4. SETUP AND INSTALLATION

The FEELSO Filtered Handheld Shower Head is designed for easy, tool-free installation on any standard G1/2" shower arm.

1. **Remove Old Shower Head:** Unscrew your existing shower head from the shower arm. Clean any residue from the shower arm threads.
2. **Apply Teflon Tape:** Wrap the provided Teflon tape clockwise around the threads of your shower arm 3-5 times.
3. **Connect Shower Bracket:** Screw the adjustable shower bracket onto the shower arm. Hand-tighten firmly.
4. **Attach Shower Hose:** Connect one end of the stainless steel shower hose to the shower bracket. Ensure a rubber washer is inside the hose connector. Hand-tighten.
5. **Attach Shower Head:** Connect the other end of the shower hose to the handheld shower head. Ensure a rubber washer is inside the hose connector. Hand-tighten.
6. **Test for Leaks:** Turn on the water and check all connections for leaks. If leaks occur, tighten connections slightly or reapply Teflon tape.

5. OPERATING INSTRUCTIONS

5.1 Spray Modes

Your FEELSO shower head offers 4 distinct spray modes to customize your shower experience. Rotate the dial on the shower head to switch between modes:

- **Rainfall Mode:** A gentle, wide spray for a relaxing shower.
- **Mist Mode:** A fine, soft mist for a soothing sensation.
- **Mix Mode:** A combination of rainfall and mist for balanced coverage.
- **Power Wash Mode:** Detach the shower head from its handle to activate a high-pressure jet for targeted cleaning.

5.2 One-Touch Pause Button

The integrated one-touch pause button allows you to instantly stop the water flow without adjusting the temperature knobs. Press the 'STOP' button on the handle to pause, and press it again to resume water flow at the preset temperature. This feature is ideal for conserving water while shampooing, shaving, or bathing children and pets.

6. MAINTENANCE

6.1 Filter Replacement

The FEELSO shower head includes a multi-stage filtration system designed to remove chlorine, heavy metals, and other impurities from your water. For optimal performance, the filter cartridge should be replaced every 4-6 months, depending on your local water conditions and usage.

7. TROUBLESHOOTING

- **Low Water Pressure:** Check if the filter cartridge needs replacement. Ensure the hose is not kinked and all connections are tight. Verify that your home's main water supply is fully open.
- **Leaks:** Ensure all connections are hand-tightened. Reapply Teflon tape to threaded connections if necessary. Check that rubber washers are correctly seated in the hose connections.
- **No Water Flow:** Confirm the water supply is on. Check if the one-touch pause button is engaged.
- **Clogged Nozzles:** Rub the silicone nozzles with your finger to clear any mineral deposits.
