

## ieGeek Baby 7

# ieGeek Baby Monitor User Manual

Model: Baby 7

## INTRODUCTION

This user manual provides comprehensive instructions for the setup, operation, and maintenance of your ieGeek Baby Monitor. Please read this manual thoroughly before using the product to ensure safe and optimal performance. This device is designed to help you monitor your baby with advanced features like HD night vision, two-way talk, and smart detection capabilities.

## WHAT'S IN THE BOX

Verify that all components are present in the package:

- 1 x Baby Camera Unit
- 1 x 5-inch Display Monitor Unit
- 2 x 1.5M Power Cables (for camera and monitor)
- 3 x Mounting Screws
- 1 x Quick Guide

# Packaging list

## SETUP GUIDE

### 1. Powering On the Devices

Connect the provided power cables to the camera unit and the display monitor unit. Plug both adapters into a standard electrical outlet. The camera requires continuous power, while the monitor has a built-in battery for portability.

### 2. Camera and Monitor Placement

Place the camera unit in a location that provides a clear view of your baby, ensuring it is out of reach of children. The camera can be wall-mounted using the included screws or placed on a flat surface. Position the monitor unit in a convenient location where you can easily view the display.

### 3. Initial Pairing (Pre-paired)

The camera and monitor units are pre-paired at the factory. Upon powering on, the monitor should automatically display the

camera's feed. If the connection is not established, refer to the troubleshooting section.

#### 4. Smartphone App Connection (Optional)

For enhanced features and remote monitoring, download the ieGeek app on your smartphone or tablet. Follow the in-app instructions to connect your baby monitor to your home's 2.4GHz Wi-Fi network. This allows for dual control via both the physical monitor and your smart device.

# WiFi App & Non-WiFi Options

Reliable monitoring for your little one, ensuring peace of mind wherever you are.

Image: Illustration of the ieGeek Baby Monitor's flexible connectivity, showing both direct non-WiFi connection between camera and monitor, and optional 2.4GHz WiFi connection for smartphone app access.

## OPERATING INSTRUCTIONS

### 1. Basic Monitoring

Once powered on, the monitor will display the live video feed from the camera. Use the buttons on the monitor to navigate menus and adjust settings.

### 2. Pan, Tilt, and Zoom (PTZ)

The camera offers 355° pan and 100° tilt functionality. Use the directional buttons on the monitor to remotely adjust the camera's viewing angle. The 4x digital zoom allows for closer inspection of your baby.

# Full-Spectrum Rotation | 355° Pan & 100° Tilt

Cover every corner of your nursery

Image: The ieGeek Baby Monitor camera demonstrating its 355-degree pan and 100-degree tilt rotation, along with features like 4x zoom and auto-tracking to cover the entire nursery.

## 3. Two-Way Talk

Press and hold the "Talk" button on the monitor to speak to your baby through the camera's speaker. Release the button to listen. This feature allows for comforting your baby remotely.

## 4. HD Night Vision

The camera automatically switches to HD night vision in low-light conditions, providing a clear black-and-white image of your baby up to 10 meters away.

## 5. VOX Mode (Voice Activated)

Activate VOX mode to conserve battery life. The monitor screen will turn off, but the audio will remain active. The screen will automatically turn on and alert you when sound is detected from your baby (e.g., crying).

## VOX Mode | Audio-Activated, Effortless Watch

Ensure Parents' Peace with Instant Alerts & Energy Efficiency

Image: Illustration of the VOX (Voice Activated) mode, showing the monitor screen turning on when a baby cries and remaining off when the baby is sleeping, indicating energy efficiency and instant alerts.

### 6. Temperature and Humidity Sensor

The camera unit includes sensors to monitor the room's temperature and humidity, displayed on the monitor screen and the app. This helps ensure a comfortable environment for your baby.

### 7. Cry and Motion Detection

The monitor can detect crying and motion, sending alerts to your monitor and smartphone app (if connected). This feature helps you respond quickly to your baby's needs.

### 8. Feeding Reminder

Set up feeding reminders through the monitor's menu or the smartphone app to help maintain a consistent feeding schedule for your baby.

### 9. Electronic Fence (Hazardous Area Alerts)

Utilize the electronic fence feature to define specific areas within the camera's view as "hazardous." If your baby enters these predefined zones, you will receive an alert.

