Bazyths ZYS1 Mini

Bazyths ZYS1 Mini Smart Compact Toilet Instruction Manual

Model: ZYS1 Mini

1. PRODUCT OVERVIEW

The Bazyths ZYS1 Mini Smart Compact Toilet is designed to enhance your bathroom experience with advanced features and a space-saving design. This one-piece toilet integrates a built-in bidet, automatic lid operation, and various comfort functions.

Figure 1: Bazyths ZYS1 Mini Smart Compact Toilet, showcasing its compact 23-inch depth.

Compact and Space-Saving Design

The ZYS1 Mini is specifically engineered for small bathrooms and tight spaces, offering a shallow depth of 23.23 inches to maximize usability in powder rooms and compact areas.

Wider Seat for Enhanced Comfort

Featuring a 3.54-inch extra-wide seat, this toilet provides improved comfort and support, suitable for various users including seniors, pregnant individuals, and those with larger body types.

Why the ZYS1 Mini Outshines Other Tankless Smart Toilets

Why a Built-in Tank Makes a Difference	Other Tankless Smart Toilets	ZYS1 Mini with Built-in Tank
Shorter flushing time	15s	9s
Lower water consumption	About 1.27 gallons	About 1.03 gallons
Stable flushing under high water pressure	Louder flushing noise	Normal flushing
Single flush in low-pressure environments	✗	✓
Powerful flushing with built-in pump	✗	✓

Figure 3: Comparison of the ZYS1 Mini's 3.54-inch wide seat with a narrower 2.95-inch seat from another small toilet.
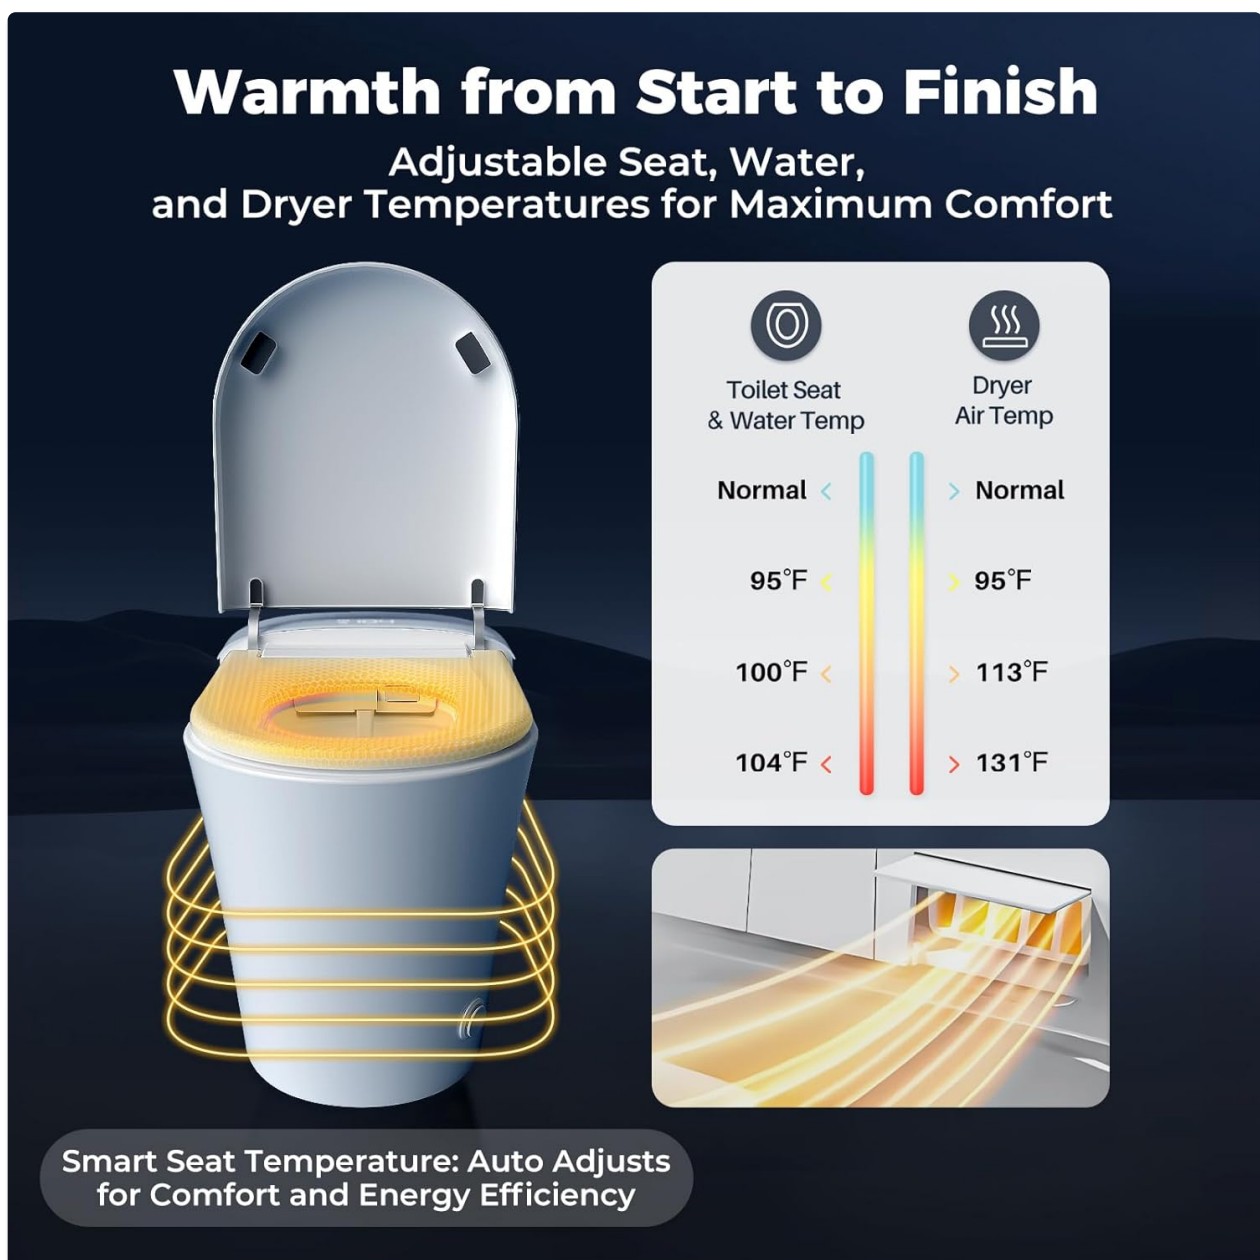

