SETUP AND ASSEMBLY

Assembly of the RALGEND Kitchen Island is required. The product comes with numbered parts and illustrated instructions to guide you through the process. It is recommended to have a drill for easier assembly, as noted by some users.

Please ensure all components listed in the hardware kit are present before beginning assembly. Follow the step-by-step diagrams carefully to avoid errors.

OPERATING INSTRUCTIONS

Using the Drop Leaf

1. To extend the drop leaf: Gently pull the leaf upwards until the support brackets click into place. Ensure both

brackets are fully engaged for stability.

2. To fold the drop leaf: Press the release mechanisms on the metal support brackets and carefully lower the leaf until it rests against the side of the island.

Locking and Unlocking Wheels

1. To lock the island in place: Locate the two lockable caster wheels. Press down on the lever or tab on each wheel until it clicks into the locked position.
2. To move the island: Lift the levers or tabs on the two lockable wheels to release the lock. The island can then be freely moved on its five swivel casters.

Using the Power Outlets

Plug the island's main power cord into a standard wall outlet. You can then plug up to three small appliances into the integrated AC outlets on the countertop. Always ensure appliances are within the specified voltage and amperage limits (120V 12A).

MAINTENANCE

To maintain the appearance and longevity of your kitchen island:

- Wipe surfaces regularly with a soft, damp cloth. Avoid abrasive cleaners.
- For spills, clean immediately to prevent staining, especially on the wood-grain finish.
- Periodically check all screws and fittings to ensure they are tight. Retighten as necessary.
- Keep the power outlets clean and free of debris.

TROUBLESHOOTING

If you encounter issues with your RALGEND Kitchen Island, consider the following general troubleshooting steps:

- **Stability Issues:** Ensure all wheels are locked if the island is meant to be stationary. Check that all assembly hardware is securely tightened.
- **Drawers/Doors Not Closing Smoothly:** Verify that the tracks are clear of obstructions and that the drawers/doors are correctly aligned.
- **Power Outlets Not Working:** Check if the main power cord is securely plugged into a functioning wall outlet. Ensure the total load of connected appliances does not exceed 12A.
