## SOLRIG 56" (28"x2) x 80" 5 Lites Pocket Door with hardware

# SOLRIG Sliding Pocket Door Instruction Manual

BRAND: SOLRIG

Model: 56" (28"x2) x 80" 5 Lites Pocket Door with hardware

## Introduction

---

This manual provides detailed instructions for the assembly, installation, operation, and maintenance of your SOLRIG Sliding Pocket Door. This space-saving solution features a 5-lite tempered frosted glass panel designed to slide smoothly into a wall, making it suitable for various interior applications such as bathrooms, closets, pantries, and compact living spaces. The door panels are constructed from rigid, warp-resistant MDF, and the glass panels are ANSI-certified shatter-safe, diffusing light while ensuring privacy. Please read all instructions carefully before beginning installation.

## Safety Information

---

- Always wear appropriate safety gear, including gloves and eye protection, during assembly and installation.
- Ensure the installation area is clear of obstructions and electrical wiring.
- Handle glass panels with care to prevent breakage and injury.
- Verify that the wall structure can support the weight of the pocket door and its frame.
- Keep small parts and hardware away from children to prevent choking hazards.
- If you are unsure about any step, consult a qualified professional.

## Package Contents

---

Your SOLRIG Sliding Pocket Door package is shipped in two separate boxes. Please verify all components are present before beginning assembly.

- 8 White MDF Door Slats
- 5 Frosted Tempered Glass Panels

- Frame Kit
- All necessary Hardware for assembly and installation

## Setup and Installation

The SOLRIG Pocket Door is designed for straightforward assembly and installation. The pre-drilled door panels arrive flat and include illustrated instructions to guide you through the process, typically completed in under 30 minutes for the door panel assembly. The door can be painted any color or used with its smooth white primer finish.

### 1. Measure Rough Opening

Accurately measure the rough opening of your door frame to ensure proper fit. Refer to the dimensions table below for guidance.

Figure 2: Overall dimensions and fitting requirements for the pocket door.

### 2. Door Panel Assembly

Assemble the door panels according to the included illustrated instructions. The MDF panels provide a solid core, and the tempered glass offers durability and light diffusion.

Figure 3: Key material features including MDF, waterproof properties, tempered glass, and load-bearing stability.

### 3. Frame and Hardware Installation

Install the frame kit and hardware components. The frame is designed for load-bearing stability and features a fusion of metal and solid wood for robust support.

### Operating Instructions

---

The SOLRIG Sliding Pocket Door operates by sliding horizontally into a wall cavity, effectively disappearing when open. This mechanism maximizes usable floor space compared to traditional hinged doors.

- To open the door, gently push it into the wall cavity until it is fully recessed.
- To close the door, pull it out from the wall cavity until it meets the door jamb.
- Ensure the track is free of debris for smooth operation.

