

## Avylet 8b5cab4c-aa70-44f5-9a2c-e59ca4966815

# Avylet 8.1" Carplay & Android Auto Display

## USER INSTRUCTION MANUAL

Model: 8b5cab4c-aa70-44f5-9a2c-e59ca4966815

### Introduction

---

Thank you for choosing the Avylet 8.1" Carplay & Android Auto Display. This device is designed to enhance your driving experience by providing seamless smartphone integration, navigation, entertainment, and communication features directly on your dashboard. This manual provides detailed instructions for installation, operation, maintenance, and troubleshooting to ensure optimal performance and longevity of your device.

### Safety Information

---

Please read all safety warnings and instructions carefully before using this product. Failure to follow these instructions may result in electric shock, fire, and/or serious injury.

- Do not attempt to disassemble, repair, or modify the device. This may cause damage, fire, or electric shock.
- Ensure the device is securely mounted and does not obstruct your view or interfere with vehicle controls.
- Operate the device only when it is safe to do so and does not distract you from driving.
- Avoid exposing the device to extreme temperatures, direct sunlight for prolonged periods, or excessive moisture.
- Use only the provided power cable and accessories.

### Package Contents

---

Verify that all items are present in your package:

- Avylet 8.1" Carplay & Android Auto Display Unit
- Magnetic Mount (Dashboard/Windshield)
- Power Cable
- User Manual (this document)
- Optional: Reversing Camera (if included in your specific package)

## Setup and Installation

---

The Avylet display is designed for effortless installation without requiring removal of your original car radio.

### 1. Mounting the Device

The magnetic mount provides secure attachment to your dashboard or windshield.

1. Choose a suitable location on your dashboard or windshield that does not obstruct your view or interfere with airbags.
2. Clean the mounting surface thoroughly to ensure strong adhesion.
3. Attach the magnetic mount to the chosen surface. The mount features 360° rotation and a 180° adjustable handle for optimal positioning.
4. Securely attach the Avylet display unit to the magnetic mount. The magnetic connection allows for easy attachment and detachment for anti-theft security.

## 2. Power Connection

Connect the provided power cable to the display unit and then to your vehicle's power outlet (e.g., cigarette lighter socket).

## Operating Instructions

### Seamless Connectivity with Apple CarPlay & Android Auto

Connect your smartphone to the 8.1-inch display for easy access to navigation, music, and calls. Once paired, the device will auto-connect every time you enter your car, eliminating the need for reconfiguration.

- Ensure your phone's Bluetooth and Wi-Fi are enabled.
- On the Avylet display, select either CarPlay or Android Auto.
- Follow the on-screen prompts to pair your smartphone.

### Super Link & Mirror Link

After connecting your phone to the CarPlay WiFi, you can utilize AirPlay and Super Link features. Mirror your phone screen to the 8.1-inch 1600x900 HD display for a larger, clearer view. Super Link touch control allows you to operate content directly, turn off your phone screen, or multitask with ease. You can also mirror your phone screen to the device and play AirDrop photos or videos. (Note: In iOS mode, control is limited to the phone itself).

### Portrait & Landscape Mode Support

The Avylet CarPlay screen allows for flexible switching between portrait and landscape modes. Adjust the screen orientation for optimal visibility, whether you are using navigation, music, or other applications.

# Free Switch Between Landscape and Portrait Screen

Switch between landscape and portrait mode easily to suit your needs, avoiding obstruction of your driving view and enhancing your user experience.

### Voice Control & GPS Navigation

Utilize CarPlay or Android Auto for hands-free calls, messages, and navigation. Voice control ensures safe, distraction-free driving.

- Activate your phone's voice assistant (Siri for iOS, Google Assistant for Android) through the display.
- Issue commands for navigation, making calls, sending messages, or playing music.

# Voice Control & GPS Navigation

Use CarPlay or Android Auto for calls, messages and navigation with voice control to ensure safe, distraction-free driving.

Hey, Siri, send the message to Tom.

Hey Siri, navigate to nearest supermarket

Hey Google, call Dad

## Audio Output Options

The Avylet display offers multiple ways to output audio:

- **Built-in Speaker:** For personal listening directly from the unit.
- **Bluetooth to Car Speakers:** Connect wirelessly to your car's audio system.
- **Speakers via FM Sync:** Transmit audio to your car speakers by tuning your car radio to a specific FM frequency.
- **Speakers via AUX:** Connect using an AUX cable for a wired audio connection to your car's audio input.

# Four Ways to Output Audio

Play audio through the built-in speaker for personal listening, or transmit it to the car speakers for a louder, immersive experience.

## Maintenance

To ensure the longevity and optimal performance of your Avylet display, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry, lint-free cloth to clean the screen and exterior. For stubborn smudges, slightly dampen the cloth with water or a screen cleaner. Avoid abrasive cleaners or solvents.
- **Storage:** If storing the device for an extended period, detach it from the magnetic mount and store it in a cool, dry place away from direct sunlight.

- **Cable Care:** Handle power cables and connectors gently to prevent damage.

## Troubleshooting

---

If you encounter issues with your Avylet display, refer to the following common solutions:

| Problem                              | Possible Solution  |
|--------------------------------------|--|
| Device does not power on.            | <ul style="list-style-type: none"><li>◦ Check if the power cable is securely connected to both the device and the car's power outlet.</li><li>◦ Ensure the car's power outlet is functioning (e.g., test with another device).</li></ul>   |
| CarPlay/Android Auto not connecting. | <ul style="list-style-type: none"><li>◦ Ensure Bluetooth and Wi-Fi are enabled on your smartphone.</li><li>◦ Forget the device in your phone's Bluetooth settings and re-pair.</li><li>◦ Restart both the Avylet display and your smartphone.</li></ul>  |
| No audio output.                     | <ul style="list-style-type: none"><li>◦ Check the selected audio output method (built-in speaker, Bluetooth, FM, AUX).</li><li>◦ If using FM, ensure your car radio is tuned to the correct frequency and there is no interference.</li><li>◦ If using AUX, ensure the cable is properly connected and your car's audio input is selected.</li></ul> |
| Screen is unresponsive.              | <ul style="list-style-type: none"><li>◦ Perform a soft reset by disconnecting and reconnecting the power.</li><li>◦ Ensure the screen is clean and free of debris.</li></ul>   |

## OTA Upgrade

---

The Avylet CarPlay screen supports Over-the-Air (OTA) updates. This feature allows you to keep your device's firmware current, ensuring you receive new features, improved functions, and enhanced performance without manual intervention.

1. Ensure your device is connected to a stable Wi-Fi network.
2. Activate Super Link mode (if required by the device for updates).
3. Navigate to the system settings on your Avylet display and look for an "OTA Update" or "System Update" option.
4. Follow the on-screen prompts to download and install any available updates. Do not power off the device during the update process.

# OTA Upgrade

Regularly upgrade firmware to ensure software is up-to-date and enhance user experience.
