

Lisowod L03Pro

Lisowod L03Pro Smart Portable Projector

User Manual

INTRODUCTION

Thank you for choosing the Lisowod L03Pro Smart Portable Projector. This device is designed to provide a comprehensive home theater experience with advanced features such as AI Auto-Setup, a vast streaming system, and superior audio-visual performance. This manual will guide you through the setup, operation, and maintenance of your new projector to ensure optimal performance and enjoyment.

SETUP

1. Unboxing and Components

Carefully remove all components from the packaging. Ensure the following items are present:

- Lisowod L03Pro Projector
- Power Adapter
- Remote Control
- User Manual (this document)

2. Placement

Position the projector on a stable, flat surface. The L03Pro features an AI Auto-Setup System that allows flexible placement, even upside down for ceiling projection. Ensure there are no obstructions in front of the lens.

3. Power Connection

Connect the power adapter to the projector's power input port and then plug it into a wall outlet. The projector will power on automatically or can be turned on using the power button on the device or remote control.

4. Initial Setup and AI Auto-Setup System

Upon first power-on, the projector's AI Auto-Setup System will automatically adjust the image for optimal viewing. This system includes:

- **Auto Focus:** Automatically sharpens the image.
- **Auto Keystone Correction:** Corrects trapezoidal distortion to create a perfect rectangular image.
- **Auto Obstacle Avoidance:** Adjusts the projection to avoid objects in the projection path.
- **Auto Screen Alignment:** Optimizes the image to fit the screen area.
- **Automatic Placement Adjustment:** Corrects image orientation regardless of projector position.

This process typically completes within 5 seconds. Simply power on the device, and it handles the rest.

Auto-Setup System

Hands-Free Setup !

Image: Diagram illustrating the AI Auto-Setup System features including Auto Focus, Auto 4-Point Keystone Correction, Auto Obstacle Avoidance, Auto Screen Alignment, and Auto Projection Orientation Detection.

5. Network and Bluetooth Connectivity

The L03Pro supports WiFi 6 for ultra-fast streaming and Bluetooth 5.2 for lag-free audio. Navigate to the settings menu to connect to your wireless network and pair Bluetooth devices such as speakers or headphones.

- **WiFi Connection:** Select your network from the list and enter the password.
- **Bluetooth Pairing:** Enable Bluetooth on the projector and your device, then select your device from the available list to pair. The projector features automatic Bluetooth volume sync.

OPERATING INSTRUCTIONS

1. Power On/Off

Press the power button on the projector or the remote control to turn the device on or off. A short press will put the projector into standby mode, while a long press will fully shut it down.

2. Navigating the CinemOS Interface

The L03Pro operates on the CinemOS system, offering a smooth and responsive user interface. Use the remote control's directional buttons and OK button to navigate through menus and select options. The LX3 AI chip ensures smartphone-like responsiveness.

For enhanced control, you can scan a QR code displayed on the projector screen to turn your smartphone into a touchpad, allowing for easier browsing and navigation.

3. Streaming Content

The projector comes with an Endless Streaming System, compatible with Netflix, YouTube, Prime Video, Apple TV, and more. Access over 800 applications through the open app store.

Image: The projector displaying a wide selection of over 800 applications available for download, including popular streaming services. Additionally, enjoy over 1,000 exclusive live TV channels with no ads, logins, or fees, covering sports, shows, and news. You can save your favorite Live TV channels for one-click access.

Ad-Free Live TV, Zero Fees

6. Smart Features

- **Built-in Browser:** Use the integrated browser for full-screen web browsing.
- **Customizable Screensaver:** Personalize your sleep screensaver.
- **Quick-Setting Buttons:** Adjust picture and sound settings without interrupting your viewing experience.
- **CEC Control:** Control connected devices like TV sticks or gaming consoles with the projector's remote.

MAINTENANCE

1. Cleaning

To maintain optimal performance, regularly clean the projector's exterior with a soft, dry cloth. For the lens, use a specialized lens cleaning cloth and solution to avoid scratches. Do not use abrasive cleaners or solvents.

2. Software Updates

The CinemOS system receives regular updates to enhance performance and add new features. Ensure your projector is connected to the internet and check for available updates periodically through the system settings menu.

3. Light Source Lifespan

The L03Pro features an advanced light source with an estimated lifespan of 100,000 hours, providing over 20 years of use at typical daily usage (e.g., 3 movies a day). This long lifespan minimizes the need for lamp replacement.

4. Temperature Management

The projector includes a smart temperature display to monitor internal conditions and ensure long-lasting performance. Ensure adequate ventilation around the projector to prevent overheating.

TROUBLESHOOTING

If you encounter issues with your Lisowod L03Pro projector, refer to the following common problems and solutions:

Problem	Possible Cause / Solution
No Power	Ensure the power adapter is securely connected to both the projector and a working power outlet. Try a different outlet.
No Image / Blurry Image	Verify the lens cap is removed. Ensure the projector is powered on. Allow the AI Auto-Setup System to complete its focus and keystone adjustments. If the image is still blurry, try repositioning the projector slightly or manually triggering the auto-setup from settings if available. Check for any obstructions in the projection path.
No Sound	Check the volume level on the projector and any connected external audio devices. Ensure Bluetooth audio devices are correctly paired and connected. Verify the audio output settings in the projector's menu.
Wi-Fi / Bluetooth Connectivity Issues	Ensure the projector is within range of your Wi-Fi router or Bluetooth device. Restart the projector and your router/Bluetooth device. Re-enter Wi-Fi password or re-pair Bluetooth device.
Slow Performance / Unresponsive UI	While the LX3 AI chip ensures smooth performance, if you experience sluggishness, try restarting the projector. Ensure the system is updated to the latest firmware.
