AOXUN Outdoor Gazebo 10x12 Instruction Manual

Model: B0F5W1YKQR | Brand: Aoxun

1. INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your AOXUN Outdoor Gazebo 10x12. Please read all instructions carefully before beginning assembly and retain this manual for future reference. This gazebo is designed to provide a sheltered outdoor space for various activities, featuring a metal frame, double roof, mosquito netting, and privacy screens.

2. SAFETY INFORMATION

- **Read All Instructions:** Ensure you understand all assembly steps and safety warnings before installation.
- **Two-Person Assembly:** Assembly typically requires two or more adults. Do not attempt to assemble alone.
- **Secure Anchoring:** Always anchor the gazebo securely to the ground using the provided stakes or expansion bolts, especially in windy conditions. Failure to do so may result in damage or injury.
- **Weather Conditions:** While designed for various weather, disassemble or secure the canopy during extreme weather conditions such as heavy winds, snow, or storms to prevent damage.
- **Clearance:** Ensure adequate clearance from heat sources, open flames, and electrical lines.
- **Regular Inspection:** Periodically check all connections and components for tightness and wear. Replace any damaged parts immediately.

3. PACKAGE CONTENTS

Before assembly, verify that all components listed below are present and undamaged. If any parts are missing or damaged, contact customer support.

- Metal Frame Components (legs, beams, connectors)
- Canopy Fabric (main roof and upper vent roof)
- Mosquito Netting Panels
- Privacy Curtain Panels
- Hardware Kit (screws, bolts, washers, nuts, stakes, wind ropes)
- Assembly Tools (basic wrench, hex key - specific tools may vary)

4. SETUP AND ASSEMBLY INSTRUCTIONS

Follow these steps carefully for proper assembly. It is recommended to lay out all parts and identify them before starting.

4.1 Frame Assembly

Begin by assembling the main metal frame. The gazebo features a thickened square frame for enhanced stability.

Image: Comparison of frame types, highlighting the gazebo's robust 80mm thickened square frame.

1. Unpack all frame components and identify them according to the parts list.
2. Connect the horizontal beams to the vertical legs, ensuring all connections are secure but not fully tightened until the entire frame is assembled.
3. Assemble the roof frame structure, paying attention to the double-roof design.
4. Once the main frame is upright, tighten all bolts and screws.

4.2 Canopy and Fabric Installation

Install the canopy, mosquito netting, and privacy curtains.

PRODUCT DETAILS

**Practical
Design**

**Heavy-duty
Frame**

1

2" J" Shaped Hooks
Lights, Fans, Plants

2

4 Corner Rings
Decoration Hanging

3

Anchored Frame
More Stable

Image: Key features including J-shaped hooks, corner rings, and the anchored frame.

1. Drape the main canopy fabric over the roof frame, aligning the corners and securing it.
2. Install the smaller upper canopy over the main canopy, ensuring proper ventilation.
3. Attach the mosquito netting and privacy curtains to the frame using the integrated hooks or rings. The gazebo includes 4 corner rings for hanging decorations or additional wind ropes.
4. Utilize the 2 J-shaped hooks located on the top frame for hanging a chandelier or fan.

4.3 Anchoring and Stability

Proper anchoring is crucial for the gazebo's stability.

Image: Wind-resistant ropes for enhanced stability.

- Use the provided ground stakes to secure each leg of the gazebo to soft ground.
- For concrete surfaces, use expansion bolts (included) to firmly anchor the gazebo.
- Attach the wind-resistant ropes to the designated points on the gazebo frame and secure them to the ground at an angle to provide additional stability against wind.

5. OPERATING INSTRUCTIONS

5.1 Mosquito Netting and Privacy Curtains

The gazebo is equipped with both mosquito netting and privacy curtains for versatile use.

- **Mosquito Netting:** Zip up the netting panels to create an enclosed space, protecting against insects while allowing air circulation and an open view.
- **Privacy Curtains:** Close the privacy curtains for increased privacy or protection from wind and sun. The curtains can be tied back when not in use.

5.2 Ventilated Double Roof System

The gazebo features a ventilated double roof designed for comfort and functionality.

Image: Detail of the ventilated double-roof with netting for air circulation and mosquito repulsion.

- The double-roof design allows for improved air circulation, reducing heat buildup under the canopy.
- Integrated mesh between the roof layers helps to repel mosquitoes while maintaining airflow.

5.3 Water Drainage

The canopy is designed with features to manage rainwater.

Water Leakage Holes

Prevents top water from collapsing
Increase structural stability

Image: Water leakage holes on the canopy for drainage.

- The canopy includes strategically placed leakage holes to help drain accumulated rainwater. This design reduces pressure on the canopy fabric and enhances structural stability.
- Ensure these holes remain clear of debris to allow for effective drainage.

6. MAINTENANCE

Regular maintenance will extend the life of your gazebo.

- **Cleaning the Canopy:** Clean the polyester fabric canopy with mild soap and water. Do not use harsh chemicals or abrasive cleaners. Allow to air dry completely before storage.
- **Frame Care:** Wipe the metal frame with a damp cloth. The powder-coated steel frame is designed for rust resistance, but regular cleaning helps maintain its finish.
- **Check Connections:** Periodically inspect all bolts, screws, and anchoring points to ensure they remain tight and secure.
- **Winter Storage:** In areas with heavy snow or prolonged cold, it is recommended to remove the canopy and store it indoors to prevent damage.

7. TROUBLESHOOTING

- **Gazebo Instability:** Ensure all frame connections are fully tightened. Verify that the gazebo is properly anchored to the ground using stakes or expansion bolts and that wind ropes are securely fastened.
- **Water Accumulation on Roof:** Check that the canopy is taut and properly installed. Ensure the water leakage holes are not blocked by debris.
- **Mosquito Netting/Curtains Dragging:** Confirm that the frame is assembled to the correct height. Adjust the hanging points of the netting and curtains if possible to ensure they hang freely without dragging.
- **Difficulty with Assembly:** Review the assembly instructions carefully. Ensure all parts are correctly identified and oriented. Do not force components; if parts do not fit, recheck the steps.

8. SPECIFICATIONS

Key specifications for the AOXUN Outdoor Gazebo 10x12 (Model B0F5W1YKQR).

Image: Dimensional diagram of the 10x12FT patio gazebo.

Feature	Detail
Product Dimensions (L x W x H)	3.66L x 3.05W x 2.96H meters (12 x 10 x 9.7 feet)
Floor Area	120 square feet
Frame Material	Powder-coated Steel (80mm thickened square legs)
Canopy Material	Waterproof Polyester Fabric
Color	White (Beige canopy)
Water Resistance Level	Water Resistant (Water Pressure Resistance 1500ML)
Ultraviolet Light Protection	UPF 50+
Wind Resistance	Up to Level 7 (31-38 mph)
Snow Load Tolerance	Up to 4 inches thickness
Style	Modern

9. WARRANTY AND SUPPORT

For warranty information, product support, or to order replacement parts, please contact the retailer or manufacturer directly. Details regarding specific warranty periods and coverage are typically provided at the point of purchase or on the manufacturer's official website.

ASK A QUESTION ABOUT THIS MANUAL

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page’s manual context to help answer it.
