1. Powering On

1. Connect the USB cable to the clock and the power adapter.
2. Plug the power adapter into a standard electrical outlet.
3. The clock will power on automatically.

2. Initial Settings

Upon first use, you may need to configure basic settings such as language, time format, and date format.

- **Language Selection:** The clock supports 6 languages (English, French, German, Italian, Spanish, Japanese). Navigate to the language settings using the side buttons and select your preferred language.
- **Time and Date:** The clock features automatic Daylight Saving Time (DST) adjustment. You can manually set the time and date if needed through the settings menu.

Multi-language Support

Easily switch between 6 languages for date & time display.

2. Setting Alarms and Reminders

The clock supports up to 20 independent alarms and reminders. These can be customized for various daily routines, such as medication schedules or appointments.

- Navigate to the "Alarms" or "Reminders" section in the settings.
- Select an alarm slot and set the time, frequency (daily, weekly, etc.), and a custom message or icon.
- Choose from 18 alarm sounds and adjust the volume across 9 levels. A snooze function (3/6/9 minutes) is also available.

Image: The ROCAM Digital Calendar Clock on a bedside table, depicting its features for multiple alarm sounds and adjustable volume levels, with musical notes emanating from the clock.

3. Brightness and Night Mode

Adjust the screen brightness through 10 levels manually or set a timer for automatic adjustment. The "Nap" button allows you to turn off the screen completely for undisturbed sleep.

Image: The ROCAM Digital Calendar Clock illustrating its customized night mode feature, showing the clock with reduced brightness and a sleeping individual in the background, along with a brightness adjustment scale.

4. Digital Photo Frame Function

The clock can also function as a digital photo frame. Insert an SD card (SD/SDHC/SDXC, Max 64G) or a USB flash drive (Max 64G) to display your photos. Note that video playback is not supported, and not all image formats may be compatible.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the screen and body of the clock. Avoid abrasive cleaners or solvents.
- **Power:** Always use the provided power adapter. Disconnect power during electrical storms or when not in use for extended periods.
- **Placement:** Place the clock on a stable surface, away from direct sunlight, heat sources, and

excessive moisture.
- **Battery Backup:** The clock includes a battery backup feature to retain settings during power outages (AAA batteries not included).

TROUBLESHOOTING

Problem	Possible Cause	Solution
Clock does not power on.	Power adapter not connected or faulty.	Ensure the power adapter is securely connected to both the clock and a working power outlet. Try a different outlet.
Display is dim or too bright.	Brightness settings are incorrect.	Adjust the brightness levels in the settings menu. Check if Night Mode is active.
Alarms are not sounding.	Alarm is not set correctly or volume is too low.	Verify alarm settings and ensure the volume is set to an audible level.
Time or date is incorrect.	Manual setting error or DST not configured.	Check manual time/date settings. Ensure Auto-DST is enabled and configured for your region.
Photos not displaying from SD card/USB.	Incompatible format, card/drive not inserted correctly, or corrupted files.	Ensure files are in compatible image formats. Reinsert the SD card/USB drive. Check for file corruption. Max capacity 64GB.
