Bluedee BD-SK800

Bluedee Computer Speakers User Manual

Model: BD-SK800

Brand: Bluedee

INTRODUCTION

Thank you for choosing Bluedee Computer Speakers. These speakers are designed to provide clear, balanced audio for your desktop PC, laptop, or projector. Featuring 10W high-power drivers, they deliver crisp vocals and rich sound, enhancing your gaming, movie-watching, and music listening experiences. With a simple plug-and-play USB/Type-C connection and dynamic RGB lighting, these speakers offer both convenience and aesthetic appeal.

WHAT'S IN THE BOX

Upon opening your Bluedee Computer Speakers package, you will find the following items:

- Two (2) Bluedee Computer Speakers
- Integrated USB/Type-C Cable (Undetachable)
- User Manual (this document)

Your browser does not support the video tag.

Video: An unboxing and setup guide for the Bluedee computer speakers, demonstrating what's included in the package and how to connect the speakers.

SETUP

Setting up your Bluedee Computer Speakers is quick and straightforward, thanks to their plug-and-play design.

1. **Placement:** Position the two speakers on your desk or desired surface. Ensure they are stable and the non-slip pads on the bottom are making full contact to minimize vibrations.

2. **Connect to Power/Audio:** The speakers are powered and receive audio via a single USB/Type-C cable.

   ○ If your device has a USB-C port, connect the Type-C end of the cable directly.
   ○ If your device has a standard USB-A port, use the included USB-A adapter to connect the cable.

   Plug the cable into an available USB or Type-C port on your PC, laptop, or projector. No additional drivers or 3.5mm audio cables are required.

3. **Power On:** Rotate the volume knob on the front of the right speaker clockwise until you hear a click to turn the speakers ON.

USB/Type-C Connectivity

compatibility ensures stable, high-speed audio transmission for versatile device connections

Image: A close-up of the USB/Type-C cable connecting to a laptop, illustrating the versatile connectivity options for the speakers.

For a visual guide on connecting your speakers, please refer to the "What's in the Box & How to Use" video in the previous section, specifically from the 0:18 mark.

OPERATING INSTRUCTIONS

Your Bluedee speakers are designed for intuitive control.

- **Volume Control:** The large knob on the front of the right speaker controls both power and volume.
  - Rotate clockwise to increase volume.
  - Rotate counter-clockwise to decrease volume.
  - Rotate fully counter-clockwise until it clicks to turn the speakers OFF.

- **RGB Lighting:** The speakers feature dynamic RGB lights that can be controlled with a touch-sensitive symbol on top of the right speaker.
  - Tap the light symbol once to turn the RGB lights ON or OFF.
  - The lights will pulse with your music or game audio, creating an immersive atmosphere.

- **Headphone Jack:** A 3.5mm headphone jack is located on the front of the right speaker.
  - Plug in your headphones for a private listening experience.
  - Connecting headphones will automatically mute the speakers.

For a demonstration of the controls, including power, volume, and RGB light operation, please refer to the "What's in the Box & How to Use" video from the 0:29 mark.

MAINTENANCE

To ensure the longevity and optimal performance of your Bluedee Computer Speakers, follow these simple maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to wipe down the speaker surfaces. Avoid using abrasive cleaners, solvents, or strong chemicals, as these can damage the finish.
- **Dust Removal:** Gently brush away any dust from the speaker grilles using a soft brush or a can of compressed air.
- **Storage:** When not in use for extended periods, store the speakers in a cool, dry place away from direct sunlight and extreme temperatures.
- **Avoid Liquids:** Do not expose the speakers to water or other liquids. They are not waterproof.

TROUBLESHOOTING

If you encounter any issues with your Bluedee Computer Speakers, please refer to the following troubleshooting steps:

Problem	Possible Cause	Solution
No sound from speakers	Speakers are off. Volume is too low. Incorrect USB/Type-C connection. Headphones are plugged in. Computer audio output settings.	Ensure speakers are turned ON (rotate volume knob clockwise). Increase speaker volume using the knob. Verify the USB/Type-C cable is securely plugged into a working port on your computer. Try a different port. Unplug headphones from the speaker's 3.5mm jack. Check your computer's sound settings to ensure "Bluedee Speakers" or "USB Audio Device" is selected as the output.
Sound is distorted or unclear	Volume too high (clipping). Audio source quality. Interference.	Lower the volume on both the speakers and your computer. Test with a different audio source or file to rule out source issues. Ensure speakers are not placed too close to other electronic devices that might cause interference.
RGB lights not working	Lights are turned off. Power issue.	Tap the light symbol on top of the right speaker to toggle the lights ON. Ensure speakers are powered on and connected correctly.

If the problem persists after trying these steps, please contact Bluedee Customer Support for further assistance.
