3. PRODUCT OVERVIEW

The Winnes voice recorder is designed for portability and ease of use. It features a compact, mini design with a built-in

magnet for versatile placement.

Physical Characteristics:

- **Dimensions:** Approximately 4.2 x 4.2 x 1.3 cm (1.6 x 1.6 x 0.5 inches)
- **Weight:** Approximately 45 g (0.8 ounces)
- **Magnetic Design:** Integrated magnet allows attachment to metal surfaces.

Compact & Portable

Fits Anywhere

The Winnes voice recorder's compact and portable design makes it easy to carry in a pocket or place discreetly in various environments, such as a car interior.

Portable Magnetic Design

Recorder has built-in magnets, you can easily attach recorder to any metal surface.

The voice recorder incorporates a strong built-in magnet, allowing it to be easily attached to any metallic surface for discreet placement or secure storage.

4. SETUP

4.1 Initial Charging

Before first use, fully charge the device. Connect the voice recorder to a computer's USB port or a USB wall adapter using the provided Type-C USB cable. The charging time is approximately 50 minutes for a full charge.

4.2 Power On/Off

Locate the power switch (usually labeled ON/OFF or REC/OFF). Slide the switch to the 'ON' or 'REC' position to power on the device. Slide it to 'OFF' to power off.

5. OPERATING INSTRUCTIONS

5.1 Basic Recording

1. Ensure the device is charged.
2. Slide the power switch to the 'REC' position. The device will typically indicate recording status with an LED light (e.g., a red light flashing or solid).
3. To stop recording, slide the switch to the 'OFF' position. The recording will be automatically saved.

5.2 Voice-Activated Recording (VOR)

The voice-activated recording function is disabled by default. To activate and configure it:

1. Connect the recorder to a computer using the USB cable.
2. Access the device's storage. Locate the configuration file (refer to the full manual for specific file name and location).
3. Edit the configuration file to enable VOR and set the desired decibel sensitivity level (1 to 7, where 1 is 15 dB and 7 is 55 dB). The device will record automatically when sound exceeds the set threshold (e.g., 25 dB for level 3) and pause when silence occurs.
4. Save the changes and safely eject the device from the computer.
5. When the battery level drops below 5%, the device will automatically save any ongoing recording before powering off.

Voice-activated Recording

Voice-activated recording needs to be set to turn on, and the default is off.

The voice recorder supports voice-activated recording with 7 adjustable sensitivity levels, ranging from 15 dB to 55 dB. This feature allows the device to automatically start recording when sound is detected above a set threshold and pause when silence occurs.

5.3 Playback

The Winnes voice recorder offers multiple playback options:

- **Speaker Playback:** The device has a built-in speaker for direct audio playback.
- **Headphone Playback:** Connect the included special wired headphones to the device for private listening. The headphones allow control over audio playback (play/pause, volume up/down, track change).
- **Mobile Phone Playback:** Use the provided Apple OTG or Type-C OTG adapter to connect the recorder to your smartphone for file management and playback.
- **Computer Playback:** Connect the recorder to a computer via the USB cable to access and play recordings or music files.

Speaker Instant Playback

Recorder has built-in HD speakers, which can play recordings or music directly.

The Winnes voice recorder features a built-in speaker for instant playback of recordings or music. Users can listen directly from the device, making it convenient for reviewing audio in various settings.

Multiple Playback Modes

The recorder offers multiple playback options: directly through its built-in speaker, via wired headphones, or by connecting to a mobile phone or computer for file management and listening.

5.4 Transferring Files

To transfer recordings or other files to/from the device:

1. Connect the voice recorder to your computer using the provided USB cable.
2. The device will appear as a removable disk drive.
3. Open the drive to access your recorded files (typically in WAV format) or to drag and drop music files (WAV, MP3, FLAC) onto the device.
4. Always safely eject the device from your computer before disconnecting to prevent data corruption.

5.5 Using as MP3 Player and USB Drive

The recorder can store and play music files (WAV, MP3, FLAC) and also function as a standard USB flash drive for general data storage and backup. Its 64 GB memory can store approximately 750 hours of recordings or a large volume of other files.

6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the device. Avoid using liquid cleaners or solvents.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge the device regularly, even if not in use for extended periods.
- **Headphones:** The included headphones are special. Store them carefully to prevent damage or loss.

7. TROUBLESHOOTING

7.1 Device Not Turning On

- Ensure the battery is charged. Connect to a power source and allow it to charge for at least 10 minutes before attempting to power on again.
- Check the power switch position.

7.2 Cannot Record

- Verify that the device has sufficient storage space. Connect to a computer to check available memory.
- Ensure the battery is not critically low.
- Check if the device is in the correct recording mode (e.g., not in playback mode).

7.3 Poor Recording Quality

- Ensure the microphone is not obstructed.
- Record within the optimal distance (approximately 8 meters for normal voice).
- Reduce background noise in the recording environment.

7.4 Cannot Connect to Computer/Smartphone

- Try a different USB port or cable.
- Ensure the OTG adapter is correctly connected when using with a smartphone.
- Restart your computer or smartphone.
- Ensure your operating system (Windows XP/7/8/10) is supported.
