4.2. Connecting via Bluetooth 5.3

Use Bluetooth for mobile devices, tablets, and laptops.

1. Ensure the headset is powered on.
2. Slide the connection mode switch on the headset to the 'BT' (Bluetooth) position. The LED indicator will flash blue, indicating pairing mode.
3. On your device (phone, tablet, laptop), go to Bluetooth settings and search for 'Captain 780'.
4. Select 'Captain 780' to pair. The LED indicator will turn solid blue upon successful connection.

4.3. Connecting via Wired (3.5mm Audio Cable)

For devices that support a 3.5mm audio jack, such as Xbox controllers or when battery is low.

1. Connect one end of the 3.5mm audio cable to the headset's 3.5mm port.
2. Connect the other end to the 3.5mm audio jack on your device.
3. The headset will automatically switch to wired mode.

7. TROUBLESHOOTING

7.1. No Sound or Low Volume

- Ensure the headset is powered on and connected correctly (2.4GHz, Bluetooth, or wired).
- Check the volume wheel on the headset and the volume settings on your connected device.
- If using 2.4GHz wireless, ensure the USB dongle is securely plugged in and recognized by your device.

7.2. Microphone Not Working

- Ensure the microphone is flipped down and not muted via the power/mute button.

- Check the microphone input settings on your connected device. Select 'Captain 780' as the input device.
- For Nintendo Switch in wired mode, microphone functionality may be limited.

7.3. Connection Issues

- **2.4GHz:** Ensure the dongle is within range and there are no major obstructions. Try re-pairing by turning the headset off and on, and re-inserting the dongle.
- **Bluetooth:** Ensure Bluetooth is enabled on your device and the headset is in pairing mode. Forget the device in your Bluetooth settings and try pairing again.

7.4. Echo in Microphone

If you experience an echo in the microphone, especially on PC, it might be due to a monitoring function being enabled. Follow the steps in the video below to adjust your sound settings.
