6. MAINTENANCE

6.1 General Care

- Keep the projector in a clean, dry environment away from excessive dust, moisture, and extreme temperatures.
- Avoid placing heavy objects on top of the projector.
- Do not block the ventilation openings, as this can lead to overheating.

6.2 Cleaning the Lens

Use a soft, lint-free cloth specifically designed for optical lenses to gently wipe the projector lens. Avoid using abrasive cleaners or excessive force, which can scratch the lens.

6.3 Fan and Ventilation

The projector features a silent cooling system. Periodically check the air vents for dust accumulation. If necessary, use a can of compressed air to gently clear any dust from the vents to maintain optimal airflow and prevent overheating.

7. TROUBLESHOOTING

If you encounter issues with your VUEKIME 4K Portable Projector, please refer to the following common problems and solutions:

Problem	Possible Cause	Solution
No image or blurry image	Power issue, incorrect input source, focus/keystone problem	Ensure power is connected. Check input source. Allow automatic focus/keystone to complete. If still blurry, manually adjust focus if available in settings.
No sound	Volume too low, incorrect audio output, external device issue	Increase projector volume. Check audio settings to ensure internal speakers are selected or external Bluetooth device is properly paired. Verify audio output from the source device.
Wi-Fi/Bluetooth connection unstable	Interference, distance from router, incorrect password	Ensure projector is within range of the router. Reduce interference from other devices. Re-enter Wi-Fi password. Consider using the Ethernet port for a more stable connection.
Streaming apps not working (e.g., Netflix)	App update required, system incompatibility, internet issue	Check for app updates within the projector's app store. Ensure a stable internet connection. Some apps may have specific system requirements; verify compatibility or try reinstalling the app.
Projector overheating	Blocked vents, prolonged use in hot environment	Ensure all ventilation openings are clear. Operate in a well-ventilated area. Turn off the projector and allow it to cool down if it feels excessively hot.
