6. TROUBLESHOOTING

If you encounter any issues with your coffee table, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Tabletop is difficult to lift or lower.	Mechanism obstruction; uneven force; mechanism not properly installed.	Ensure no items are blocking the lift mechanism. Apply even pressure with both hands. Recheck assembly of the hydraulic mechanism as per the guide.
Table feels unstable or wobbly.	Loose fasteners; uneven floor; incorrect assembly.	Check and tighten all screws and bolts. Ensure the table is on a level surface. Verify all assembly steps were followed correctly.
Scratches or marks on the surface.	Sharp objects; abrasive cleaning; heavy impact.	Use coasters and placemats. Clean with soft cloths and mild cleaners. While the surface is scratch-resistant, extreme force can still cause damage.
Table slides easily on the floor.	Hard floor surface; lack of grip.	Place a rug underneath the table or apply non-slip furniture pads to the bottom of the legs.

If these solutions do not resolve the issue, please contact WLIVE customer support.
