Pawstastic Pawstastic Replaced Waste Bags

Pawstastic Replaced Waste Bags for Paw101 Self-Cleaning Cat Litter Box - Instruction Manual

Model: Pawstastic Replaced Waste Bags

1. Product Overview

These replacement waste bags are specifically designed for use with the Pawstastic Paw101 Self-Cleaning Cat Litter Box. They are engineered for durability and odor control, providing a hygienic solution for waste disposal.
Each bag measures approximately 46 x 32 cm (18 x 12.6 inches) and is made from high-quality LDPE material to prevent leaks and tears.

2. Compatibility

These waste bags are compatible exclusively with the**Pawstastic Paw101 Self-Cleaning Cat Litter Box**. Ensure your litter box model is Paw101 for proper fit and function.

3. Installation and Setup

Follow these steps to correctly install a new waste bag in your Pawstastic Paw101 litter box:

1. **Prepare the Receptacle:** Ensure the waste receptacle of your Paw101 litter box is clean and empty.
2. **Cover the Receptacle:** Place a new waste bag over the waste receptacle.

Figure 1: Covering the waste receptacle. Ensure the bag edges do not block the built-in sensor to allow normal operation.

3. **Align the Bag:** Carefully align the edges of the bag within the receptacle. Pay close attention to the edges to prevent blocking any built-in sensors, which could affect the litter box's normal operation.
4. **Secure the Bag:** Ensure the bag is fully seated and secure within the receptacle.

4. Operation and Disposal

The Pawstastic waste bags are designed for easy and hygienic disposal:

1. **Remove the Full Receptacle:** When the litter box indicates the waste receptacle is full, carefully remove it from the unit.
2. **Close the Bag:** Utilize the integrated drawstring handles to pull the bag closed. This design allows for effortless sealing.

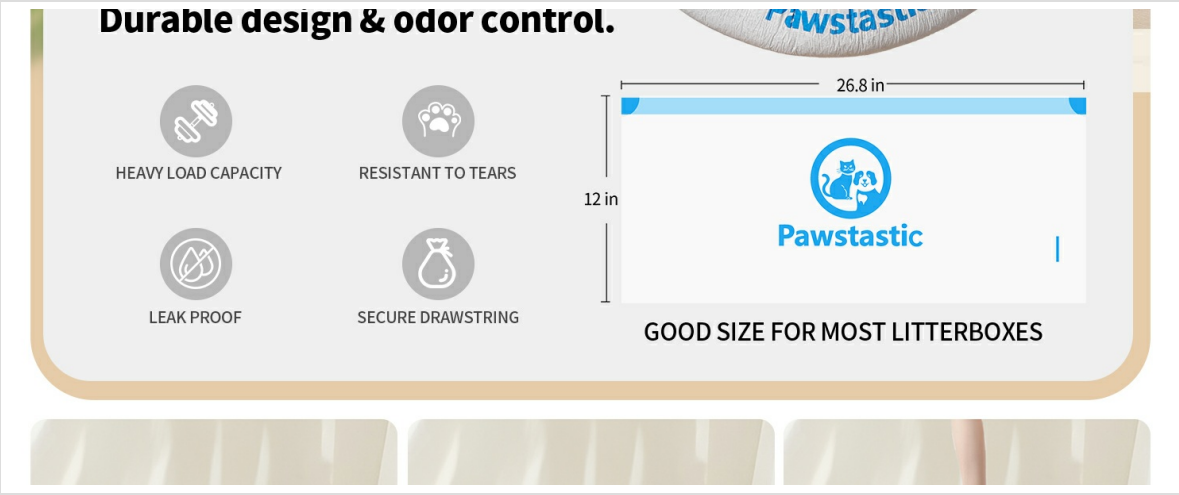

Figure 2: Closing the waste bag using the drawstring for secure and odor-free disposal.

3. **Dispose:** Tie the drawstring securely and dispose of the bag in an outdoor waste bin. The odor-proof material helps minimize unpleasant smells.

5. Maintenance and Replacement

For optimal hygiene and the health of your cat, regular replacement of the waste bags is recommended:

- Replace litter liners every 3 to 5 days.

- The frequency of replacement may vary based on the number of cats and their size.
- Always ensure a fresh bag is installed after disposing of a full one.

6. Product Features

- **Sturdy Material:** Made from high-quality LDPE (Low Density Polyethylene) for superior strength and tear resistance.

Figure 3: Thickened plastic material ensures durability and prevents leaks.

- **Drawstring Design:** Equipped with robust drawstring handles for easy and secure closure, facilitating effortless disposal.

Figure 4: Heavy-duty drawstring for secure closure and easy handling.

- **Odor Proof & Unscented:** Designed to effectively contain and minimize odors from feces, urine, and litter waste, preventing their spread into the environment. The bags are unscented to avoid irritating sensitive cats.
- **Rip-Resistant:** Engineered to withstand heavy use without tearing, even when full.

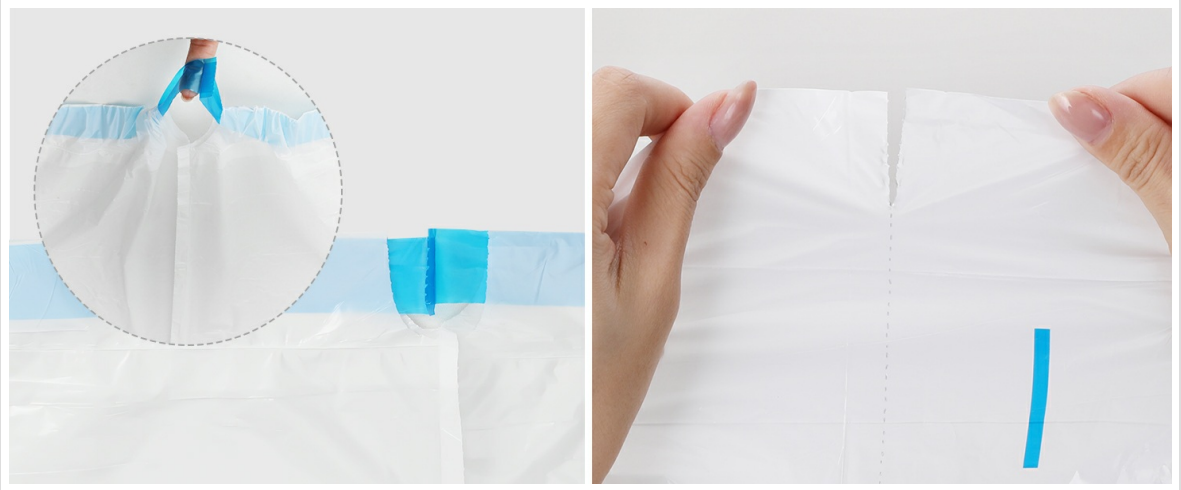

Figure 5: The bag's robust construction ensures it is large, durable, and rip-resistant.

8. Troubleshooting

- **Litter Box Sensor Issues:** If the litter box is not operating correctly after bag installation, check that the edges of the waste bag are not blocking any built-in sensors. Adjust the bag's position to ensure clear sensor pathways.
- **Bag Tearing:** While designed to be rip-resistant, ensure the bag is not overfilled. If tears occur consistently, inspect the waste receptacle for any sharp edges that might be causing damage.
- **Odor Leakage:** Ensure the drawstring is pulled tightly and securely tied before disposal. If odors persist, consider more frequent bag changes.
