## 7. TROUBLESHOOTING

---

This section addresses common issues you might encounter with your wardrobe.

## 7.1 Door Gap Adjustment

If the wardrobe doors do not align perfectly or have uneven gaps, adjustments can be made using the concealed hinges.

- 1. Adjusting Gap Between Door and Cabinet:** Use an eccentric screw on the hinge to adjust the horizontal gap. Turning the screw clockwise or counter-clockwise will move the door closer to or further from the cabinet frame.
- 2. Adjusting Door Overlay (Left/Right):** The alignment of the door overlay can be adjusted by turning the front screw on the hinge. Turning it left or right will shift the door horizontally.
- 3. Adjusting Door Height:** The door's vertical position can be adjusted by loosening the mounting plate screws, repositioning the door, and then retightening the screws.