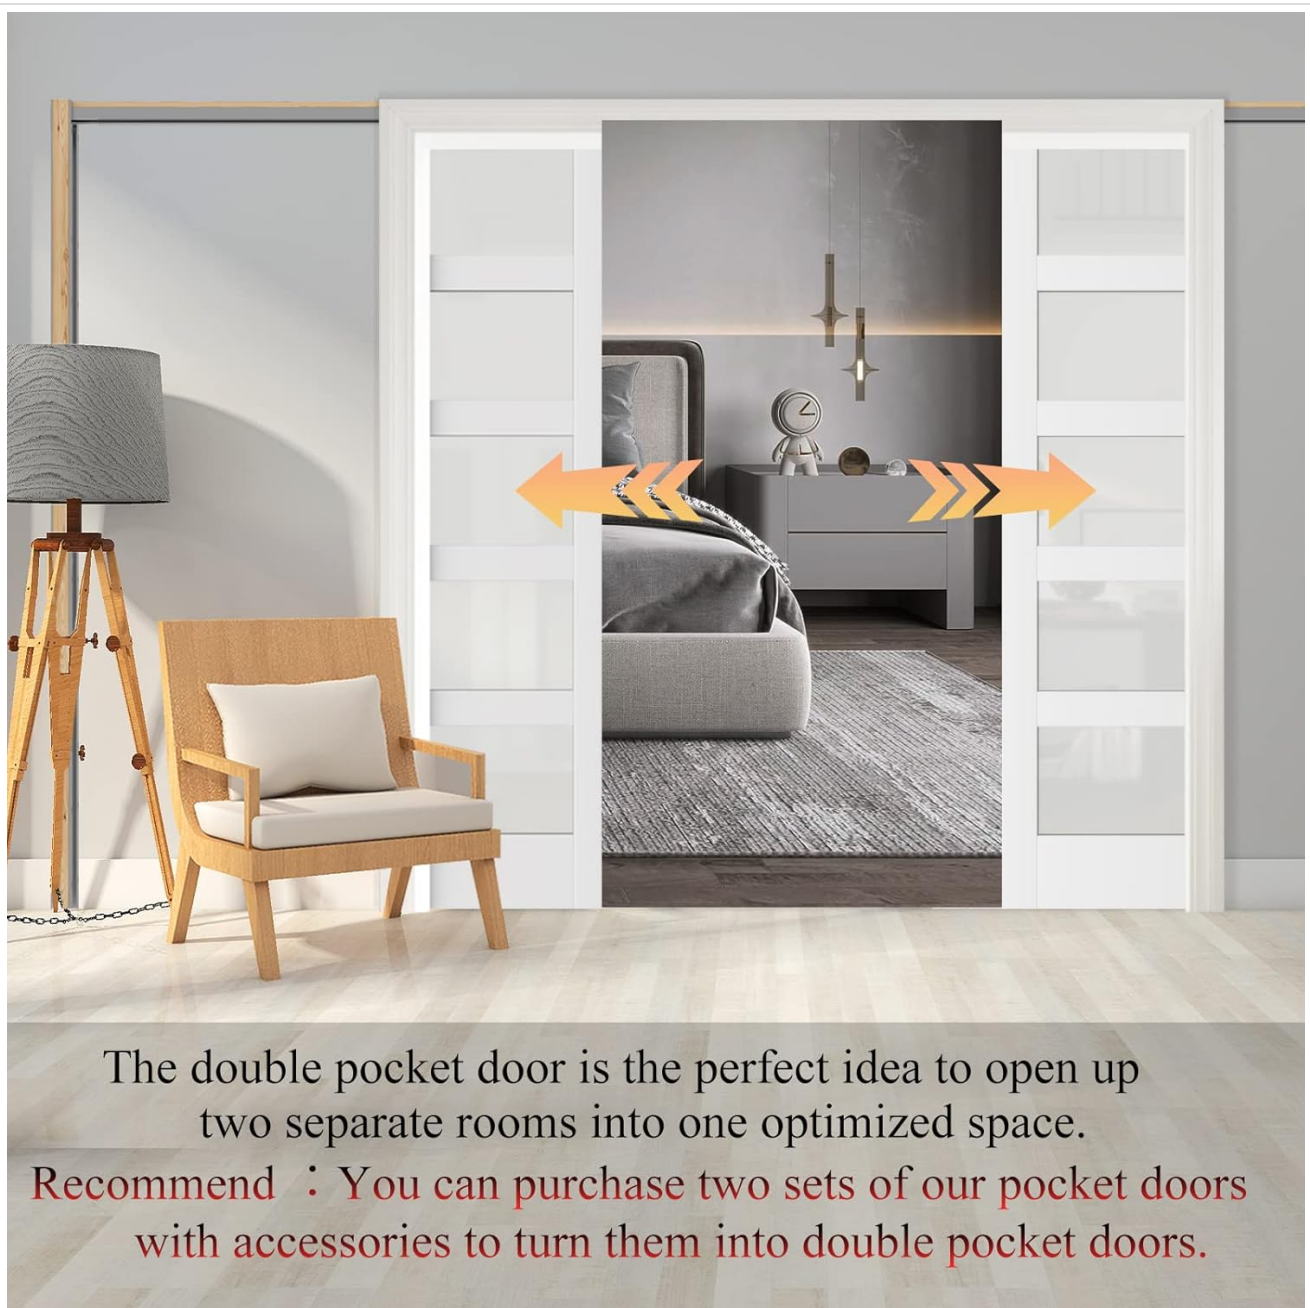

Figure 6: The pocket door fully open and hidden within the wall, maximizing room space.

## Maintenance

Regular maintenance will ensure the longevity and smooth operation of your pocket door.

- **Cleaning:** Wipe down MDF door panels with a soft, damp cloth. For glass panels, use a standard glass cleaner. Avoid abrasive cleaners that may scratch the surface.
- **Track Maintenance:** Periodically inspect the door track for any debris or obstructions. Clean the track as needed to ensure smooth sliding.
- **Hardware Check:** Annually check all screws and hardware for tightness. Tighten any loose fasteners to prevent operational issues.
- **Lubrication:** If the door begins to stick or operate roughly, apply a silicone-based lubricant to the rollers and track.

## Troubleshooting

If you encounter issues with your SOLRIG Pocket Door, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Door sticks or is difficult to slide	Debris in track, worn rollers, misaligned track.	Clean track thoroughly. Inspect and replace worn rollers if necessary. Check track alignment and adjust. Apply silicone lubricant to rollers and track.
Door does not close completely	Obstruction in wall cavity, misaligned door or frame.	Check for obstructions in the wall pocket. Verify door and frame are plumb and level. Adjust as needed.
Door panels appear warped	Improper installation, exposure to excessive moisture.	Ensure proper installation and environmental conditions. If warping is significant, contact customer support.
Missing or damaged parts upon arrival	Shipping damage or packaging error.	Please reach out to our customer service team immediately for a free replacement.

## Specifications

Attribute	Detail
Brand	SOLRIG
Model	56" (28"x2) x 80" 5 Lites Pocket Door with hardware
Product Dimensions	1.38 x 56 x 80 inches
Color	White Primed, 5 Lites Frosted Glass
Style	Modern
Material	MDF Wood, Tempered Frosted Glass
Item Package Quantity	1 (includes two 28"x80" door panels)
