1. PRODUCT OVERVIEW

The Takywep Portable Air Conditioner (Model horu9) is a versatile 3-in-1 unit designed to provide cooling, dehumidification, and fan functions for your living space. With 8,000 BTU cooling power, it is suitable for rooms up to 350 sq. ft. Its portable design, complete with caster wheels and side handles, allows for easy movement between rooms. The unit features a user-friendly LED display, a multi-functional remote control, and a 24-hour timer for convenient operation.

PORTABLE AIR CONDITIONER

Key features include 8000 BTU cooling, 24-hour timer, and low noise operation.

2. SAFETY INFORMATION

Please read all safety instructions carefully before operating the appliance. Failure to follow these instructions may result in electric shock, fire, or personal injury.

- This appliance is for indoor use only. Do not use outdoors.

- Ensure the power supply matches the voltage specified on the rating label.
- Do not operate the unit with a damaged cord or plug. If the power cord is damaged, it must be replaced by the manufacturer or a qualified service agent.
- Keep the unit at least 20 inches (50 cm) away from walls or other objects to ensure proper airflow.
- Do not insert fingers or objects into the air inlet or outlet.
- Always unplug the unit before cleaning or performing any maintenance.
- Do not use chemical solvents (e.g., benzene, alcohol, gasoline) to clean the unit.
- Ensure the unit is placed on a flat, stable surface to prevent tipping.
- Do not block the exhaust hose or window kit openings.
- This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities, or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety.

3. PACKAGE CONTENTS

Verify that all components are present and in good condition upon unpacking.

- Portable Air Conditioner Unit
- Remote Control
- Window Kits (Adjustable Window Seal Plate)
- Exhaust Hose
- Hose Connector (for unit)
- Window Kit Connector (for exhaust hose)
- Drain Pipe

Included components: Portable AC unit, exhaust hose, window kit, and remote control.

4. PARTS AND FEATURES

Familiarize yourself with the main parts of your portable air conditioner.

Control Panel

The top-mounted control panel with LED display and function buttons.

Unit Dimensions and Portability

Easy to Install

The compact design includes carry handles and 360-degree caster wheels for easy movement.

Remote Control

20 feet remote control distance

The remote control allows convenient operation from up to 20 feet away.

5. SETUP AND INSTALLATION

Follow these steps to properly set up your portable air conditioner and install the window kit.

1. **Connect Hose Connector to Exhaust Hose:** Attach one end of the hose connector to the exhaust hose by twisting it clockwise until secure.
2. **Connect Window Kit Connector to Exhaust Hose:** Attach the other end of the exhaust hose to the window kit connector.
3. **Measure and Adjust Window Kit:** Measure your window opening and adjust the length of the window seal plate to fit. Secure the plate in the window frame.
4. **Fix Hose Connector on Unit:** Insert the hose connector (with the exhaust hose attached) into the air outlet opening on the back of the air conditioner unit.
5. **Adjust Exhaust Hose and Connect to Window:** Extend the exhaust hose as needed and connect the window kit connector to the opening in the window seal plate. Ensure a tight seal to prevent air leakage.
6. **Plug In and Operate:** Plug the power cord into a grounded electrical outlet. Your unit is now ready for

operation.

HOW TO INSTALL A PORTABLE AIR CONDITIONER?

Step 1: Connect the hose connector to one end of the exhaust hose

Step 2: Connect the window kit connector to the other end of the exhaust hose

Step 3: Measure your window size to adjust the length of the window kit

Step 4: Fix the hose connector on the air outlet of the machine

Step 5: Adjust the length of the exhaust hose and connect it to the window assembly

Step 6: Plug in the power and set the temperature you want to enjoy

Step-by-step guide for quick and easy window kit installation.

6. OPERATING INSTRUCTIONS

Your portable air conditioner can be operated using either the control panel on the unit or the included remote control.

Control Panel and Remote Control Functions

MORE FEATURES

Overview of the LED control panel and remote control features.

- **Power Button:** Turns the unit ON or OFF.
- **Mode Button:** Cycles through Cool, Dehumidify, and Fan modes.
- **Temperature Adjustment Buttons (Up/Down):** Adjusts the desired temperature in Cool mode.
- **Fan Speed Button:** Selects fan speed (Low, High).
- **Timer Button:** Sets the auto ON/OFF timer (up to 24 hours).
- **Swing Button:** Activates or deactivates the automatic louver swing for wider air distribution.
- **Sleep Button:** Activates Sleep mode for quieter operation and gradual temperature adjustment during sleep.

Operating Modes

3 IN 1 OPERATION SYSTEM

The unit offers three distinct operating modes: Cooling, Dehumidifying, and Fan.

- **Cool Mode:** Provides powerful cooling. Set your desired temperature and fan speed. The unit will cool the room to the set temperature.
- **Dehumidify Mode:** Removes excess moisture from the air. The fan speed is typically fixed in this mode. Ensure the drain pipe is connected for continuous drainage or monitor the water tank.
- **Fan Mode:** Circulates air without cooling. Choose between low and high fan speeds.

7. MAINTENANCE

Regular maintenance ensures optimal performance and extends the lifespan of your air conditioner. Always unplug the unit before cleaning.

Cleaning the Air Filter

The air filter should be cleaned every two weeks, or more frequently depending on usage and air quality.

1. Turn off and unplug the unit.
2. Locate and remove the air filter from the back or side of the unit.
3. Wash the filter with warm, soapy water. Rinse thoroughly.

4. Allow the filter to air dry completely before reinstalling. Do not expose to direct sunlight.

Draining Accumulated Water

In Dehumidify mode or high humidity conditions, water will accumulate inside the unit. The unit has a self-evaporation system, but manual draining may be required.

- When the internal water tank is full, the unit may stop operating and display an error code (e.g., 'FL').
- Turn off and unplug the unit.
- Place a shallow pan or tray under the drain port at the bottom rear of the unit.
- Remove the drain plug to allow water to flow out.
- For continuous drainage in Dehumidify mode, attach the provided drain pipe to the drain port and direct it to a floor drain or suitable container.
- Once drained, replace the drain plug securely.

Storage

If storing the unit for an extended period:

1. Drain all accumulated water from the unit.
2. Clean the air filter.
3. Run the unit in Fan mode for a few hours to dry the interior.
4. Unplug the power cord and wrap it neatly.
5. Store the unit in a cool, dry place, away from direct sunlight and extreme temperatures.

8. TROUBLESHOOTING

Before contacting customer support, refer to the following table for common issues and solutions.

Problem	Possible Cause	Solution
Unit does not turn on	No power supply Power cord damaged Full water tank (error code)	Check power outlet and plug Contact service for replacement Drain water tank
Unit cools insufficiently	Air filter dirty Room too large Windows/doors open Exhaust hose blocked/leaking Temperature setting too high	Clean air filter Ensure room size is within capacity Close all windows and doors Check hose for kinks or disconnections Lower the set temperature
Unit is noisy	Unit not on a flat surface Air filter dirty Internal components vibrating	Place on a flat, stable surface Clean air filter This may be normal operating noise; if excessive, contact support.
Water leaks from unit	Drain plug not secure Drain pipe clogged Unit tilted	Ensure drain plug is tightly closed Clear any blockages in the drain pipe Place unit on a level surface
Remote control not working	Batteries dead/incorrectly inserted Obstruction between remote and unit	Replace batteries; check polarity Remove any obstacles; ensure direct line of sight
