combo / 505 Combo Robot

User Manual for Hepa Filter Accessories

Brand: Generic

Model Compatibility: iRobot ROOMBA Plus 405 Combo / 505 Combo Robot Vacuum Cleaner

1. PRODUCT OVERVIEW

These replacement HEPA filters are designed to maintain the optimal performance of your iRobot ROOMBA Plus 405 Combo or 505 Combo Robot Vacuum Cleaner. This package includes 4 pieces of high-quality filters, crucial for capturing fine dust and allergens, ensuring cleaner air in your home.

3. KEY FEATURES AND BENEFITS

- **High-Quality Filtration:** Made from durable materials, these filters effectively capture 99.98% of particles as small as 0.3 microns, including dust, pollen, pet dander, and other common allergens.
- **Air Quality Improvement:** By filtering dust and exhaust fumes, they protect your vacuum motor and significantly reduce the amount of dust and allergens released into the air you breathe.
- **Washable and Reusable:** Designed for eco-friendliness and convenience, these filters can be washed and reused, extending their lifespan and reducing waste.

The Hepa Filter removes

99.98%
of fine dust

4. INSTALLATION GUIDE

Replacing your HEPA filter is a simple process that ensures your robot vacuum continues to operate efficiently.

1. **Step 1: Access the Dust Cup:** Gently remove the dust cup from your iRobot ROOMBA Plus vacuum cleaner. Refer to your vacuum's user manual for specific instructions on dust cup removal if needed.
2. **Step 2: Remove Old Filter:** Locate the existing filter within the dust cup. Rotate or unclip the old filter to remove it. Dispose of the old filter responsibly.
3. **Step 3: Insert New Filter:** Carefully place the new HEPA filter into the designated slot in the dust cup. Ensure it is securely seated and properly aligned.
4. **Step 4: Reinstall Dust Cup:** Reattach the dust cup to your robot vacuum cleaner, ensuring it clicks firmly into place.

5. MAINTENANCE AND REPLACEMENT

Regular maintenance of your HEPA filters ensures optimal performance of your robot vacuum and maintains indoor air quality.

- **Cleaning:** As these filters are washable, gently rinse them under running water to remove accumulated dust and debris. Allow them to air dry completely before reinstalling to prevent mold or damage to the vacuum.
- **Replacement Frequency:** It is recommended to replace the HEPA filters every 2 to 3 months. This frequency may vary depending on your usage habits and the environment (e.g., presence of pets, high dust levels). Regular replacement ensures peak filtration performance.

7. TROUBLESHOOTING

If you encounter any issues with your replacement filters, consider the following common points:

- **Reduced Suction:** Ensure the filter is clean and dry. A clogged or wet filter can significantly reduce vacuum suction. Check for proper installation and sealing within the dust cup.
- **Unusual Noises:** Verify the filter is correctly seated and not obstructing any moving parts within the dust cup or vacuum.
- **Dust Leakage:** Confirm the filter is installed correctly and the dust cup is fully sealed.

For persistent issues, please refer to the "Warranty and Support" section for contact information.

8. WARRANTY AND SUPPORT

We value your shopping experience and are committed to providing the best service. If you have any questions, concerns, or require assistance with your HEPA filters, please do not hesitate to contact us.

Our customer service team aims to reply within 24 hours.
