

TS3203

# APRR/AREA Type TS3203 Toll Tag Holder Instruction Manual

Model: TS3203 | Brand: Generic

## 1. INTRODUCTION

This manual provides instructions for the Generic APRR/AREA Type TS3203 Toll Tag Holder. This product is designed to securely hold your APRR/AREA toll tag (type TS3203) in your vehicle or on your motorcycle, ensuring optimal detection at toll booths. The kit includes the holder and high-performance double-sided adhesive for easy and durable installation.

## 2. PACKAGE CONTENTS

Please verify that all items are present in your package:

- 1 x APRR/AREA Type TS3203 Toll Tag Holder
- 1 x High-performance double-sided adhesive

## 4. SETUP AND INSTALLATION

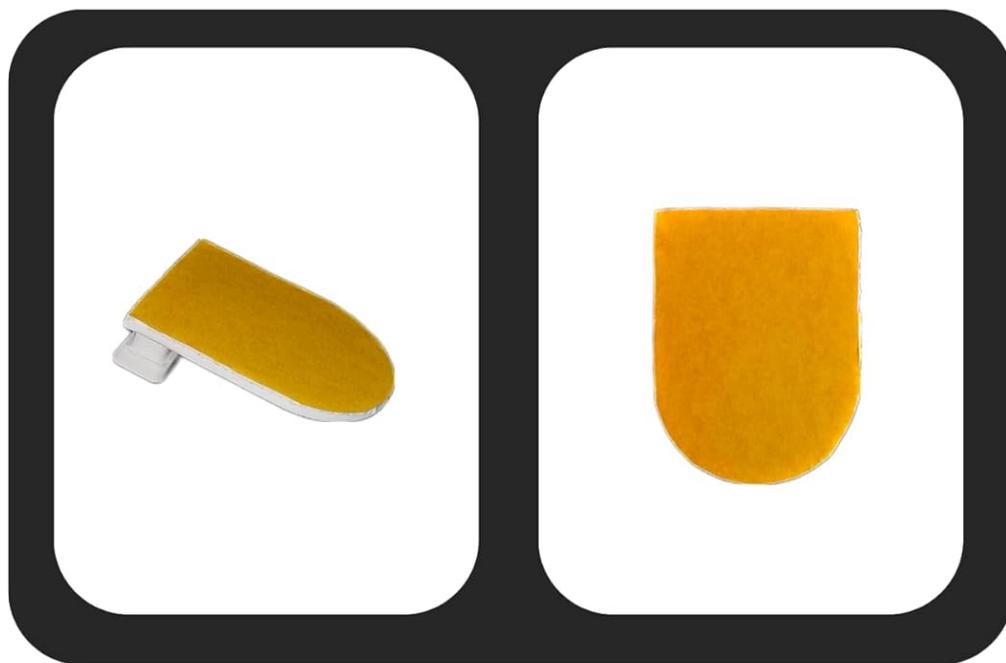

Follow these steps for proper installation of your toll tag holder:

1. **Prepare the Surface:** Choose a clean, smooth, and dry area on your vehicle's windshield (for cars) or a suitable flat surface (for motorcycles). Ensure the area is free from dust, grease, or moisture. Clean the surface thoroughly with an alcohol wipe and let it dry completely.
2. **Prepare the Adhesive:** Carefully peel off one side of the protective film from the double-sided adhesive.
3. **Attach Adhesive to Holder:** Align the adhesive with the designated area on the back of the toll tag holder and press firmly to ensure a strong bond.
4. **Attach Holder to Vehicle:** Peel off the remaining protective film from the adhesive. Carefully position the holder on the prepared surface of your windshield or motorcycle. Press firmly for at least 30 seconds to ensure maximum adhesion. Allow the adhesive to cure for a few hours (ideally 24 hours) before inserting the toll tag, especially in extreme temperatures.
5. **Insert Toll Tag:** Once the holder is securely attached, slide your APRR/AREA TS3203 toll tag

into the holder. Ensure it is seated correctly and firmly.

# **Adhésif extra fort 3M**

## **Spécial surface lisse et pare brise**

- Adhésion durable**
- Résiste à toutes les températures**
- Ne laisse pas de marques**

### 5. OPERATING INSTRUCTIONS

Once the holder is installed and the toll tag is inserted, no further action is required for operation. The holder's design ensures proper positioning for optimal signal transmission and detection at toll gates. Ensure the toll tag is always facing outwards towards the toll reader.

### 6. MAINTENANCE

- **Cleaning:** Clean the holder periodically with a soft, damp cloth. Avoid using abrasive cleaners or solvents, as these may damage the plastic.
- **Adhesive Check:** Periodically check the adhesive for signs of wear or weakening. If the adhesive shows signs of losing its grip, replace it with a new high-performance automotive-grade double-sided adhesive to prevent the holder from detaching.
- **Storage:** If removing the holder for extended periods, store it in a clean, dry place away from direct sunlight.

### 7. TROUBLESHOOTING

#### Toll tag not detected:

- Ensure the toll tag is correctly inserted into the holder and facing the correct direction.
- Verify the holder is securely attached to the windshield/motorcycle in a clear, unobstructed

area. Avoid placing it behind tinted strips or other objects that might block the signal.

- Check if the toll tag itself is active and functional. Contact your toll service provider if you suspect an issue with the tag.

**Holder detaches from surface:**

- Ensure the installation surface was thoroughly cleaned and dry before initial application.
- Reapply with new high-performance double-sided adhesive, following the installation instructions carefully. Ensure adequate curing time.

## 8. SPECIFICATIONS

<b>Manufacturer</b>	3D Build
<b>Brand</b>	Generic
<b>Model</b>	TS3203
<b>Item Weight</b>	10 g
<b>Package Dimensions</b>	4.9 x 3 x 1.5 cm