2. SETUP AND INSTALLATION

Included Components

- Smart Toilet Main Unit
- Remote Control
- Angle Valve & Tee Connector
- Sealing Flange & Mounting Accessory Kit
- User Manual

Figure 4: Product dimensions and a list of included accessories for installation.

Power Requirements

- The power cord is 1.2 meters (approximately 3.9 feet) long.
- The toilet operates on standard US voltage: 110V–120V.
- Ensure the electrical outlet is GFCI (Ground-Fault Circuit Interrupter) protected, either at the receptacle or in the breaker box, for safety.

Remote Control Pairing

To pair the remote control with the toilet:

1. Plug in the power cord within 30 seconds after the toilet is powered on.
2. Press and hold the feminine wash button on the toilet's side panel until the display flashes once.
3. Then, press and hold the rear wash button on the toilet's side panel. The display screen will flash continuously.
4. While the display is flashing, press the power stop button on the remote control. Pairing is successful when the display stops flashing.

3. OPERATING INSTRUCTIONS

Automatic Lid Opening/Closing and Foot Sensor

The toilet lid automatically opens when a user approaches. Both the lid and seat close automatically 2 minutes after the user leaves the sensor range. A foot sensor allows for touchless operation to open/close the lid or seat and to flush.

Figure 5: Automatic lid opening and foot sensor functionality for hygienic, touchless operation.

No Waiting: Instant 0.1-second Heating to Your Ideal Temperature

4-Level Water Temperature Adjustment, Ready for Use

Normal | **95°F** | **100°F** | **104°F**

Four cleaning Modes for the Whole Family

Feminine cleaning
Gentle spray for sensitive skin.

Oscillating cleaning
Oscillating spray for a wider, more thoroughly clean.

Rear cleaning
Stronger spray for effective cleaning, ensuring freshness without residue.

