Vacbird X8-3H-NZ-us

Vacbird Rechargeable Wireless Pump Travel Storage Bags Set

Model: X8-3H-NZ-us

1. IMPORTANT SAFETY INFORMATION

Please read all instructions carefully before using the Vacbird Rechargeable Wireless Pump Travel Storage Bags Set. Retain this manual for future reference.

- Do not immerse the wireless pump in water or any other liquid.
- Keep the pump away from heat sources and direct sunlight.
- Do not attempt to disassemble or repair the pump. Contact customer support for assistance.
- Ensure the charging port is dry before connecting the USB-C cable.
- Keep storage bags away from sharp objects to prevent punctures.
- Do not store food, liquids, or live animals in the vacuum bags.
- This product is not a toy. Keep out of reach of children.

2. PACKAGE CONTENTS

Verify that all items are present in your package:

PACKAGE INCLUDES

Image: Overview of the Vacbird Rechargeable Wireless Pump Travel Storage Bags Set, showing the wireless pump, three sizes of storage bags (Large, Medium, Small), a vacuum bag user manual, a USB-C charging cable, a vacuum pump user manual, and a travel pouch.

- 1 x Wireless Vacuum Pump (1800mAh)
- 15 x Storage Bags (6 x 20" Small, 6 x 24" Medium, 3 x 28" Large)
- 1 x USB-C Charging Cable
- 1 x Travel Pouch for Pump
- 1 x User Manual (this document)

3. SETUP

3.1 Charging the Wireless Pump

Before first use, fully charge the wireless pump. The pump is equipped with an 1800mAh battery.

1. Connect the provided USB-C cable to the charging port on the pump.
2. Connect the other end of the USB-C cable to a compatible USB power adapter (not included).
3. The battery indicator lights on the pump will illuminate during charging. All lights will be solid when fully charged.
4. A full charge provides approximately 100+ uses.

4. OPERATING INSTRUCTIONS

Follow these steps to effectively compress your items using the Vacbird wireless pump and storage bags.

4.1 Preparing the Storage Bag

1. **Open the Bag:** Unzip the double-seal zipper of the storage bag.
2. **Load Items:** Place your clothes, blankets, or other soft items neatly into the bag. Do not overfill the bag beyond the indicated fill line. Ensure no sharp objects are inside that could puncture the bag.
3. **Seal the Bag:** Carefully close the double-seal zipper. Run your fingers along the zipper multiple times to ensure a complete and airtight seal.

Image: A composite image illustrating key features of the Vacbird storage bags, including the double-seal zipper for security, reinforced sealing, rounded corners for safety, and visual transparency to easily identify contents.

4.2 Using the Wireless Pump

1. **Locate the Valve:** Find the air valve on the surface of the storage bag.
2. **Position the Pump:** Place the wireless pump directly onto the air valve, ensuring a snug fit. The silicone suction port of the pump is designed to seal tightly without needing to be held.
3. **Start Compression:** Press the power button on the pump once to start the vacuuming process. The pump will begin to extract air from the bag.

4. **Monitor Progress:** The pump will automatically stop once the air is fully extracted and optimal compression is achieved (typically within 3 seconds for initial compression, up to 3 minutes for full airtight sealing).
5. **Remove Pump:** Once the pump stops, carefully lift it off the valve. The valve is designed to prevent air re-entry.

Image: A hand holding the Vacbird wireless pump, demonstrating its compact size and how it is placed onto a vacuum bag for operation. Text overlays indicate its 1800mAh battery and Type-C charging.

