4. SETUP

4.1 Power Connection

1. Connect the provided power cord to the projector's power input.
2. Plug the other end of the power cord into a suitable electrical outlet.

4.2 Placement

Position the projector on a stable, flat surface. The 270° rotatable stand allows for flexible projection angles, including wall and ceiling projection.

4.3 Initial Power On

1. Press the power button on the projector or the remote control to turn on the device.

2. The projector will boot up and display the main interface (SoomfonOS).

5. OPERATING INSTRUCTIONS

5.1 Focus Adjustment

Adjust the image clarity using the F+ and F- buttons on the remote control. This is a manual adjustment.

5.2 Keystone Correction

The projector features automatic keystone correction. It will automatically adjust the image to be rectangular even if the projector is placed at an angle. Manual adjustments may also be available in the settings menu if needed.

Automatic keystone correction

No complication, just 3 easy seconds
auto-keystones the image.

5.3 Connectivity

5.3.1 HDMI Connection

Connect an HDMI cable from your source device (e.g., laptop, game console, TV stick) to the HDMI port on the projector. Select the HDMI input source from the projector's menu.

5.3.2 USB Connection

Insert a USB flash drive into the USB port. The projector supports FAT32 formatted drives up to 32GB. Navigate to the USB section in the SoomfonOS to access media files.

5.3.3 Wi-Fi and Screen Mirroring

Connect the projector to your Wi-Fi network via the settings menu. Once connected, you can use Miracast (for Android) or AirPlay (for iOS) to wirelessly mirror your smartphone or tablet screen to the projector.

5.3.4 Bluetooth Connection

The projector supports two-way Bluetooth functionality:

- **Bluetooth Input (Audio Mode):** Connect your smartphone or other Bluetooth audio device to the projector to use it as a Bluetooth speaker. Access this mode from the homepage.
- **Bluetooth Output:** Connect the projector to external Bluetooth speakers or headphones for enhanced audio. Access this in the settings menu.

6. MAINTENANCE

6.1 Cleaning

- **Lens:** Use a soft, lint-free cloth specifically designed for optical lenses. Do not use abrasive cleaners or solvents.
- **Exterior:** Wipe the projector's exterior with a soft, dry cloth. For stubborn marks, a slightly damp cloth can be used, followed by a dry cloth.

- **Ventilation:** Ensure the ventilation openings are clear of dust and obstructions to prevent overheating.

6.2 Storage

When not in use, store the projector in a cool, dry place away from direct sunlight and extreme temperatures. If possible, use the original packaging or a protective case to prevent dust accumulation and damage.

7. TROUBLESHOOTING

- **No Image/Poor Image Quality:**

- Ensure the power cord is securely connected and the projector is turned on.
- Check the input source selection (HDMI, USB, etc.) matches your connected device.
- Adjust the focus using the F+ and F- buttons on the remote.
- Ensure the room is sufficiently dark for optimal viewing, especially for larger screen sizes.

- **No Audio:**

- Check the volume level on both the projector and the source device.
- If using external speakers, ensure they are properly connected via Bluetooth or audio cable.
- For HDMI sources, verify the audio output settings on your source device.

- **Cannot Stream from Netflix/Prime Video via Screen Mirroring:**

- Due to HDCP (High-bandwidth Digital Content Protection) restrictions, direct screen mirroring of certain streaming services (like Netflix, Prime Video, Hulu) may not work or may only provide audio.
- **Solution:** Use an external streaming device (e.g., Amazon Fire Stick, Roku, Google TV) connected to the projector's HDMI port for these services.

- **Wi-Fi Connection Issues:**

- Ensure the Wi-Fi password is entered correctly.
- If experiencing issues with long Wi-Fi passwords, check the SOOMFON official website for potential firmware updates.

- **Fan Noise:**

- The projector's fan noise is noticeable during operation. This is normal for cooling the internal components.
- For a more immersive audio experience, consider connecting external Bluetooth speakers.
