Vacbird W8-15T-YF

Vacbird W8-15T-YF Vacuum Storage Bags Set with USB Pump Instruction Manual

Brand: Vacbird | Model: W8-15T-YF

INTRODUCTION

Thank you for choosing the Vacbird W8-15T-YF Vacuum Storage Bags Set. This product is designed to maximize your luggage and storage space by compressing bulky items such as clothing, pillows, and winter coats. The set includes durable vacuum bags and a portable USB-powered electric pump, making it ideal for travel and home organization. Please read this manual thoroughly before use to ensure proper operation and longevity of your product.

PACKAGE CONTENTS

- 1 x USB Electric Vacuum Pump
- 5 x Small Vacuum Storage Bags (15.8" x 15.8" / 40cm x 40cm)
- 5 x Medium Vacuum Storage Bags (15.8" x 19.7" / 40cm x 50cm)
- 5 x Large Vacuum Storage Bags (15.8" x 23.6" / 40cm x 60cm)
- Sealing Clips (for bags)

SAFETY INFORMATION

- Keep all components, especially the pump and small parts, away from children.
- Do not overfill the vacuum bags. Ensure there is enough space to properly seal the zipper.
- Ensure items placed in the bags are dry and free from moisture to prevent mold or mildew.
- Do not use the electric pump near water or in wet conditions.
- Avoid puncturing the bags with sharp objects.
- The pump is designed for intermittent use. Avoid continuous operation for extended periods to prevent overheating.

SETUP

1. **Charge/Connect the USB Pump:** The electric pump is USB powered. Connect the pump to any standard USB port (e.g., charger, power bank, PC) using the provided cable. The pump does not have an internal battery and requires a continuous power source during operation.
2. **Prepare the Vacuum Bag:** Open the zipper seal of a vacuum bag.
3. **Insert Items:** Place your dry clothes or other soft items neatly into the bag. Do not overfill.

OPERATING INSTRUCTIONS

1. **Seal the Bag:** Once items are inside, firmly press the zipper seal closed. Use the provided sealing clip to ensure a complete and airtight seal across the entire length of the zipper. Run the clip along the seal multiple times.
2. **Open the Valve:** Unscrew the cap from the air valve on the bag.
3. **Attach the Pump:** Place the nozzle of the USB electric pump directly onto the air valve. Ensure a snug fit.
4. **Start Vacuuming:** Turn on the electric pump. The pump will begin to extract air from the bag, compressing the contents. You may gently press down on the bag to assist in expelling air and flattening the contents.
5. **Monitor Compression:** Continue operating the pump until the bag is compressed to your desired level, typically saving up to 80% of space.
6. **Remove Pump and Close Valve:** Once compressed, turn off the pump, remove it from the valve, and immediately replace and tighten the valve cap to maintain the vacuum seal.

MAINTENANCE

- **Cleaning Bags:** Wipe the vacuum bags clean with a damp cloth. Ensure they are completely dry before storing or reusing.
- **Cleaning Pump:** The electric pump requires minimal cleaning. Wipe its exterior with a dry cloth. Do not immerse in water.
- **Storage:** Store the bags and pump in a cool, dry place away from direct sunlight and extreme temperatures. The bags are reusable for long-term storage.
- **Material Durability:** The bags are made from premium PA+PE material, offering 3X thickness compared to standard bags, making them tear-proof and durable for repeated use.

Image: Features highlighting the effective protection provided by the Vacbird bags, including dust-proof, moisture-proof, anti-mite, anti-mold, and reusability.

TROUBLESHOOTING

- **Bag does not compress or re-inflates:**
 - Ensure the zipper seal is completely closed. Use the sealing clip multiple times.
 - Check the air valve cap. Make sure it is securely tightened after vacuuming.
 - Inspect the bag for any punctures or tears. A small piece of tape can temporarily fix minor holes.
- **Electric pump is not turning on:**
 - Verify the USB cable is securely connected to both the pump and a functioning USB power source.
 - Try a different USB port or power adapter.

- **Slow vacuuming:**

- Ensure the pump nozzle is firmly seated on the air valve.
- Check for any obstructions in the air valve or pump nozzle.

SPECIFICATIONS

Feature	Detail
Brand	Vacbird
Model Number	W8-15T-YF
Material	PA+PE
Pump Type	USB Electric Pump
Vacuum Force	50kPa
Pump Dimensions	1.38"L x 1.18"W x 3.74"H (approx.)
Number of Items	15 (bags) + 1 (pump)
