## OPERATING INSTRUCTIONS

### Temperature Control

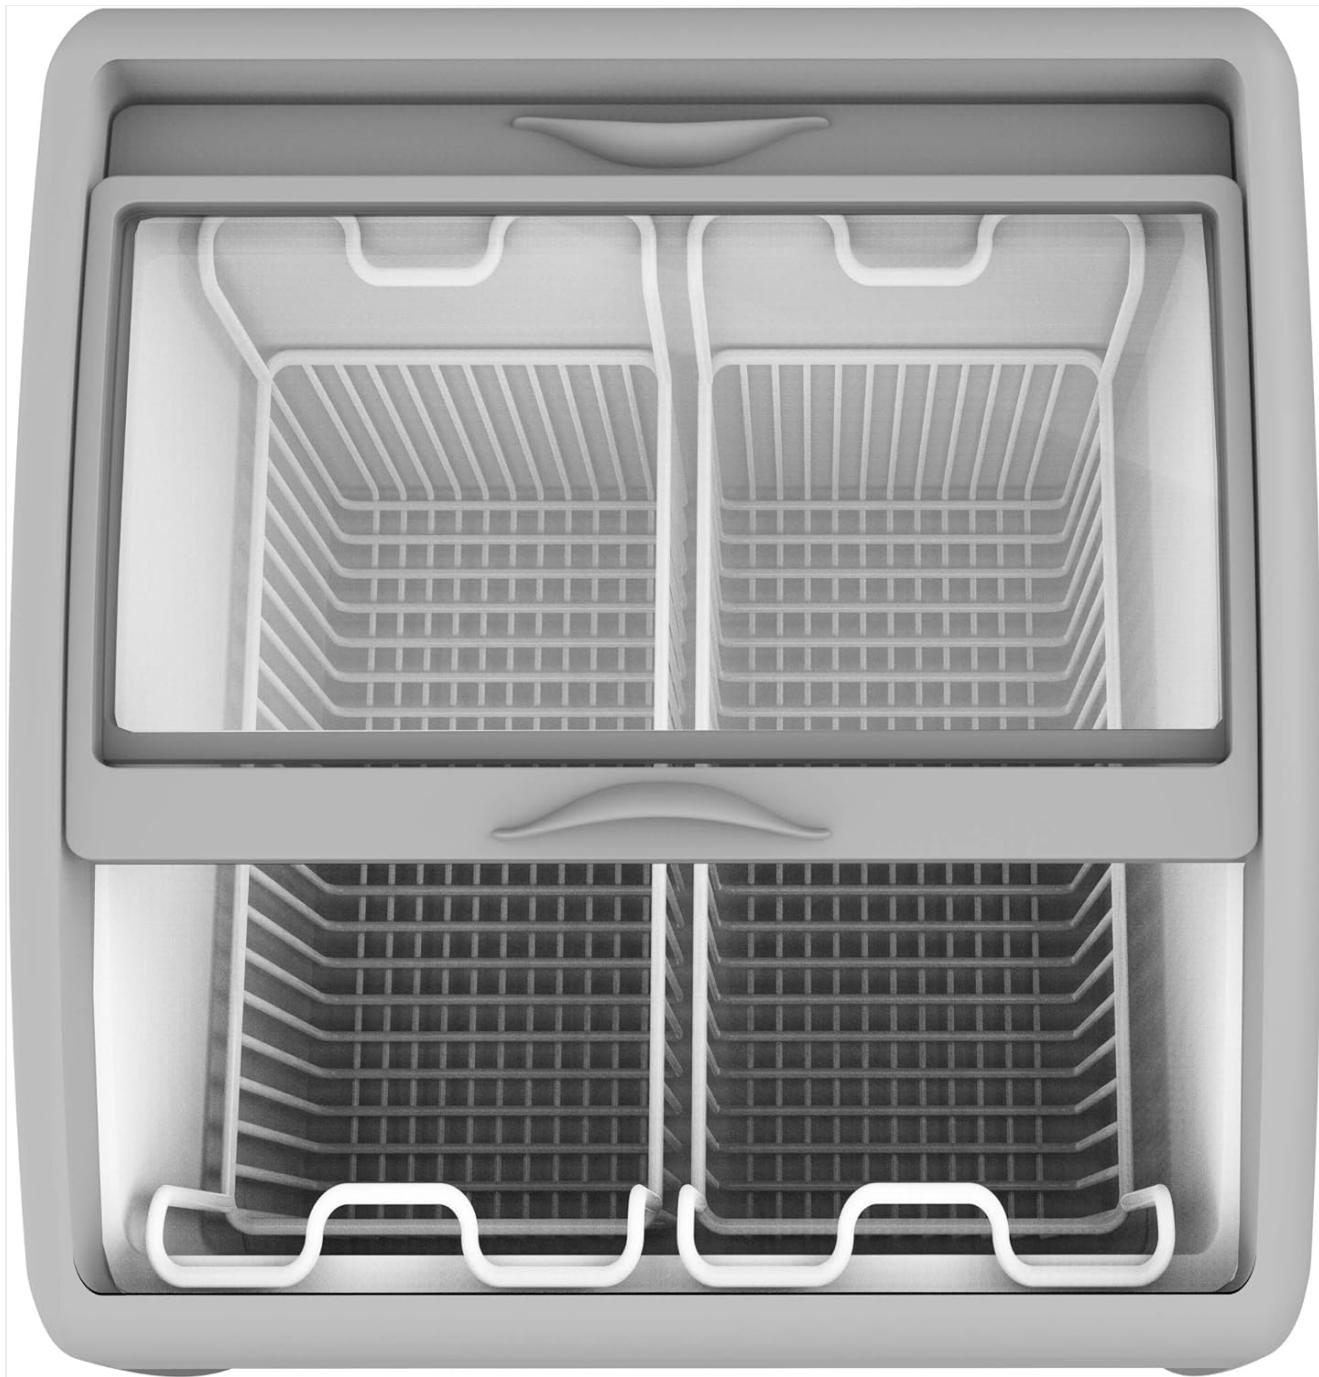

The freezer features a front-facing temperature control to prevent accidental adjustments. The ideal operating temperature range for ice cream is between -15°F and 10°F. Adjust the thermostat knob to achieve the desired temperature. Lower settings result in colder temperatures.

### Loading the Freezer

Arrange products within the freezer using the provided baskets. Do not overload the freezer, as this can restrict air circulation and affect cooling efficiency. Ensure the sliding lids are properly closed after each use to maintain temperature.

## MAINTENANCE

### Cleaning

Regular cleaning is essential for hygiene and efficiency. Unplug the unit before cleaning. Use a mild detergent and warm water to clean the interior and exterior surfaces. Avoid abrasive cleaners or sharp objects that could damage the surfaces. The removable baskets can be washed separately.

### Defrosting

This unit features manual defrost. Frost buildup on the interior walls can reduce cooling efficiency. Defrost the

freezer when the frost layer reaches approximately 1/4 inch thickness. To defrost, unplug the unit, remove all contents, and leave the lids open. Place towels or a shallow pan to collect melted ice. Once defrosted, clean and dry the interior thoroughly before restarting the unit.
