5. Setup

5.1 Initial Connection

1. **Unpack:** Carefully remove the PC and all accessories from the packaging.
2. **Placement:** Place the PC on a flat, stable surface with good airflow.
3. **Monitor:** Connect your monitor to the graphics card's DisplayPort or HDMI output on the rear panel.
4. **Keyboard & Mouse:** Connect the included keyboard and mouse to any available USB ports.
5. **Network:** For a wired connection, connect an Ethernet cable to the RJ-45 port. For Wi-Fi, ensure the Wi-Fi antenna (if included) is attached.
6. **Power:** Connect the power cable to the PC's power input and then to a wall outlet or surge protector.

5.2 Power On

Press the power button on the front panel of the PC. The system will boot up, and you will see the Windows 11 Home setup screen or desktop.

6. Operating

6.1 Windows 11 Home

Your PC comes with Windows 11 Home pre-installed. Follow the on-screen instructions for initial setup, including creating a user account and connecting to a network.

6.2 Connectivity

- **Wired Network:** Connect an Ethernet cable to the RJ-45 port for a stable internet connection.
- **Wi-Fi:** Your system is Wi-Fi Ready. To connect to a wireless network, go to Windows Settings > Network & internet > Wi-Fi, and select your desired network.
- **USB Devices:** Use the available USB 3.1 ports for high-speed data transfer with compatible devices.

6.3 RGB Lighting Control

The PC features customizable RGB lighting for its fans and internal components. Control software for RGB lighting may be pre-installed or available for download from the iBUYPOWER website. Refer to the software's instructions for specific customization options.

7. Maintenance

7.1 Cleaning

- **Exterior:** Use a soft, damp cloth to clean the exterior surfaces. Avoid harsh chemicals.
- **Dust:** Periodically use compressed air to clear dust from fan vents and internal components. Ensure the PC is powered off and unplugged before cleaning.

7.2 Software Updates

Regularly update your operating system, drivers, and security software to ensure optimal performance and protection. Windows Update can be accessed via Settings > Windows Update.

8. Troubleshooting

If you encounter issues, refer to the following common solutions:

- **No Power:** Check all power cable connections. Ensure the power supply switch (if present) is in the 'ON' position.
- **No Display:** Verify that the monitor is connected to the graphics card's output, not the motherboard's integrated graphics ports. Ensure the monitor is powered on and set to the correct input.
- **System Slowdown:** Check for background applications, malware, or insufficient storage space. Ensure drivers are up to date.
- **Peripheral Not Working:** Try connecting the peripheral to a different USB port. Reinstall or update drivers for the peripheral.
