eeTao 42V Replacement Power Adapter User Manual

For VOLPAM Q1 Electric Scooter 36V 5.2AH Lithium Ion Battery

INTRODUCTION

This user manual provides essential information for the safe and effective use of your eeTao 42V Replacement Power Adapter. This adapter is specifically designed for compatibility with the VOLPAM Q1 Electric Scooter's 36V 5.2AH Lithium Ion Battery. Please read this manual thoroughly before use and retain it for future reference.

Figure 1: The eeTao 42V Replacement Power Adapter, showing the main unit and DC output cable.

Key Features:

- **Input Voltage:** World Wide Input Voltage 100-240VAC 50/60Hz.
- **Output Voltage:** DC42V.
- **Safety Protections:** OVP (Over Voltage output Protection), OCP (Over Current output Protection), SCP (Short Circuit output Protection).
- **Compatibility:** Designed for VOLPAM Q1 Electric Scooter 36V 5.2AH Lithium Ion Battery.

Security Protection

Multiple professional protection, so that fast charge more safe

Figure 2: Diagram illustrating the multiple security protection features of the power adapter, including temperature, overcharge, short circuit, anti-interference, and lightning protection.

SETUP INSTRUCTIONS

Follow these steps to properly set up your eeTao 42V Replacement Power Adapter:

1. **Unpack the Adapter:** Carefully remove the power adapter from its packaging. Inspect it for any signs of damage.
2. **Verify Compatibility:** Ensure that your electric scooter is a VOLPAM Q1 model with a 36V 5.2AH Lithium Ion

Battery. This adapter is specifically designed for this model.

3. **Connect to Power Outlet:** Plug the AC input end of the power adapter into a standard 100-240VAC 50/60Hz wall outlet.
4. **Connect to Scooter:** Locate the charging port on your VOLPAM Q1 Electric Scooter. Insert the DC output connector of the power adapter firmly into the scooter's charging port.

Important Safety Note: Always ensure the adapter is connected to a stable power source and that the scooter's charging port is clean and free of debris before connecting.

OPERATING INSTRUCTIONS

Once the adapter is properly connected, the charging process will begin automatically.

- **Charging Indicator:** The power adapter features an LED indicator light to show the charging status.
- **Red Light:** A red indicator light signifies that the battery is currently charging.
- **Green Light:** A green indicator light indicates that the battery charging process is complete.

**Green light
finished**

Figure 4: Close-up view of the power adapter's indicator light, showing a red light when charging and a green light when charging is complete.

Charging Duration: The time required to fully charge the scooter's battery will vary depending on the battery's current charge level. Always wait for the indicator light to turn green before disconnecting.

Safety Precautions During Charging:

- Do not cover the adapter during charging to ensure proper ventilation.
- Charge in a well-ventilated area, away from flammable materials.
- Avoid exposing the adapter to water or extreme temperatures.
- Disconnect the adapter from the wall outlet and the scooter once charging is complete.

MAINTENANCE

Proper maintenance will extend the life of your power adapter:

- **Cleaning:** Use a dry, soft cloth to clean the adapter. Do not use liquid cleaners or solvents.

- **Storage:** When not in use, store the adapter in a cool, dry place, away from direct sunlight and moisture.
- **Cable Care:** Avoid bending or kinking the power cord excessively. Do not place heavy objects on the cord.
- **Battery Life:** Rechargeable batteries are not permanent and typically have an average lifespan of 1 to 3 years. If the scooter's battery is damaged, it may not be able to charge properly, even with a functional adapter.

TROUBLESHOOTING

If you encounter issues with your power adapter, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Adapter not charging / No indicator light	<ul style="list-style-type: none"> Loose connection No power from outlet Damaged adapter/cable Scooter battery issue 	<ul style="list-style-type: none"> Ensure all connections are secure. Test the outlet with another device. Inspect adapter and cable for visible damage. If damaged, discontinue use. Verify the scooter's battery health. A damaged battery will not charge.
Red light stays on indefinitely	<ul style="list-style-type: none"> Battery not fully charged Battery issue 	<ul style="list-style-type: none"> Allow more time for charging. If charging time is excessive, the scooter's battery may be faulty or nearing end-of-life.
Adapter gets unusually hot	<ul style="list-style-type: none"> Poor ventilation Overload or internal fault 	<ul style="list-style-type: none"> Ensure the adapter is in a well-ventilated area. Disconnect immediately. If the issue persists, the adapter may be faulty and should be replaced.

The adapter is equipped with OVP, OCP, and SCP protections. If these protections are triggered, the adapter may temporarily stop functioning. Disconnect and reconnect to reset, but if the issue persists, seek professional assistance or consider replacement.

PRODUCT SPECIFICATIONS

Detailed specifications for the eeTao 42V Replacement Power Adapter:

Feature	Detail
Brand	eeTao
Model Number	VOLPAM Q1 42V Charger
Product Dimensions	6 x 4 x 2 inches
Item Weight	10 ounces
Input Voltage	100-240VAC, 50/60Hz
Output Voltage	DC42V
Output Current	1.5 Amps
Wattage	63 watts
Connector Type	Barrel
Compatible Devices	VOLPAM Q1 Electric Scooter (36V 5.2AH Lithium Ion Battery)

Feature	Detail
Special Features	OVP, OCP, SCP Protection (Over Voltage, Over Current, Short Circuit Protection)
Included Components	1 adapter
