For Kuga (2006-2011)

Can be installed

Cannot be installed

Figure 2: Adaptable Vehicle Models and Dashboard Compatibility.

Compatible Vehicle Models:

- Ford Focus II (2008-2011)
- Ford Mondeo 9 (2008-2011)
- Ford C-Max (2008-2011)
- Ford S-Max (2008-2011)

- Ford Galaxy II (2006-2011)
- Ford Kuga (2006-2011)

Important: Please verify your vehicle's dashboard configuration matches the compatible example shown in Figure 2 before attempting installation.

PRODUCT CONTENTS

The package includes the following components:

Split Screen & Product List

Figure 3: Included Product Components.

- Main Android Car Radio Unit
- Power Cable
- Canbus Decoder Box
- RCA Cable Set
- User Manual (this document)
- Rear Camera (if included in your specific package)

- Adapter Antenna
- External Microphone (MIC)
- GPS Antenna
- USB Cable

Note: Some accessories, such as the rear camera, may vary based on the specific product variant purchased.

SETUP AND INSTALLATION

Professional installation is recommended for this product. Incorrect installation can lead to damage to the unit or your vehicle's electrical system. Always disconnect the vehicle's battery before beginning installation.

Basic Installation Steps:

1. **Preparation:** Ensure the vehicle's ignition is off and the battery is disconnected. Remove the existing car radio unit from your dashboard.
2. **Wiring Connection:**
 - Connect the provided Power Cable to the car radio and the vehicle's wiring harness.
 - Connect the Canbus decoder box to the appropriate harness to ensure steering wheel control and other vehicle data integration.
 - Connect the RCA cables for audio output, auxiliary input, or external amplifiers if applicable.
 - Connect the GPS Antenna and position it in a location with a clear view of the sky (e.g., on the dashboard).
 - Connect the external Microphone for hands-free calling.
 - If installing a rear camera, route the camera cable to the back of the vehicle and connect it to the designated input on the radio.
 - Connect any USB cables for external devices.
3. **Mounting:** Carefully insert the new Android Car Radio into the dashboard opening, ensuring all cables are not pinched. Secure the unit using the vehicle's mounting brackets or screws.
4. **Testing:** Reconnect the vehicle's battery. Turn on the ignition and power on the car radio. Test all functions, including audio, touch screen, GPS, Bluetooth, and camera (if installed).
5. **Final Assembly:** Reassemble any dashboard trim panels removed during installation.

For detailed wiring diagrams and specific vehicle instructions, refer to the supplementary installation guide or consult a professional installer.

OPERATING INSTRUCTIONS

1. Wireless & Wired Connectivity (Carplay / Android Auto / Mirror Link)

Wireless & Wired

Carplay / Android Auto / Mirror Link

Carplay

BT / USB Connection

Android Auto

BT / USB Connection

Mirror Link

WiFi / USB Connection

Figure 4: Wireless & Wired Carplay / Android Auto / Mirror Link Interfaces.

- **Wireless Carplay / Android Auto:** Connect your compatible iPhone or Android phone wirelessly via Bluetooth and Wi-Fi. Follow the on-screen prompts to pair your device. This allows access to navigation, music, calls, and messages directly from the car radio display.
- **Wired Carplay / Android Auto:** Connect your phone via a USB cable to enable wired Carplay or Android Auto.
- **Mirror Link:** Use Mirror Link (via Wi-Fi or USB) to display your smartphone's screen directly on the car radio. This feature allows you to mirror content from your phone.

2. GPS Navigation & Wi-Fi

Figure 5: GPS Navigation and Wi-Fi Functionality.

- **GPS Navigation:** The unit comes with a built-in GPS module and supports various navigation applications. Ensure the GPS antenna is properly installed for optimal signal reception.
- **Wi-Fi Connectivity:** Connect the unit to a Wi-Fi hotspot (e.g., from your smartphone or a portable hotspot) to access online features, download apps, and stream content.

3. Bluetooth Functionality

Figure 6: Bluetooth, FM/RDS Radio, EQ, and SWC Features.

- **Hands-Free Calling:** Pair your smartphone via Bluetooth to make and receive calls directly through the car radio. Use the external microphone for clear voice transmission.
- **Bluetooth Music Streaming:** Stream audio from your paired smartphone to the car radio for wireless music playback.

4. FM/RDS Radio

- Tune into your favorite FM radio stations. The Radio Data System (RDS) feature displays station information, song titles, and other relevant data where available.

5. Audio Equalizer (EQ)

- Adjust the audio output to your preference using the built-in equalizer. Select from preset modes or customize frequency bands for optimal sound quality.

6. Steering Wheel Control (SWC)

- If your vehicle supports it and the Canbus is correctly connected, you can control basic functions of the car radio (e.g., volume, track skip, mode) directly from your steering wheel buttons.

7. AHD Rear Camera & DVR Support

AHD Rear Camera & Supports DVR

Figure 7: AHD Rear Camera and DVR Support.

- **AHD Rear Camera:** The unit supports AHD (Analog High Definition) rear cameras, providing a clear view when reversing. The screen automatically switches to the camera view when the vehicle is put into reverse gear.
- **DVR Support:** The unit can connect to an external Digital Video Recorder (DVR) (not included) to record front-facing video, which can be useful for accident evidence or scenic drives.

8. Split Screen Functionality

- The split-screen feature allows you to run two applications simultaneously on the display, such as navigation on one side and music playback on the other.

MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior of the unit. Avoid using abrasive cleaners or solvents, which can damage the surface.
- **Software Updates:** Periodically check the manufacturer's website or the unit's settings for available software updates to ensure optimal performance and access to new features.
- **Temperature:** Avoid exposing the unit to extreme temperatures, direct sunlight for prolonged periods, or high humidity.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Unit does not power on.	Loose power connection, blown fuse, vehicle battery issue.	Check power cable connections. Inspect vehicle's fuse box for blown fuses. Ensure vehicle battery is charged.
No sound.	Volume too low, mute activated, speaker wiring issue, incorrect audio source.	Increase volume. Check if mute is on. Verify speaker connections. Select correct audio source.
GPS signal lost or inaccurate.	GPS antenna improperly placed or disconnected, environmental interference.	Ensure GPS antenna has a clear view of the sky and is securely connected. Move vehicle to an open area.
Bluetooth pairing failed.	Bluetooth not enabled on phone/unit, incorrect pairing mode, interference.	Ensure Bluetooth is enabled on both devices. Put unit in pairing mode. Restart both devices.
Touch screen unresponsive.	Software glitch, physical damage.	Restart the unit (turn off vehicle ignition and restart). If issue persists, contact support.

If you encounter issues not listed here or if the suggested solutions do not resolve the problem, please contact customer support.
