4. OPERATING INSTRUCTIONS

4.1 Loading Transfer Paper

Proper paper loading is crucial for clear, wrinkle-free stencils.

1. Prepare your tattoo transfer paper. This typically involves separating the yellow backing paper and the protective sheet from the carbon paper and the top transfer sheet.
2. Insert the transfer paper into the printer's feed slot with the **carbon paper face up**. The printer features an automatic paper feeding mechanism.
3. Ensure the paper is aligned straight to prevent jams and wrinkles.

4.2 Using the TATTMUSE App for Printing

1. **Select or Create Design:** Within the app, choose from the free design library, import your own images, or use the AI-powered design feature.
2. **Edit and Adjust:** Utilize the editing tools to resize, rotate, mirror, or apply filters to convert photos into outlines. The tattoo preview feature allows you to visualize the final stencil.

3. **Print Settings:** Confirm print settings such as density and size. For larger designs, the app can split them into 2-9 parts for multi-sheet printing.

4. **Initiate Print:** Once satisfied with the design and settings, tap the print button in the app. The printer will automatically feed the paper and produce the stencil.

4.3 Applying the Stencil

After printing, carefully remove the stencil from the printer. Trim the stencil if necessary. Apply stencil gel to the skin, then press the stencil firmly onto the prepared area. Remove the stencil to reveal the transfer. Ensure the skin is clean and dry before application.

5. MAINTENANCE

To ensure the longevity and optimal performance of your TATTMUSE A88U printer, follow these maintenance guidelines:

- **Cleaning:** Regularly wipe the exterior of the printer with a soft, dry cloth. For internal cleaning, especially the print head and rollers, refer to the detailed instructions within the app or on the TATTMUSE support website. Ensure the printer is powered off before cleaning.
- **Storage:** Store the printer in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** For extended storage, charge the battery to approximately 50% every few months to maintain battery health.
- **Paper Handling:** Use only high-quality tattoo transfer paper recommended for thermal printers. Store transfer paper in its original packaging to protect it from light and moisture.

6. TROUBLESHOOTING
