- **Dusting:** Regularly dust all surfaces with a dry, soft cloth to prevent buildup.
- **Hardware:** Periodically check all screws and fasteners to ensure they remain tight. Retighten if necessary.

6. Troubleshooting

This section addresses common concerns and provides solutions.

Problem	Possible Cause	Solution
Shoes do not fit in the compartments.	Shoe size or type (e.g., men's tennis shoes, thick-soled shoes) may be too large for the standard compartment height.	Adjust or remove the internal shelves within the flip drawer to create more vertical space. Note that some larger or bulkier shoes may not fit even with adjustments.
Lid/cushion pinches fingers when closing.	Hands or fingers are in the path of the closing lid.	Always ensure hands and fingers are clear of the hinges and the closing path of the lid. Utilize the cut-out slot for opening and closing to maintain a safe distance.
Bench feels unstable after assembly.	Hardware may not be fully tightened.	Carefully re-check and tighten all screws and fasteners according to the assembly manual. Ensure the bench is placed on a flat, level surface.
