INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use of your DOGLinsen No Shock Dog Training Collar. Designed for humane training, this collar utilizes beep and vibration modes to assist in correcting undesirable dog behaviors without causing harm or discomfort. Please read this manual thoroughly before initial use and retain it for future reference.

Figure 1: The DOGLinsen No Shock Dog Training Collar, featuring the pink receiver and remote control unit. This image highlights the compact design and user-friendly interface of the training system.

More humane training to keep your puppy happy

No Shock !
No Prongs !
No Harm !

Figure 2: An illustration emphasizing the humane aspect of the collar, showing a happy dog with the collar and explicitly stating "No Shock! No Prongs! No Harm!" in contrast to traditional shock collars.

SETUP

1. Package Contents Verification

Before beginning, ensure all components listed below are present in your package:

- Remote Transmitter *1
- Receiver *1
- Nylon Collar Strap *1
- Lanyard *1
- USB Charging Cable *1
- User Manual *1
- Box *1

Package Included

Figure 3: All items included in the product package, neatly arranged, showing the remote, receiver, collar strap, charging cable, lanyard, and user manual.

2. Initial Charging

The remote and receiver are equipped with rechargeable Lithium Polymer Batteries. For optimal performance, fully charge both devices before initial use. A full charge typically takes 2 hours.

- Connect the USB Charging Cable to the charging ports on both the remote and receiver.
- Plug the USB cable into a compatible power source (e.g., USB adapter, computer, power bank, power strip).

- Charging indicators will illuminate during the charging process and change once fully charged.

The Smaller and Lighter Collar

Figure 4: Image illustrating the convenient Type-C charging ports on both the remote and receiver, showing various compatible charging methods like power banks, power strips, adapters, and computers.

3. Attaching the Antenna

The remote control unit comes with a detachable antenna. For extended remote range, especially in open outdoor spaces, attach the antenna to the designated port on the remote. The detachable design also allows for portability when not needed.

4. Adjusting the Collar Strap

The nylon collar strap is adjustable to fit dogs weighing 10-110 lbs with neck sizes ranging from 8-27 inches. Ensure the receiver unit is positioned comfortably and securely on your dog's neck, allowing two fingers to fit snugly between the collar and the dog's skin.

Ours: Powerful amplified sound

Standard: Weak or No Sound

Figure 5: A visual guide demonstrating the adjustable nature of the collar strap, suitable for dogs from 10 to 110 lbs and neck sizes 8-27 inches, with an illustration of how to trim excess strap.

OPERATING INSTRUCTIONS

1. Training Modes

The DOGLinsen training collar offers three distinct and humane training modes:

- **Tone Mode (1-9 levels):** Emits an audible beep.
- **Vibration Mode (1-9 levels):** Delivers a gentle vibration.
- **Tone & Vibration Sync Mode (1-9 levels):** Combines both tone and vibration for a more pronounced cue.

Adjust the intensity levels (1-9) using the remote control to suit your dog's sensitivity and the specific training situation. Start with the lowest level and gradually increase if necessary.

4 Effective Modes

No Prongs

Tone
(Style 1-9)

Tone & Vibration
(Level 1-9)

Vibration
(Level 1-9)

Lighting Mode
(Nighttime Use)

Figure 6: This image visually represents the four effective modes: Tone, Tone & Vibration, Vibration, and Lighting Mode, along with a close-up of the receiver unit.

2. Remote Control Usage

The ergonomic remote control features large, clear buttons and an LCD display for easy operation. The remote provides a reliable range of up to 3300 feet in open spaces, ensuring effective communication with your dog even at a distance.

Figure 7: An image illustrating the impressive 3300ft remote range, showing a dog running freely in a park while the owner controls

the collar from a distance.

Figure 8: Close-up view of the remote control, highlighting its large buttons, non-slip silicone handle, and clear LCD display for user convenience.

3. Multi-Dog Training (Up to 3 Channels)

The remote control supports up to 3 separate channels, allowing you to train multiple dogs simultaneously with a single remote. Each dog's training settings are automatically saved, eliminating the need for frequent readjustments.

