

MOTOQUEEN MQ11501ABW1

MOTOQUEEN Mounting Bracket Set for Govee H705 and H706 Permanent Outdoor Lights

Model: MQ11501ABW1

INTRODUCTION

This manual provides instructions for the installation and maintenance of the MOTOQUEEN Mounting Bracket Set, designed specifically for the Govee H705 and H706 Permanent Outdoor Lights' power supply and controller units. These brackets offer a secure and durable solution for mounting your Govee lighting components.

SAFETY INFORMATION

- Always use appropriate safety gear, including eye protection, when drilling or working with tools.
- Ensure the mounting surface is structurally sound and can support the weight of the brackets and devices.
- Disconnect power to the Govee lights before installation to prevent electrical hazards.
- Use only recommended screws (bevel head screws, not included) for secure installation.

PACKAGE CONTENTS

- 1 x Mounting Bracket for Power Supply
- 1 x Mounting Bracket for Controller

Note: Mounting screws and hardware are not included and must be purchased separately. Compatible with standard #8 bevel head screws.

SPECIFICATIONS

Brand	MOTOQUEEN
Model Number	MQ11501ABW1
Material	Polyvinyl Chloride (PVC)
Mounting Type	Wall Mount
Product Dimensions	5.9 x 3.9 x 1.94 inches
Item Weight	3.52 ounces
Color	White

Compatibility

Govee H705 and H706 Permanent Outdoor Lights (Power Supply and Controller)

INDUSTRIAL-GRADE POLYMER

Engineered For Permanent Outdoor Use

✓ -40°F to 150°F Range

✓ UV-Resistant Plastic

INSTALLATION INSTRUCTIONS

Follow these steps for a secure installation of your MOTOQUEEN mounting brackets.

Step 1: Prepare the Govee Units

For optimal fit and to prevent damage to the brackets, it is recommended to **remove any existing 3M adhesive pads** from the back of your Govee H705/H706 power supply and controller units before attempting to insert them into the brackets. This ensures a proper and secure fit.

Step 2: Choose Mounting Location and Orientation

The brackets are designed for flexible installation. You can mount them vertically or horizontally under an eave, next to the eave, on soffits, or fascia. Select a location that provides easy access for wiring and protection from direct elements if possible.

FLEXIBLE MOUNTING OPTIONS

For Eaves, Soffits & Fascia

- ✓ Vertical/Horizontal Mount
- ✓ Under Eave Installation
- ✓ Sidewall Attachment

Image: Depicts various flexible mounting options for the brackets, including vertical/horizontal mount, under eave installation, and sidewall attachment.

Step 3: Mount the Brackets

1. Position the appropriate bracket (power supply or controller) at your desired mounting location.
2. Mark the screw hole positions on the mounting surface.
3. Drill pilot holes if necessary, suitable for #8 bevel head screws.
4. Securely fasten the bracket to the surface using bevel head screws (not included). Ensure the bracket is firmly attached and does not wobble.

3-STEP INSTALLATION

Compatible With Standard #8 Screws

- ✓ Position Bracket For Govee Unit
- ✓ Secure with Bevel Head Screws
- ✓ Slide Device into Locking Slot

Image: Illustrates the 3-step installation process: position bracket, secure with screws, and slide device into place.

Step 4: Insert Govee Units

Once the brackets are securely mounted, carefully slide the Govee power supply and controller units into their respective brackets. The design allows for easy insertion and removal while providing a secure hold.

Image: Shows the Govee H705/H706 power supply and controller units securely mounted in the MOTOQUEEN brackets on a house exterior.

MAINTENANCE

- **Cleaning:** Wipe the brackets periodically with a damp cloth to remove dust and debris. Avoid harsh chemicals that may damage the plastic.
- **Inspection:** Annually inspect the brackets and mounting screws for any signs of wear, damage, or loosening. Tighten screws if necessary.
- **Environmental Factors:** While designed for outdoor use, extreme weather conditions may accelerate wear. Consider additional protection if exposed to severe elements.

TROUBLESHOOTING

Issue: Govee unit does not fit into the bracket or is too tight.

Solution: Ensure that any existing 3M adhesive pads on the back of the Govee power supply or controller have been completely removed. The brackets are designed for a snug fit without these pads. Do not force the unit into the bracket, as this may cause damage to either the unit or the bracket.

Issue: Bracket feels loose after installation.

Solution: Re-check the mounting screws. Ensure they are securely tightened and that the mounting surface is solid. If the surface is soft or damaged, consider relocating the bracket or reinforcing the mounting area.

WARRANTY AND SUPPORT

For warranty information or technical support, please refer to the MOTOQUEEN official website or contact their customer service directly. Keep your purchase receipt for warranty claims.