Hot and Cold Massage
The nozzle alternates between warm and cool water for a massaging effect.

Flushing System

The ZYS1 Mini features a built-in tank design, eliminating reliance on external water pressure and allowing operation even under zero water pressure conditions. It utilizes a water-saving flush of 1.03 gallons per use.

- **Off-Seat Flush:** The toilet automatically flushes when the user leaves the seat.
- **Quiet Operation:** The flushing system is designed to significantly reduce noise.

4. MAINTENANCE

High-Density Foam Shield

The advanced foam shield technology creates a dense barrier to control splashes and block odors, ensuring a cleaner and fresher bathroom experience.

Compact Yet Spacious: 3.54" Wide Seat

Designed for comfort and support —ideal for seniors, pregnant women, and larger body types.

Used for personal cleansing.
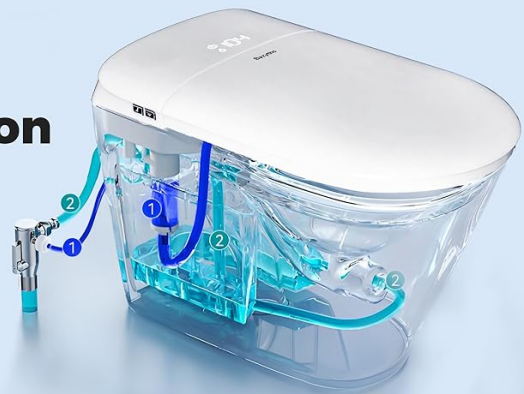

2 Tank Waterway
Used for daily flushing.

Figure 16: Explanation of the high-density foam shield's benefits, including leak-proof comfort, antibacterial protection, odor blocking, and anti-stick properties.

Self-Cleaning and Detachable Nozzle

The bidet nozzle self-cleans before and after each use. It is also detachable for easy manual maintenance, ensuring high hygiene standards.

About the Water Test

To ensure quality and proper functionality, we conduct a water test on each toilet before shipping. If you notice water stains inside the toilet when you open the box, it's because of this test. Any residual water in the pipes is normal and shouldn't cause any concern.

About Fire Cracks

Small cracks in unglazed areas are normal and occur due to the high-temperature firing process at 1280°C. These do not affect quality, cause leakage, or impact performance. The toilet passes strict quality inspection before shipping.

Figure 17: Overview of enhanced cleanliness features, highlighting the self-cleaning and detachable nozzle.

5. TROUBLESHOOTING

Water Droplets Inside the Toilet

It is normal to find water droplets inside the toilet upon opening the box. Each toilet undergoes a water test before shipping to ensure proper function. Any residual water is from this quality check and is not a defect.

Power-Off Flushing

Equipped with a built-in battery compartment (requires 10 AA alkaline batteries, not included), this smart toilet supports flushing during power outages, ensuring functionality even without electrical power.

Power-Outage Flushing, Just Press

Reliable Flushing Even Without Power

Backup Battery Box for Power Outage Flush

Requires 10 AA alkaline batteries to enable flushing during a power outage (batteries not included).

General Warnings

- Do not dismantle or repair the product without authorization. The smart toilet contains precision components; do not pour water or detergent on the product or power plug.

- Always use GFCI-protected safety sockets. All power sockets must be grounded and installed by a licensed electrician.

- Be aware of the risk of low-temperature burns. Set the temperature to "low" when using the toilet for extended periods.

- Do not step on the toilet lid or seat. Do not forcefully open or close the toilet lid, which may cause
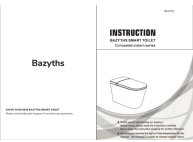

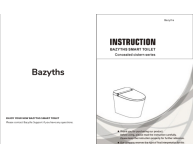

damage.

- Lit cigarettes and other flammable objects should not be placed in the toilet.
- Clean soiled areas using a dry, soft cloth. Avoid using chemical cleaners or harsh chemicals on the product.
- When using the product, ensure children do not pour water on it. If the product will not be used for an extended period, close the water inlet valve and unplug the power plug to disconnect the power supply.

8. WARRANTY AND SUPPORT

For customer support or inquiries, please contact Bazyths. We are committed to quality and aim to improve your daily routine.
This product is returnable until January 31, 2026.