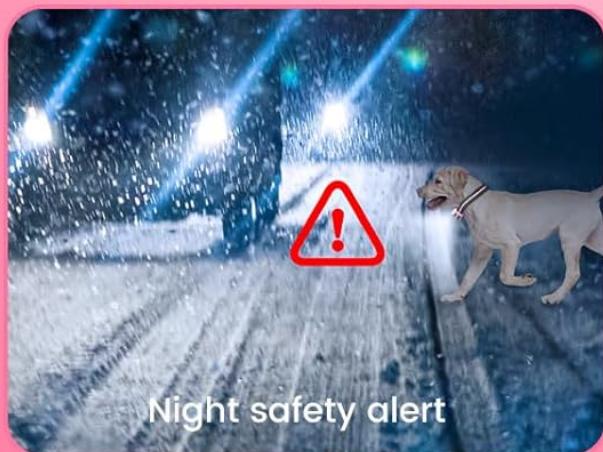

Figure 9: An image depicting three dogs wearing the training collars, illustrating the multi-channel capability of the remote for training multiple pets.

4. Dual-Light Smart Protection

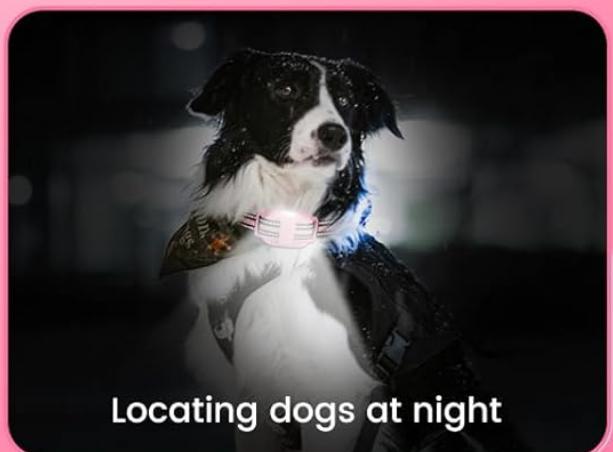

For enhanced safety during low-light conditions, the remote features a built-in flashlight. The receiver is also equipped with a bright LED strobe light that flashes continuously for 30 minutes, aiding in locating your dog during night walks or outdoor adventures.

Flashing Light Mode

Keep your dog safe

Night safety alert

Locating dogs at night

Figure 10: This image highlights the flashing light mode of the collar, showing a dog wearing the illuminated collar at night, emphasizing its role in night safety and locating the dog.

1. Charging Schedule

To maintain optimal battery life and performance, regularly charge both the remote and receiver. The remote offers a standby time of up to 90 days, while the receiver provides 25-40 days of standby time.

- **1 Flashing light:** Low Battery - Needs charging soon.
- **2 Flashing lights:** Medium Battery - Charge when convenient.
- **3 Flashing lights:** Full Battery - Ready to go.

Figure 11: Visual representation of the receiver's battery status indicators, showing how different flashing light patterns correspond to low, medium, and full battery levels.

2. Cleaning and Care

The collar strap is made of Nylon and Polyester. For cleaning, it is recommended to hand wash the collar strap. The receiver unit is IPX7 waterproof, meaning it can withstand immersion in water up to 1 meter for 30 minutes. This makes it suitable for use during swimming, raining, and bathing activities.

Swimming

Raining

Bathing

Figure 12: An image demonstrating the IPX7 waterproof rating of the collar, showing a dog in a swimming pool with the collar, indicating its suitability for various water activities.

TROUBLESHOOTING

Common Issues and Solutions:

- **No response from collar:** Ensure both the remote and receiver are fully charged and powered on. Check if the remote and receiver are properly paired.
- **Weak signal/limited range:** Ensure the antenna is securely attached to the remote. Obstacles like thick walls or dense foliage can interfere with the signal; try moving to an open area.
- **Collar not vibrating/beeping:** Verify the selected mode and intensity level on the remote. Ensure the receiver is correctly positioned on the dog's neck.
- **Battery drains quickly:** Ensure both devices are fully charged before each use. Reduce the frequency of use if possible, or ensure the devices are turned off when not in use.

If you encounter issues not covered here, please refer to the detailed user manual (PDF) available online or contact customer support for assistance.

SPECIFICATIONS

| Feature | Detail |
|-----------------------------------|--|
| Brand | DOGLinsen |
| Model Name | PD 518FV-1-No Shock Dog Training Collar (Pink) |
| Item Weight | 9.9 ounces |
| Item Package Dimensions L x W x H | 6.69 x 4.53 x 2.17 inches |
| Batteries | 1 Lithium Polymer batteries required. (included) |
| Color | Pink |
| Size | Adjustable (fits necks 8-27 inches, dogs 10-110 lbs) |
| Material | Nylon, Polyester |