## Hands-Free Baby Monitor | Feed, Move, Alerts 24/7

Free up hours for yourself while knowing your little one is safe

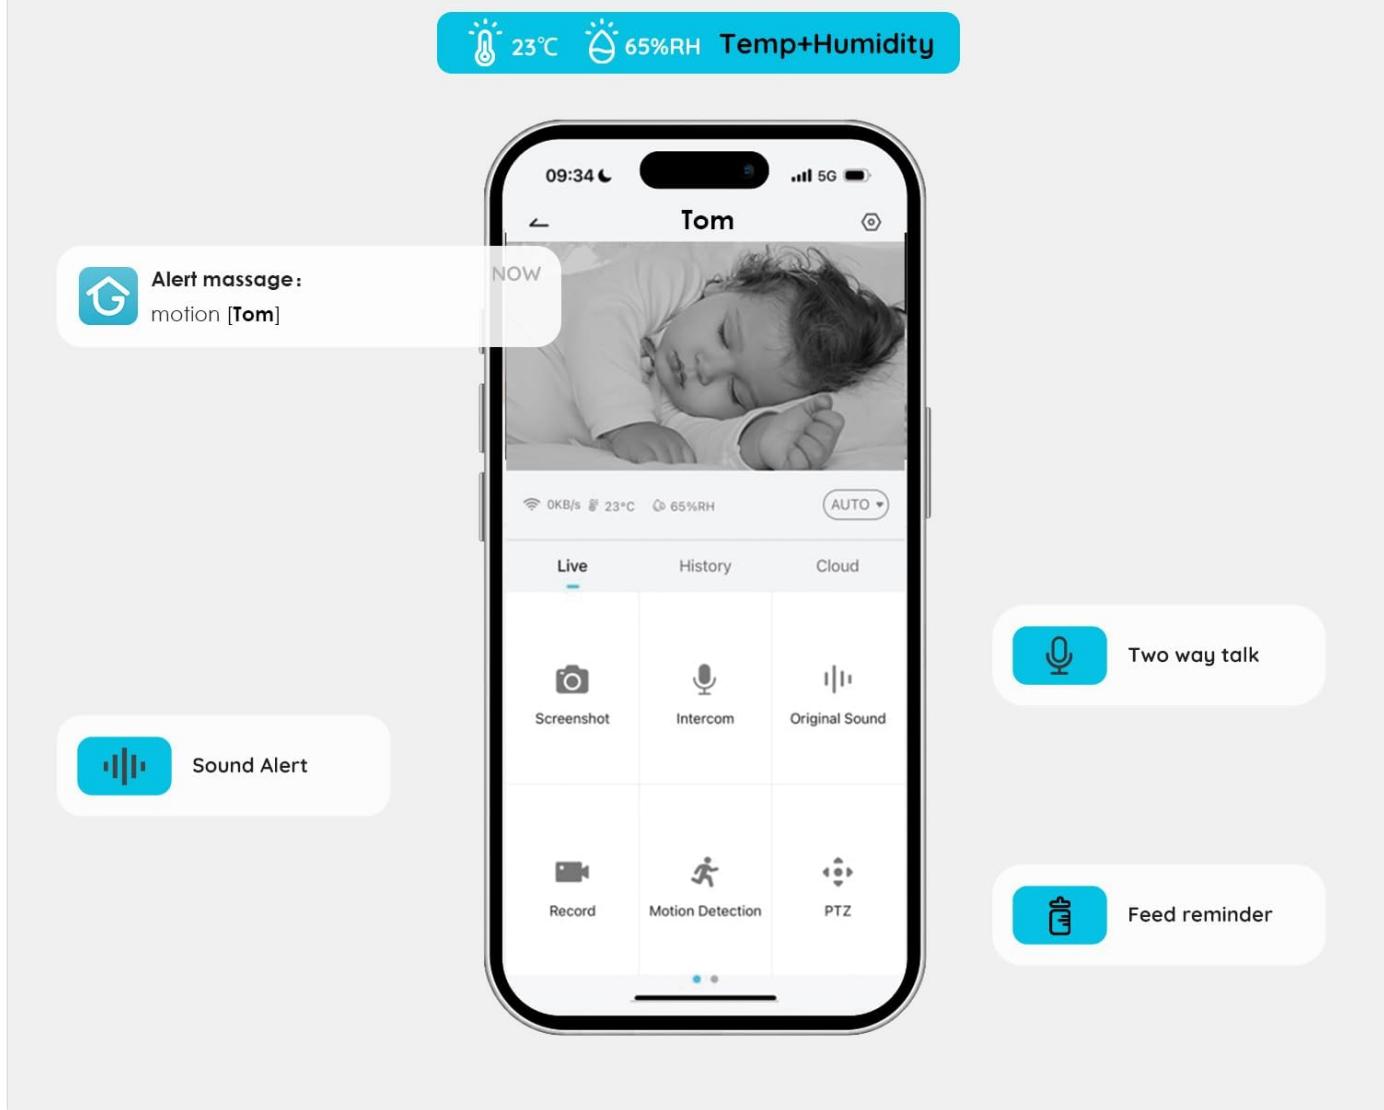

Image: The ieGeek Baby Monitor's smartphone app interface, highlighting features such as sound alerts, two-way talk, and feeding reminders, along with real-time temperature and humidity display.

## Dual-Control Baby Monitor | Mobile & Screen Access

Keep your baby safe and sound—control the monitor anytime, anywhere

### MAINTENANCE

- Cleaning:** Use a soft, dry cloth to clean the camera and monitor surfaces. Do not use abrasive cleaners or solvents.
- Battery Care:** For the monitor's built-in battery, avoid extreme temperatures and prolonged periods of full discharge or full charge to maximize battery lifespan.
- Storage:** If storing the device for an extended period, ensure it is clean, dry, and stored in a cool, dry place.

### TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
No image/signal on monitor	Camera or monitor not powered on. Out of range. Interference. Not paired.	Ensure both units are plugged in and powered on. Move monitor closer to the camera. Move away from other electronic devices. Refer to the quick guide for re-pairing instructions if necessary.
Poor image quality	Low light conditions. Camera lens dirty. Weak signal.	Ensure adequate lighting or rely on night vision. Gently clean the camera lens with a soft cloth. Move monitor closer to the camera.
No audio or distorted audio	Volume too low. Microphone/speaker blocked. Out of range.	Increase monitor volume. Ensure microphone and speaker are clear of obstructions. Move monitor closer to the camera.
App connection issues	Incorrect Wi-Fi password. Not 2.4GHz Wi-Fi. Router issues.	Double-check Wi-Fi password. Ensure you are connecting to a 2.4GHz Wi-Fi network. Restart your Wi-Fi router and try again.

## SPECIFICATIONS

Feature	Detail
Model Number	Baby 7
