SETUP INSTRUCTIONS

1. **Attaching the DJI Osmo Pocket 3/4:**

Carefully align your DJI Osmo Pocket 3 or Pocket 4 with the ULANZI PM01 mount. The mount is designed for a snug fit. Ensure the device is seated correctly within the mount's frame.

Snug Fit, Zero Hassle

It offers a snug fit while keeping
screen rotation, joystick control

2. **Securing the Device:**

Once the camera is in place, engage the safety lock mechanism to prevent accidental detachment. The interior features anti-slip silicone to protect your device from scratches and provide a firm grip.

3. **Magnetic Attachment:**

The PM01 mount features powerful magnets on both sides, allowing it to securely attach to any metallic surface. Ensure the metallic surface is clean and flat for optimal magnetic adhesion. The recommended maximum load capacity for magnetic attachment is 500g (1.1 lbs). The mount also features a magnetic surface to attach compatible accessories like magnetic phone holders.

Powerful Grip on Both Sides

Dual-sided magnetic design keeps your phone and accessories firmly in place,

MAINTENANCE

- Keep the mount clean and free from dust and debris. Use a soft, dry cloth for cleaning.
- Ensure the magnetic surfaces are clean to maintain strong adhesion.
- Avoid exposing the mount to extreme temperatures or harsh chemicals.
- Store the mount in a dry place when not in use.

TROUBLESHOOTING

- **Device not secure in mount:**

Ensure the DJI Osmo Pocket 3/4 is fully seated and the safety lock is engaged. Check for any obstructions preventing a snug fit.

- **Magnetic attachment is weak:**

Verify that both the mount's magnetic surface and the metallic surface it's attaching to are clean and free of dust or particles. Ensure the metallic surface is ferrous (attracts magnets) and flat.

- **Accessories do not fit expansion ports:**

Confirm that your accessory is compatible with the cold shoe, 1/4-inch screw thread, or ARRI positioning hole. Some accessories may require specific adapters.
