ULTIMEA Poseidon M60 5.1ch Dolby Atmos Soundbar System User Manual

Model: U3721

1. Introduction

The ULTIMEA Poseidon M60 is a 5.1-channel Dolby Atmos soundbar system designed to deliver an immersive home theater audio experience. This system features five built-in drivers, including side-firing speakers, for comprehensive surround sound without the need for additional rear speakers. With a peak power output of 300 watts and a wired subwoofer, it provides clear audio and deep bass for various entertainment needs. The system supports HDMI eARC for high-fidelity sound transmission and offers customizable sound settings via the ULTIMEA app.

4. Setup

4.1 Placement

The ULTIMEA Poseidon M60 soundbar can be placed on a tabletop in front of your television or mounted on a wall. Ensure the soundbar is centrally located relative to your TV for optimal sound dispersion. The wired subwoofer should be placed on the floor, ideally in a corner or near a wall, to enhance bass response. Avoid obstructing the subwoofer's driver.

4.2 Connections

Connect the soundbar to your television and power source using the provided cables.

1. **HDMI eARC Connection:** For the best audio quality and simplified control, connect the HDMI eARC port on the soundbar to the HDMI eARC/ARC port on your TV using the supplied HDMI cable. This allows for full-bandwidth Dolby Atmos and CEC integration, enabling your TV remote to control the soundbar's basic functions.
2. **Optical Connection:** If your TV does not have an HDMI eARC/ARC port, use an optical cable (not included) to connect the soundbar's OPTICAL port to your TV's optical digital audio output.
3. **Subwoofer Connection:** Connect the wired subwoofer to the soundbar using the dedicated subwoofer cable.
4. **Power Connection:** Connect the power adaptor to the soundbar's DC IN port and then plug it into a wall outlet.