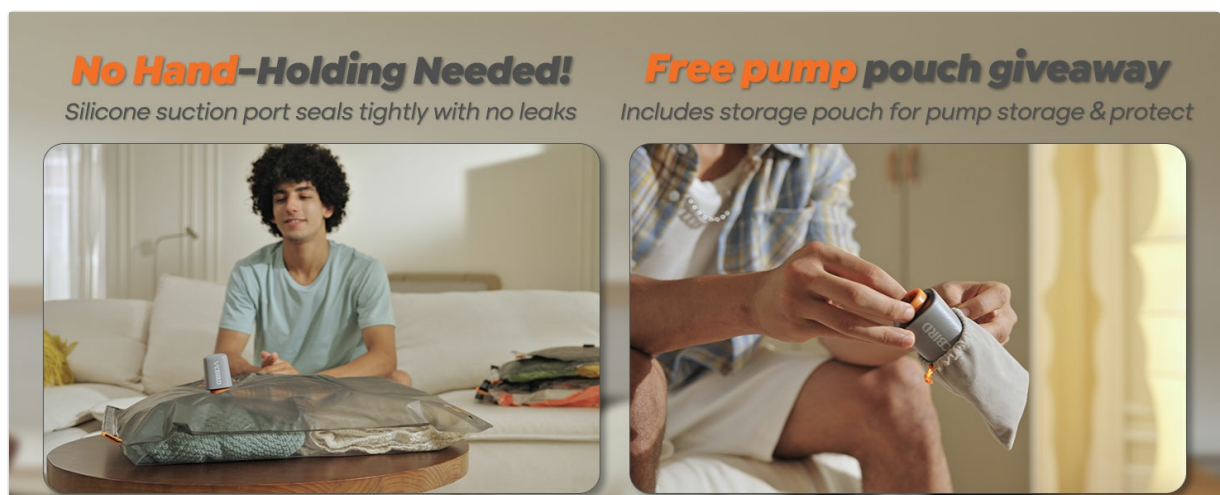

Image: A split image showing the Vacbird wireless pump operating hands-free on a vacuum bag, demonstrating its secure silicone suction port. The other half shows a hand placing the pump into its included storage pouch, emphasizing portability and protection.

Your items are now compressed and ready for storage or travel. The bags reduce bulk by up to 70%.

Image: A visual comparison showing a stack of uncompressed items next to a significantly smaller stack of the same items after being compressed in Vacbird vacuum bags, highlighting a 70% space saving.

5. MAINTENANCE

5.1 Cleaning the Pump

- Wipe the pump with a soft, dry cloth.
- Do not use abrasive cleaners or solvents.

5.2 Cleaning the Storage Bags

- Wipe the bags with a damp cloth and mild soap if necessary.
- Ensure bags are completely dry before storing or reusing.

5.3 Storage

- Store the pump in its provided travel pouch when not in use.
- Store bags flat or rolled in a cool, dry place away from direct sunlight and sharp objects.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Pump does not turn on.	Low battery.	Charge the pump using the USB-C cable.
Air is not being extracted or bag reinflates.	Bag zipper not fully sealed. Pump not properly seated on valve. Bag is punctured.	Ensure the double-seal zipper is completely closed. Reposition the pump firmly onto the valve. Inspect the bag for holes or tears. Replace if damaged.
Pump stops prematurely.	Bag is fully compressed. Low battery.	This is normal operation. Charge the pump.
Items are still bulky after compression.	Bag overfilled. Items are not suitable for vacuum compression (e.g., rigid items).	Remove some items to avoid overfilling. Ensure only soft, compressible items are placed in the bags.

7. SPECIFICATIONS

- **Brand:** Vacbird
- **Model Number:** X8-3H-NZ-us
- **Material:** PA+PE
- **Color:** Grey with Orange accents
- **Wireless Pump Battery:** 1800mAh Lithium Ion (included)
- **Charging:** USB-C
- **Compression Power:** -4500Pa Turbo Speed
- **Bag Sizes (15-Piece Set):**
 - 6 x Small (20 inches)
 - 6 x Medium (24 inches)
 - 3 x Large (28 inches)
- **Special Features:** Cordless & USB Rechargeable, Customized Bag Size, High-Efficiency Compression, Palm-sized mini & Portable, Semi-Transparent Design
- **Recommended Uses:** Home Storage, Seasonal Items, Travel

3-SIZE FOR ALL STORAGE NEEDS!
